

Dear Stockholder:

April 12, 2010

You are cordially invited to attend the annual meeting of stockholders of iRobot Corporation to be held at 10:00 a.m., local time, on Thursday, May 27, 2010 at iRobot Corporation headquarters located at 8 Crosby Drive, Bedford, Massachusetts 01730.

At this annual meeting, you will be asked to elect four class II directors for three-year terms and to ratify the appointment of our independent registered public accountants. The board of directors unanimously recommends that you vote FOR election of the director nominees and FOR ratification of appointment of our independent registered public accountants.

Details regarding the matters to be acted upon at this annual meeting appear in the accompanying proxy statement. Please give this material your careful attention.

Whether or not you plan to attend the annual meeting, we urge you to sign and return the enclosed proxy so that your shares will be represented at the annual meeting. If you attend the annual meeting, you may vote in person even if you have previously returned your proxy card. Your prompt cooperation will be greatly appreciated.

Very truly yours,

A handwritten signature in black ink, appearing to read "C. M. Angle".

COLIN M. ANGLE
Chief Executive Officer & Chairman of the Board

iROBOT CORPORATION

8 Crosby Drive
Bedford, Massachusetts 01730
(781) 430-3000

**NOTICE OF ANNUAL MEETING OF STOCKHOLDERS
To Be Held on May 27, 2010**

To the Stockholders of iRobot Corporation:

The annual meeting of stockholders of iRobot Corporation, a Delaware corporation (the "Company"), will be held on Thursday, May 27, 2010, at 10:00 a.m., local time, at iRobot Corporation headquarters located at 8 Crosby Drive, Bedford, Massachusetts 01730, for the following purposes:

1. To elect four (4) class II directors, nominated by the Board of Directors, each to serve for a three-year term and until his or her successor has been duly elected and qualified or until his or her earlier resignation or removal;
2. To ratify the appointment of the accounting firm of PricewaterhouseCoopers LLP as the Company's independent registered public accountants for the current fiscal year; and
3. To transact such other business as may properly come before the annual meeting and any adjournments or postponements thereof.

Proposal 1 relates solely to the election of four (4) class II directors nominated by the board of directors and does not include any other matters relating to the election of directors, including without limitation, the election of directors nominated by any stockholder of the Company.

Only stockholders of record at the close of business on April 8, 2010, are entitled to notice of and to vote at the annual meeting and at any adjournment or postponement thereof.

All stockholders are cordially invited to attend the annual meeting in person. However, to assure your representation at the annual meeting, we urge you, whether or not you plan to attend the annual meeting, to sign and return the enclosed proxy so that your shares will be represented at the annual meeting. If you attend the annual meeting, you may vote in person even if you have previously returned your proxy card. Directions to iRobot Corporation headquarters can be found at the Company's website, <http://www.irobot.com>.

By Order of the Board of Directors,

GLEN D. WEINSTEIN
Senior Vice President,
General Counsel and Secretary

Bedford, Massachusetts
April 12, 2010

IMPORTANT NOTICE REGARDING THE AVAILABILITY OF PROXY MATERIALS FOR THE SHAREHOLDER MEETING TO BE HELD ON MAY 27, 2010. THE PROXY STATEMENT AND ANNUAL REPORT TO SHAREHOLDERS ARE AVAILABLE AT <https://materials.proxyvote.com/462726>.

WHETHER OR NOT YOU EXPECT TO ATTEND THE ANNUAL MEETING, PLEASE COMPLETE, DATE AND SIGN THE ENCLOSED PROXY CARD AND MAIL IT PROMPTLY IN THE ENCLOSED ENVELOPE IN ORDER TO ASSURE REPRESENTATION OF YOUR SHARES. NO POSTAGE NEED BE AFFIXED IF THE PROXY CARD IS MAILED IN THE UNITED STATES.

IN ACCORDANCE WITH OUR SECURITY PROCEDURES, ALL PERSONS ATTENDING THE ANNUAL MEETING WILL BE REQUIRED TO PRESENT PICTURE IDENTIFICATION.

iROBOT CORPORATION
8 Crosby Drive
Bedford, Massachusetts 01730
PROXY STATEMENT
For the Annual Meeting of Stockholders
To Be Held on May 27, 2010

April 12, 2010

This proxy statement is furnished in connection with the solicitation of proxies by the board of directors of iRobot Corporation, a Delaware corporation (the "Company"), for use at the annual meeting of stockholders to be held on Thursday, May 27, 2010, at 10:00 a.m., local time, at iRobot Corporation headquarters located at 8 Crosby Drive, Bedford, Massachusetts 01730, and any adjournments or postponements thereof. An annual report to stockholders, containing financial statements for the fiscal year ended January 2, 2010, is being mailed together with this proxy statement to all stockholders entitled to vote at the annual meeting. This proxy statement and the form of proxy are expected to be first mailed to stockholders on or about April 15, 2010.

The purposes of the annual meeting are to elect four class II directors for three-year terms, and to ratify the appointment of the Company's independent registered public accountants. Only stockholders of record at the close of business on April 8, 2010 will be entitled to receive notice of and to vote at the annual meeting. As of April 1, 2010, 25,151,817 shares of common stock, \$.01 par value per share, of the Company were issued and outstanding. The holders of common stock are entitled to one vote per share on any proposal presented at the annual meeting.

Stockholders may vote in person or by proxy. If you attend the annual meeting, you may vote in person even if you have previously returned your proxy card. Any proxy given pursuant to this solicitation may be revoked by the person giving it at any time before it is voted. Proxies may be revoked by (i) filing with the Secretary of the Company, before the taking of the vote at the annual meeting, a written notice of revocation bearing a later date than the proxy, (ii) duly completing a later-dated proxy relating to the same shares and delivering it to the Secretary of the Company before the taking of the vote at the annual meeting, or (iii) attending the annual meeting and voting in person (although attendance at the annual meeting will not in and of itself constitute a revocation of a proxy). Any written notice of revocation or subsequent proxy should be sent so as to be delivered to iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730, Attention: Secretary, before the taking of the vote at the annual meeting.

The representation in person or by proxy of at least a majority of the outstanding shares of common stock entitled to vote at the annual meeting is necessary to constitute a quorum for the transaction of business. Votes withheld from any nominee, abstentions and broker "non-votes" are counted as present or represented for purposes of determining the presence or absence of a quorum for the annual meeting. A "non-vote" occurs when a nominee holding shares for a beneficial owner votes on one proposal but does not vote on another proposal because, with respect to such other proposal, the nominee does not have discretionary voting power and has not received instructions from the beneficial owner.

For Proposal 1, the election of class II directors, the nominees receiving the highest number of affirmative votes of the shares present or represented and entitled to vote at the annual meeting shall be elected as directors. For Proposal 2, the ratification of the appointment of PricewaterhouseCoopers LLP as the Company's independent registered public accountants for the current fiscal year, an affirmative vote of a majority of the shares present, in person or represented by proxy, and voting on each such matter is required for approval. Abstentions are included in the number of shares present or represented and voting on each matter. Broker "non-votes" are not considered voted for the particular matter and have the effect of reducing the number of affirmative votes required to achieve a majority for such matter by reducing the total number of shares from which the majority is calculated.

The person named as attorney-in-fact in the proxies, Glen D. Weinstein, was selected by the board of directors and is an officer of the Company. All properly executed proxies returned in time to be counted at the annual meeting will be voted by such person at the annual meeting. Where a choice has been specified on the

proxy with respect to the foregoing matters, the shares represented by the proxy will be voted in accordance with the specifications. If no such specifications are indicated, such proxies will be voted FOR election of the director nominees and FOR ratification of the appointment of our independent registered public accountants.

Aside from the election of directors and ratification of the appointment of the independent registered public accountants, the board of directors knows of no other matters to be presented at the annual meeting. If any other matter should be presented at the annual meeting upon which a vote properly may be taken, shares represented by all proxies received by the board of directors will be voted with respect thereto in accordance with the judgment of the person named as attorney-in-fact in the proxies.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth certain information regarding beneficial ownership of the Company's common stock as of April 1, 2010: (i) by each person who is known by the Company to beneficially own more than 5% of the outstanding shares of common stock; (ii) by each director or nominee of the Company; (iii) by each named executive officer of the Company; and (iv) by all directors and executive officers of the Company as a group. Unless otherwise noted below, the address of each person listed on the table is c/o iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730.

<u>Name of Beneficial Owner</u>	<u>Shares Beneficially Owned(1)</u>	<u>Percentage of Shares Beneficially Owned(2)</u>
FMR LLC(3) 82 Devonshire Street Boston, MA 02109	3,082,293	12.3%
OppenheimerFunds, Inc.(4) 2 World Financial Center 225 Liberty Street New York, NY 10281-1008	2,500,500	9.9%

(1) Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and includes voting and investment power with respect to shares. Unless otherwise indicated below, to the knowledge of the Company, all persons listed below have sole voting and investment power with respect to their shares of common stock, except to the extent authority is shared by spouses under applicable law. Pursuant to the rules of the Securities and Exchange Commission, the number of shares of common stock deemed outstanding includes (i) shares issuable pursuant to options held by the respective person or group that are currently exercisable or may be exercised within 60 days of April 1, 2010 and (ii) shares issuable pursuant to restricted stock units held by the respective person or group that vest within 60 days of April 1, 2010.

- (2) Applicable percentage of ownership as of April 1, 2010 is based upon 25,151,817 shares of common stock outstanding.
- (3) FMR LLC and Edward C. Johnson 3d each have sole dispositive power with respect to all of the shares. Fidelity Management & Research Company (“Fidelity”), a wholly owned subsidiary of FMR LLC and an investment adviser, is a beneficial owner of all of the shares, 1,744,086 of which are attributable to Fidelity OTC Portfolio, an investment company registered under the Investment Company Act of 1940. Neither FMR LLC nor Edward C. Johnson 3d has the sole power to vote or direct the voting of the shares owned directly by the Fidelity Funds, which power resides with the Funds’ Boards of Trustees. Fidelity carries out the voting of the shares under written guidelines established by the Funds’ Boards of Trustees. The address of each reporting entity is 82 Devonshire Street, Boston, MA 02109. This information has been obtained from a Schedule 13G filed by FMR LLC and Edward C. Johnson 3d with the Securities and Exchange Commission on January 11, 2010.
- (4) OppenheimerFunds, Inc. has shared voting power and shared dispositive power with respect to all of these shares. This information has been obtained from a Schedule 13G/A filed by OppenheimerFunds, Inc. with the Securities and Exchange Commission on February 2, 2010, and includes 2,500,500 shares over which Oppenheimer Global Opportunity Fund has shared voting and shared dispositive power. The address of Oppenheimer Global Opportunity Fund is 6803 S. Tucson Way, Centennial, CO 80112.
- (5) Includes 52,072 shares issuable to Mr. Angle upon exercise of stock options.
- (6) Includes 92,395 shares issuable to Mr. Leahy upon exercise of stock options.
- (7) Includes 37,500 shares issuable to Mr. Beck upon exercise of stock options and 8,750 shares issuable to Mr. Beck upon vesting of restricted stock units.
- (8) Includes 237,731 shares issuable to Mr. Dyer upon exercise of stock options and 100 shares owned by Mr. Dyer’s stepson. Mr. Dyer disclaims beneficial ownership of the 100 shares owned by his stepson, except to the extent of his pecuniary interest, if any.
- (9) Includes 48,168 shares issuable to Ms. Dean upon exercise of stock options.
- (10) Includes 111,384 shares issuable to Mr. Weinstein upon exercise of stock options.
- (11) Includes 7,000 shares issuable to Dr. Brooks upon exercise of stock options.
- (12) Includes an aggregate of 526,970 shares held by iD5 Fund, L.P. Dr. Chwang is a general partner of the management company for iD5 Fund, L.P. and may be deemed to share voting and investment power with respect to all shares held by iD5 Fund, L.P. Dr. Chwang disclaims beneficial ownership of such shares except to the extent of his pecuniary interest, if any. Also includes 58,667 shares issuable to Dr. Chwang upon exercise of stock options and 193,710 shares held in a trust for the benefit of certain of his family members. As co-trustees of the family trust, Dr. Chwang shares voting and dispositive power over the shares held by the trust with his spouse.
- (13) Includes 76,667 shares issuable to Dr. Gansler upon exercise of stock options.
- (14) Includes 58,667 shares issuable to Mr. Geisser upon exercise of stock options and 9,026 shares issuable to Mr. Geisser upon vesting of phantom stock.
- (15) Includes 16,000 shares issuable to Ms. Greiner upon exercise of stock options.
- (16) Includes 58,667 shares issuable to Mr. McNamee upon exercise of stock options and 3,487 shares issuable to Mr. McNamee upon vesting of phantom stock.
- (17) Includes 58,667 shares issuable to Mr. Meekin upon exercise of stock options and 8,123 shares issuable to Mr. Meekin upon vesting of phantom stock. Mr. Meekin’s spouse shares voting and dispositive power over the shares.
- (18) Consists of 58,667 shares issuable to Gen. Kern upon exercise of stock options and 3,868 shares issuable to Gen. Kern upon vesting of phantom stock..
- (19) Includes an aggregate of 972,252 shares issuable upon exercise of stock options held by fifteen (15) executive officers and directors, an aggregate of 8,750 shares issuable pursuant to restricted stock units held by one (1) executive officer, and an aggregate of 24,504 shares issuable upon vesting of phantom stock to four (4) directors.

PROPOSAL 1
ELECTION OF DIRECTORS

Nominees

Our board of directors currently consists of ten members. Our amended and restated certificate of incorporation divides the board of directors into three classes. One class is elected each year for a term of three years. The board of directors, upon the recommendation of the nominating and corporate governance committee, has nominated Helen Greiner, George C. McNamee, Peter T. Meekin and Paul Sagan and recommended that each be elected to the board of directors as a class II director, each to hold office until the annual meeting of stockholders to be held in the year 2013 and until his or her successor has been duly elected and qualified or until his or her earlier death, resignation or removal. Ms. Greiner and Messrs. McNamee, Meekin and Sagan are class II directors whose terms expire at this annual meeting. The board of directors is also composed of (i) three class III directors (Rodney A. Brooks, Ph.D., Andrea Geisser, and Jacques S. Gansler, Ph.D.), whose terms expire upon the election and qualification of directors at the annual meeting of stockholders to be held in 2011 and (ii) three class I directors (Colin M. Angle, Ronald Chwang, Ph.D., and Paul J. Kern, Gen. U.S. Army (ret.)) whose terms expire upon the election and qualification of directors at the annual meeting of stockholders to be held in 2012.

The board of directors knows of no reason why any of the nominees would be unable or unwilling to serve, but if any nominee should for any reason be unable or unwilling to serve, the proxies will be voted for the election of such other person for the office of director as the board of directors may recommend in the place of such nominee. Unless otherwise instructed, the proxy holders will vote the proxies received by them for the nominees named below.

Recommendation of the Board

**THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS
THAT YOU VOTE “FOR” THE NOMINEES LISTED BELOW.**

The following table sets forth the nominees to be elected at the annual meeting and continuing directors, the year each such nominee or director was first elected a director, the positions with us currently held by each nominee and director, the year each nominee’s or director’s current term will expire and each nominee’s and director’s current class:

<u>Nominee’s or Director’s Name and Year First Became a Director</u>	<u>Position(s) with the Company</u>	<u>Year Current Term Will Expire</u>	<u>Current Class of Director</u>
Nominees for Class II Directors:			
Helen Greiner 1994	Director	2010	II
George C. McNamee 1999	Director	2010	II
Peter T. Meekin 2003	Director	2010	II
Paul Sagan 2010	Director	2010	II
Continuing Directors:			
Rodney A. Brooks, Ph.D. 1990	Director	2011	III
Andrea Geisser 2004	Director	2011	III
Jacques S. Gansler, Ph.D. 2003	Director	2011	III
Colin M. Angle 1992	Chairman of the Board, Chief Executive Officer and Director	2012	I
Ronald Chwang, Ph.D. 1998	Director	2012	I
Paul J. Kern, Gen. U.S. Army (ret.) 2006	Director	2012	I

DIRECTORS AND EXECUTIVE OFFICERS

The following table sets forth the director nominees to be elected at the annual meeting, the directors and the executive officers of the Company, their ages immediately prior to the annual meeting, and the positions currently held by each such person with the Company.

Name	Age	Position
Colin M. Angle	42	Chairman of the Board, Chief Executive Officer and Director
John J. Leahy	51	Executive Vice President, Chief Financial Officer and Treasurer
Jeffrey A. Beck	47	President, Home Robots
Joseph W. Dyer	63	President, Government & Industrial
Alison Dean	45	Senior Vice President, Corporate Finance
Glen D. Weinstein	39	Senior Vice President, General Counsel and Secretary
Rodney A. Brooks, Ph.D.	55	Director
Ronald Chwang, Ph.D.(1)	62	Director
Jacques S. Gansler, Ph.D.(2)	75	Director
Andrea Geisser(3)	67	Director
Helen Greiner	42	Director
George C. McNamee(1)(2)(3)	63	Director
Peter T. Meekin(2)(3)	60	Director
Paul J. Kern, Gen. U.S. Army (ret)(1)	64	Director
Paul Sagan	51	Director

- (1) Member of compensation committee
(2) Member of nominating and corporate governance committee
(3) Member of audit committee

Colin M. Angle, a co-founder of iRobot, has served as chairman of the board since October 2008, as chief executive officer since June 1997, and prior to that, as our president since November 1992. Mr. Angle has also served as a director since October 1992. Mr. Angle also worked at the National Aeronautical and Space Administration's Jet Propulsion Laboratory where he participated in the design of the behavior-controlled rovers that led to Sojourner exploring Mars in 1997. Mr. Angle holds a B.S. in Electrical Engineering and an M.S. in Computer Science, both from MIT. As a co-founder and chief executive officer, Mr. Angle provides a critical contribution to the board of directors reflecting his detailed knowledge of the Company, our employees, our client base, our prospects, the strategic marketplace and our competitors.

John J. Leahy has served as our executive vice president, chief financial officer and treasurer since June 2008. From August 2007 to September 2007, Mr. Leahy, served as executive vice president, chief financial officer, principal financial/accounting officer and assistant treasurer of The Hanover Insurance Group, Inc. From 1999 to 2007, Mr. Leahy served as executive vice president and chief financial officer of Keane, Inc., and served as interim president and chief executive officer from May 2006 to January 2007. Mr. Leahy received a B.S. in Finance from Merrimack College and an M.B.A. from Boston College.

Jeffrey A. Beck has served as the president of our home robots division since April 2009. Prior to joining iRobot, Mr. Beck served at AMETEK Corporation as senior vice president and general manager, Aerospace & Defense from 2008 to 2009 and as vice president & general manager, Power Systems and Instruments Division from 2004 to 2008. From 1996 to 2004, Mr. Beck served in a number of positions at Danaher Corporation, including president, Danaher Precision Systems Division and vice president of sales, Kollmorgen I&C Division. Mr. Beck holds a B.S. in Mechanical Engineering from the New Jersey Institute of Technology and an M.B.A. from Boston University.

Joseph W. Dyer has served as the president of our government and industrial robots division since July 2006. Mr. Dyer served as executive vice president and general manager of our government and industrial robots division from September 2003 until July 2006. Prior to joining iRobot, Mr. Dyer served for 32 years in the U.S. Navy. From July 2000 until July 2003, he served as Vice Admiral commanding the Naval Air

Systems Command at which he was responsible for research and development, procurement and in-service support for naval aircraft, weapons and sensors. He is an elected fellow in the Society of Experimental Test Pilots and the National Academy of Public Administration. He also chairs NASA's Aerospace Safety Advisory Panel. Mr. Dyer holds a B.S. in Chemical Engineering from North Carolina State University and an M.S. in Finance from the Naval Postgraduate School, Monterey, California.

Alison Dean has served as our senior vice president, corporate finance since February 2010. From March 2007 until February 2010, Ms. Dean served as our principal accounting officer and vice president, financial controls & analysis. From August 2005 until March 2007, Ms. Dean served as our vice president, financial planning & analysis. From 1995 to August 2005, Ms. Dean served in a number of positions at 3Com Corporation, including vice president and corporate controller from 2004 to 2005 and vice president of finance — worldwide sales from 2003 to 2004. Ms. Dean holds a B.A. in Business Economics from Brown University and an M.B.A. from Boston University.

Glen D. Weinstein has served as our general counsel since July 2000. Since February 2005, Mr. Weinstein has also served as a senior vice president, and he served as a vice president from February 2002 to January 2005. Since March 2004, he has also served as our secretary. Prior to joining iRobot, Mr. Weinstein was with Covington & Burling, a law firm in Washington, D.C. Mr. Weinstein holds a B.S. in Mechanical Engineering from MIT and a J.D. from the University of Virginia School of Law.

Rodney A. Brooks, Ph.D., a co-founder of iRobot, has served as a director since our inception in August 1990, and from inception until February 2004, as the chairman of the board of directors. Dr. Brooks held various positions at iRobot since our inception, including chief technology officer from June 1997 until September 2008, and prior to that, treasurer and president. In September 2008, Dr. Brooks co-founded Heartland Robotics to develop low-cost industrial robots that will empower workers and serves as its chairman and chief technology officer. Dr. Brooks also serves as president of BrooksLab LLC. Dr. Brooks has taken a leave from his position as Panasonic Professor of Robotics at MIT. From June 2003 until June 2007, Dr. Brooks was director of the MIT Computer Science and Artificial Intelligence Lab. From August 1997 until June 2003, he was the director of the MIT Artificial Intelligence Laboratory. Dr. Brooks is a member of the National Academy of Engineering. Dr. Brooks holds a degree in pure mathematics from the Flinders University of South Australia and a Ph.D. in Computer Science from Stanford University. As a co-founder and former chief technology officer, Dr. Brooks provides a critical contribution to the board of directors reflecting his detailed knowledge of the robotics industry.

Ronald Chwang, Ph.D., has served as a director since November 1998. Dr. Chwang is the chairman and president of iD Ventures America, LLC (formerly known as Acer Technology Ventures) under the iD SoftCapital Group, a venture investment and management consulting service group formed in January 2005. From August 1998 until December 2004, Dr. Chwang was the chairman and president of Acer Technology Ventures, LLC, managing high-tech venture investment activities in North America. Dr. Chwang also serves on the board of directors of Silicon Storage Technology, Inc. and a number of other private high tech companies and is a former director of ATI Technologies Inc. Dr. Chwang holds a B.Eng. (with honors) in Electrical Engineering from McGill University and a Ph.D. in Electrical Engineering from the University of Southern California. Dr. Chwang brings to the board of directors his extensive experience in the technology industry, through both company operations and venture capital investment.

Jacques S. Gansler, Ph.D. has served as a director since July 2004. Dr. Gansler has been a professor at the University of Maryland, where he leads the school's Center for Public Policy and Private Enterprise, since January 2001. From November 1997 until January 2001, Dr. Gansler served as the Under Secretary of Defense for Acquisition, Technology and Logistics for the U.S. federal government. Dr. Gansler also serves on the board of directors of Global Defense Technology & Systems, Inc. Dr. Gansler holds a B.E. in electrical engineering from Yale University, an M.S. in Electrical Engineering from Northeastern University, an M.A. in Political Economy from New School for Social Research, and a Ph.D. in Economics from American University. Dr. Gansler brings to the board of directors his experience working with the federal government in the defense industry.

Andrea Geisser has served as a director since March 2004. Mr. Geisser is currently a senior advisor to Zephyr Management Inc., a global private equity firm that specializes in emerging markets (Africa, India) and a member of the investment committee of some of those funds. Mr. Geisser is also on the board of directors of

Buildworks Group Ltd, a listed South African company operating in the construction of electrical substations and building materials. From 1995 to 2005, Mr. Geisser was a managing director of Fenway Partners. Prior to founding Fenway Partners, Mr. Geisser was a managing director of Butler Capital Corporation. Prior to that, he was a managing director of Onex Investment Corporation, a Canadian management buyout company. From 1974 to 1986, he was a senior officer of Exor America. Mr. Geisser has been a board member and audit committee member of several private companies. Mr. Geisser holds a bachelor's degree from Bocconi University in Milan, Italy and a P.M.D. from Harvard Business School. Mr. Geisser brings to the board of directors his extensive experience regarding the management of companies, as well as his financial expertise.

Helen Greiner, a co-founder of iRobot, has served as a director since July 1994. Ms. Greiner also served as president of iRobot from June 1997 until February 2004 and as chairman of the board from February 2004 until October 2008. In October 2008, Ms. Greiner resigned as an employee of iRobot and as chairman of the board to become chairman, president & CEO of Cy PhyWorks. Prior to joining iRobot, Ms. Greiner founded California Cybernetics, a company commercializing Jet Propulsion Laboratory technology. She has been honored by Technology Review Magazine as an "Innovator for the Next Century." Ms. Greiner holds a B.S. in Mechanical Engineering and an M.S. in Computer Science, both from MIT. Ms. Greiner has extensive knowledge of the robotics industry, and as a co-founder and former executive officer of the Company, Ms. Greiner provides a critical contribution to the board of directors reflecting her detailed knowledge of the Company, the strategic marketplace and our competitors.

George C. McNamee has served as a director since August 1999. Mr. McNamee is a managing partner of FA Technology Ventures, an information and energy technology venture capital firm. From 1984 to 2007, Mr. McNamee served as chairman of First Albany Companies Inc., a specialty investment banking firm. Mr. McNamee serves as chairman of the board of directors of Plug Power Inc. and is a director of several private companies. Mr. McNamee is a former director of Broadpoint Securities Group, Inc. He is a Trustee of the American Friends of Eton College and the Albany Academies. Mr. McNamee holds a B.A. from Yale University. Mr. McNamee brings to the board of directors his extensive experience regarding the management of public and private companies, as well as his financial expertise.

Peter T. Meekin has served as a director since February 2003. Mr. Meekin has been a managing director of Trident Capital, a venture capital firm, since 1998. Prior to joining Trident Capital, he was vice president of venture development at Enterprise Associates, LLC, the venture capital division of IMS Health. Mr. Meekin holds a B.S. in Mathematics from the State University of New York at New Paltz. Mr. Meekin brings to the board of directors his extensive experience regarding the management of companies, as well as his financial expertise.

Paul J. Kern, Gen. U.S. Army (ret.) has served as a director since May 2006. Gen. Kern has served as a senior counselor to The Cohen Group, an international strategic business consulting firm, since January 2005. Gen. Kern also served as president and chief operating officer of AM General LLC from August 2008 until January 2010. From 1963 to 2004, Gen. Kern served in the U.S. Army and, from October 2001 to November 2004, as Commanding General of the U.S. Army Materiel Command. Prior to his command in the U.S. Army Materiel Command, he served as the military deputy to the Assistant Secretary of the Army for Acquisition, Logistics and Technology. Gen. Kern also serves on the board of directors of ITT Corporation and is a former director of EDO Corporation and Anteon International Corporation. He holds a B.S. from the United States Military Academy at West Point, an M.S. in Civil Engineering from the University of Michigan and an M.S. in Mechanical Engineering from the University of Michigan. Gen. Kern brings to the board of directors his extensive experience in the military and defense industry.

Paul Sagan has served as a director since February 2010. He became Akamai Technology, Inc.'s (NASDAQ: AKAM) chief executive officer in April 2005 and has served as its president since May 1999. Mr. Sagan became a member of Akamai's board of directors in January 2005. Akamai is the leader in providing managed services for powering video, dynamic transactions and enterprise applications online. From July 1997 to August 1998, Mr. Sagan was senior advisor to the World Economic Forum, a Geneva, Switzerland-based organization that provides a collaborative framework for leaders to address global issues. Previously, Mr. Sagan held senior executive positions at Time Warner Cable and Time Inc., affiliates of Time Warner Inc., and at CBS, Inc. Mr. Sagan also serves on the board of directors of EMC Corporation and is a former member of the board of directors of Dow Jones & Company, Inc. and Digitas, Inc. Mr. Sagan brings to

the board of directors his extensive experience with complex global organizations, combined with his operational and corporate governance expertise.

Our executive officers are elected by the board of directors on an annual basis and serve until their successors have been duly elected and qualified or until their earlier death, resignation or removal.

CORPORATE GOVERNANCE AND BOARD MATTERS

Board Leadership Structure

Mr. Angle serves as our chief executive officer and chairman of the board. The board of directors believes that having our executive officer as chairman of the board facilitates the board of directors' decision-making process because Mr. Angle has first-hand knowledge of our operations and the major issues facing us. This also enables Mr. Angle to act as the key link between the board of directors and other members of management. To assure effective independent oversight, the board of directors annually appoints a lead independent director, as discussed further in "Executive Sessions of Independent Directors" below.

Independence of Members of the Board of Directors

The board of directors has determined that Drs. Chwang and Gansler and Messrs. Geisser, McNamee, MeeKin, Kern, and Sagan are independent within the meaning of the director independence standards of The NASDAQ Stock Market, Inc., or NASDAQ, and the Securities and Exchange Commission, including Rule 10A-3(b)(1) under the Securities Exchange Act of 1934, as amended, or the Exchange Act. Furthermore, the board of directors has determined that each member of each of the committees of the board of directors is independent within the meaning of the director independence standards of NASDAQ and the Securities and Exchange Commission.

Executive Sessions of Independent Directors

Executive sessions of the independent directors are held prior to each regularly scheduled in-person meeting of the board of directors. Executive sessions do not include any of our non-independent directors and are chaired by a lead independent director who is appointed annually by the board of directors from our independent directors. Mr. McNamee currently serves as the lead independent director. In this role, Mr. McNamee serves as chairperson of the independent director sessions and assists the board in assuring effective corporate governance. The independent directors of the board of directors met in executive session four (4) times in 2009.

The Board of Directors' Role in Risk Oversight

The board of directors oversees our risk management process. This oversight is primarily accomplished through the board of directors' committees and management's reporting processes, including receiving regular reports from members of senior management on areas of material risk to the company, including operational, financial, legal and regulatory, and strategic and reputational risks. The audit committee focuses on risk related to accounting, internal controls, and financial and tax reporting. The audit committee also assesses economic and business risks and monitors compliance with ethical standards. The compensation committee identifies and oversees risks associated with our executive compensation policies and practices, and the nominating and corporate governance committee identifies and oversees risks associated with director independence, related party transactions and the implementation of corporate governance policies.

Policies Governing Director Nominations

Director Qualifications

The nominating and corporate governance committee of the board of directors is responsible for reviewing with the board of directors from time to time the appropriate qualities, skills and characteristics desired of members of the board of directors in the context of the needs of the business and current make-up

of the board of directors. This assessment includes consideration of the following minimum qualifications that the nominating and corporate governance committee believes must be met by all directors:

- nominees must have experience at a strategic or policy making level in a business, government, non-profit or academic organization of high standing;
- nominees must be highly accomplished in his or her respective field, with superior credentials and recognition;
- nominees must be well regarded in the community and shall have a long-term reputation for the highest ethical and moral standards;
- nominees must have sufficient time and availability to devote to the affairs of the Company, particularly in light of the number of boards on which the nominee may serve;
- nominees must be free of conflicts of interest and potential conflicts of interest, in particular with relationships with other boards; and
- nominees must, to the extent such nominee serves or has previously served on other boards, demonstrate a history of actively contributing at board meetings.

We do not have a formal diversity policy. However, pursuant to the Policy Governing Director Qualifications and Nominations, as part of its evaluation of potential director candidates and in addition to other standards the nominating and corporate governance committee may deem appropriate from time to time for the overall structure and composition of the board of directors, the nominating and corporate governance committee may consider whether each candidate, if elected, assists in achieving a mix of board members that represent a diversity of background and experience. Accordingly, the board of directors seeks members from diverse professional backgrounds who combine a broad spectrum of relevant industry and strategic experience and expertise that, in concert, offer us and our stockholders diversity of opinion and insight in the areas most important us and our corporate mission. In addition, nominees for director are selected to have complementary, rather than overlapping, skill sets. All candidates for director nominee must have time available to devote to the activities of the board of directors. The nominating and corporate governance committee also considers the independence of candidates for director nominee, including the appearance of any conflict in serving as a director. Candidates for director nominee who do not meet all of these criteria may still be considered for nomination to the board of directors, if the nominating and corporate governance committee believes that the candidate will make an exceptional contribution to us and our stockholders.

Process for Identifying and Evaluating Director Nominees

The board of directors is responsible for selecting its own members. The board of directors delegates the selection and nomination process to the nominating and corporate governance committee, with the expectation that other members of the board of directors, and of management, will be requested to take part in the process as appropriate.

Generally, the nominating and corporate governance committee identifies candidates for director nominee in consultation with management, through the use of search firms or other advisors, through the recommendations submitted by stockholders or through such other methods as the nominating and corporate governance committee deems to be helpful to identify candidates. Once candidates have been identified, the nominating and corporate governance committee confirms that the candidates meet all of the minimum qualifications for director nominees established by the nominating and corporate governance committee. The nominating and corporate governance committee may gather information about the candidates through interviews, detailed questionnaires, comprehensive background checks or any other means that the nominating and corporate governance committee deems to be helpful in the evaluation process. The nominating and corporate governance committee then meets as a group to discuss and evaluate the qualities and skills of each candidate, both on an individual basis and taking into account the overall composition and needs of the board of directors. Based on the results of the evaluation process, the nominating and corporate governance committee recommends candidates for the board of directors' approval as director nominees for election to the board of directors. The nominating and corporate governance committee also recommends candidates to the board of directors for appointment to the committees of the board of directors.

Procedures for Recommendation of Director Nominees by Stockholders

The nominating and corporate governance committee will consider director nominee candidates who are recommended by our stockholders. Stockholders, in submitting recommendations to the nominating and corporate governance committee for director nominee candidates, shall follow the following procedures:

The nominating and corporate governance committee must receive any such recommendation for nomination not later than the close of business on the 120th day nor earlier than the close of business on the 150th day prior to the first anniversary of the date of the proxy statement delivered to stockholders in connection with the preceding year's annual meeting.

All recommendations for nomination must be in writing and include the following:

- Name and address of the stockholder making the recommendation, as they appear on our books and records, and of such record holder's beneficial owner;
- Number of shares of our capital stock that are owned beneficially and held of record by such stockholder and such beneficial owner;
- Name, age, business and residential address, educational background, current principal occupation or employment, and principal occupation or employment for the preceding five full fiscal years of the individual recommended for consideration as a director nominee;
- All other information relating to the recommended candidate that would be required to be disclosed in solicitations of proxies for the election of directors or is otherwise required, in each case pursuant to Regulation 14A under the Exchange Act, including the recommended candidate's written consent to being named in the proxy statement as a nominee and to serving as a director if approved by the board of directors and elected; and
- A written statement from the stockholder making the recommendation stating why such recommended candidate meets our criteria and would be able to fulfill the duties of a director.

Nominations must be sent to the attention of our secretary by U.S. mail (including courier or expedited delivery service) to:

iRobot Corporation
8 Crosby Drive
Bedford, Massachusetts 01730
Attn: Secretary of iRobot Corporation

Our secretary will promptly forward any such nominations to the nominating and corporate governance committee. Once the nominating and corporate governance committee receives the nomination of a candidate and the candidate has complied with the minimum procedural requirements above, such candidacy will be evaluated and a recommendation with respect to such candidate will be delivered to the board of directors.

Policy Governing Security Holder Communications with the Board of Directors

The board of directors provides to every security holder the ability to communicate with the board of directors as a whole and with individual directors on the board of directors through an established process for security holder communication as follows:

For communications directed to the board of directors as a whole, security holders may send such communications to the attention of the chairman of the board of directors by U.S. mail (including courier or expedited delivery service) to:

iRobot Corporation
8 Crosby Drive
Bedford, Massachusetts 01730
Attn: Chairman of the Board, c/o Secretary

For security holder communications directed to an individual director in his or her capacity as a member of the board of directors, security holders may send such communications to the attention of the individual director by U.S. mail (including courier or expedited delivery service) to:

iRobot Corporation
8 Crosby Drive
Bedford, Massachusetts 01730
Attn: [Name of the director], c/o Secretary

We will forward any such security holder communication to the chairman of the board, as a representative of the board of directors, or to the director to whom the communication is addressed, on a periodic basis. We will forward such communications by certified U.S. mail to an address specified by each director and the chairman of the board for such purposes or by secure electronic transmission.

Policy Governing Director Attendance at Annual Meetings of Stockholders

Our policy is to schedule a regular meeting of the board of directors on the same date as our annual meeting of stockholders and, accordingly, directors are encouraged to be present at our stockholder meetings. The nine (9) board members, who were directors at the time of the annual meeting of stockholders held in 2009, attended the meeting.

Board of Directors Evaluation Program

The board of directors performs annual self-evaluations of its composition and performance, including evaluations of its standing committees and individual evaluations for each director. In addition, each of the standing committees of the board of directors conducts its own self-evaluation, which is reported to the board of directors. The board of directors retains the authority to engage its own advisors and consultants.

For more corporate governance information, you are invited to access the Corporate Governance section of our website available at <http://www.irobot.com>.

Code of Ethics

We have adopted a “code of ethics,” as defined by regulations promulgated under the Securities Act of 1933, as amended, and the Exchange Act, that applies to all of our directors and employees worldwide, including our principal executive officer, principal financial officer, principal accounting officer and controller, or persons performing similar functions. A current copy of the Code of Business Conduct and Ethics is available at the Corporate Governance section of our website at <http://www.irobot.com>. A copy of the Code of Business Conduct and Ethics may also be obtained, free of charge, from us upon a request directed to: iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730, Attention: Investor Relations. We intend to disclose any amendment to or waiver of a provision of the Code of Business Conduct and Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, by posting such information on its website available at <http://www.irobot.com> and/or in our public filings with the Securities and Exchange Commission.

For more corporate governance information, you are invited to access the Corporate Governance section of our website available at <http://www.irobot.com>.

THE BOARD OF DIRECTORS AND ITS COMMITTEES

Board of Directors

The board of directors met six (6) times during the fiscal year ended January 2, 2010, and took action by unanimous written consent two (2) times. Each of the directors attended at least 75% of the aggregate of the total number of meetings of the board of directors and the total number of meetings of all committees of the board of directors on which they served during fiscal 2009. The board of directors has the following standing committees: audit committee; compensation committee; and nominating and corporate governance committee, each of which operates pursuant to a separate charter that has been approved by the board of directors. A current copy of each charter is available at <http://www.irobot.com>. Each committee reviews the appropriateness

of its charter at least annually. Each committee retains the authority to engage its own advisors and consultants. The composition and responsibilities of each committee are summarized below.

Audit Committee

The audit committee of the board of directors currently consists of Messrs. Geisser, McNamee and Meekin, each of whom is an independent director within the meaning of the director independence standards of NASDAQ and the Securities and Exchange Commission, or SEC, including Rule 10A-3(b)(1) under the Securities Exchange Act of 1934, as amended, or the Exchange Act. Mr. Geisser serves as the chairman of the audit committee. In addition, the board of directors has determined that Mr. Geisser is financially literate and that Mr. Geisser qualifies as an “audit committee financial expert” under the rules of the SEC. Stockholders should understand that this designation is a disclosure requirement of the SEC related to Mr. Geisser’s experience and understanding with respect to certain accounting and auditing matters. The designation does not impose upon Mr. Geisser any duties, obligations or liability that are greater than are generally imposed on him as a member of the audit committee and the board of directors, and his designation as an audit committee financial expert pursuant to this SEC requirement does not affect the duties, obligations or liability of any other member of the audit committee or the board of directors.

The audit committee met eight (8) times during the fiscal year ended January 2, 2010. The audit committee operates under a written charter adopted by the board of directors, a current copy of which is available at the Corporate Governance section of our website at <http://www.irobot.com>.

As described more fully in its charter, the audit committee oversees our accounting and financial reporting processes, internal controls and audit functions. In fulfilling its role, the audit committee responsibilities include:

- appointing, approving the compensation of, and assessing the independence of our independent registered public accounting firm;
- pre-approving auditing and permissible non-audit services, and the terms of such services, to be provided by our independent registered public accounting firm;
- reviewing and discussing with management and the independent registered public accounting firm our annual and quarterly financial statements and related disclosures;
- coordinating the oversight and reviewing the adequacy of our internal control over financial reporting;
- establishing policies and procedures for the receipt and retention of accounting related complaints and concerns; and
- preparing the audit committee report required by SEC rules to be included in our annual proxy statement.

Compensation Committee

The compensation committee of the board of directors currently consists of Mr. McNamee, Gen. Kern, and Dr. Chwang, each of whom is an independent director within the meaning of the director independence standards of NASDAQ, a non-employee director as defined in Rule 16b-3 of the Exchange Act, and an outside director pursuant to Rule 162(m) of the Internal Revenue Code. Mr. McNamee serves as the chairman of the compensation committee. The compensation committee’s responsibilities include:

- annually reviewing and approving corporate goals and objectives relevant to compensation of our chief executive officer;
- evaluating the performance of our chief executive officer in light of such corporate goals and objectives and determining the compensation of our chief executive officer;
- overseeing and administering our compensation, welfare, benefit and pension plans and similar plans; and
- reviewing and making recommendations to the board with respect to director compensation.

The compensation committee met eight (8) times and took action by unanimous written consent eight (8) times during the fiscal year ended January 2, 2010. The compensation committee operates under a written

charter adopted by the board of directors, a current copy of which is available at the Corporate Governance section of our website at <http://www.irobot.com>.

Nominating and Corporate Governance Committee

The nominating and corporate governance committee of the board of directors currently consists of Dr. Gansler, and Messrs. Meekin and McNamee, each of whom is an independent director within the meaning of the director independence standards of NASDAQ and applicable rules of the SEC. Dr. Gansler serves as the chairman of the nominating and corporate governance committee. The nominating and corporate governance committee's responsibilities include:

- developing and recommending to the board criteria for board and committee membership;
- establishing procedures for identifying and evaluating director candidates including nominees recommended by stockholders;
- identifying individuals qualified to become board members;
- recommending to the board the persons to be nominated for election as directors and to each of the board's committees;
- developing and recommending to the board a code of business conduct and ethics and a set of corporate governance guidelines; and
- overseeing the evaluation of the board and management.

The nominating and corporate governance committee met three (3) times during the fiscal year ended January 2, 2010. The nominating and corporate governance committee operates under a written charter adopted by the board of directors, a current copy of which is available at the Corporate Governance section of our website at <http://www.irobot.com>.

Compensation Committee Interlocks and Insider Participation

During 2009, Dr. Chwang, Gen. Kern and Mr. McNamee served as members of the compensation committee. No member of the compensation committee was an employee or former employee of us or any of our subsidiaries, or had any relationship with us requiring disclosure herein.

During the last year, no executive officer of the Company served as: (i) a member of the compensation committee (or other committee of the board of directors performing equivalent functions or, in the absence of any such committee, the entire board of directors) of another entity, one of whose executive officers served on our compensation committee; (ii) a director of another entity, one of whose executive officers served on our compensation committee; or (iii) a member of the compensation committee (or other committee of the board of directors performing equivalent functions or, in the absence of any such committee, the entire board of directors) of another entity, one of whose executive officers served as a director of the Company.

REPORT OF THE AUDIT COMMITTEE OF THE BOARD OF DIRECTORS

No portion of this audit committee report shall be deemed to be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, through any general statement incorporating by reference in its entirety the proxy statement in which this report appears, except to the extent that the Company specifically incorporates this report or a portion of it by reference. In addition, this report shall not be deemed filed under either the Securities Act or the Exchange Act.

This report is submitted by the audit committee of the board of directors. The audit committee currently consists of Messrs. Geisser (chairman), McNamee and Meekin. None of the members of the audit committee is an officer or employee of the Company, and the board of directors has determined that each member of the audit committee meets the independence requirements promulgated by NASDAQ and the Securities and Exchange Commission, including Rule 10A-3(b)(1) under the Exchange Act. Mr. Geisser is an “audit committee financial expert” as is currently defined under SEC rules. The audit committee operates under a written charter adopted by the board of directors.

The audit committee oversees the Company’s accounting and financial reporting processes on behalf of the board of directors. The Company’s management has the primary responsibility for the financial statements, for maintaining effective internal control over financial reporting, and for assessing the effectiveness of internal control over financial reporting. In fulfilling its oversight responsibilities, the audit committee has reviewed and discussed with management the Company’s consolidated financial statements for the fiscal year ended January 2, 2010, including a discussion of, among other things, the quality of the Company’s accounting principles, the reasonableness of significant estimates and judgments, and the clarity of disclosures in the Company’s financial statements.

The audit committee also reviewed with PricewaterhouseCoopers LLP, the Company’s independent registered public accounting firm, the results of their audit and discussed matters required to be discussed by the Statement on Auditing Standards No. 61 (*Communication with Audit Committees*), as currently in effect, other standards of the Public Company Accounting Oversight Board, rules of the Securities and Exchange Commission and other applicable regulations. The audit committee has reviewed permitted services under rules of the Securities and Exchange Commission as currently in effect and discussed with PricewaterhouseCoopers LLP their independence from management and the Company, including the matters in the written disclosures and the letter from the independent registered public accounting firm required by applicable requirements of the Public Company Accounting Oversight Board regarding the independent accountant’s communications with the audit committee concerning independence, and has considered and discussed the compatibility of non-audit services provided by PricewaterhouseCoopers LLP with that firm’s independence.

The audit committee meets with the independent registered public accounting firm, with and without management present, to discuss the results of their examinations; their evaluations of the Company’s internal control, including internal control over financial reporting; and the overall quality of the Company’s financial reporting.

Based on its review of the financial statements and the aforementioned discussions, the audit committee concluded that it would be reasonable to recommend, and on that basis did recommend, to the board of directors that the audited financial statements be included in the Company’s Annual Report on Form 10-K for the year ended January 2, 2010.

The audit committee has also evaluated the performance of PricewaterhouseCoopers LLP, including, among other things, the amount of fees paid to PricewaterhouseCoopers LLP for audit and non-audit services in 2009. Information about PricewaterhouseCoopers LLP’s fees for 2009 is discussed below in this proxy statement under “Proposal 2 — *Ratification of Appointment of Independent Registered Public Accountants.*” Based on its evaluation, the audit committee has recommended that the Company retain PricewaterhouseCoopers LLP to serve as the Company’s independent registered public accounting firm for the 2010 fiscal year.

Respectfully submitted by the Audit Committee,

Andrea Geisser (chairman)
George C. McNamee
Peter T. Meekin

REPORT OF THE COMPENSATION COMMITTEE OF THE BOARD OF DIRECTORS

No portion of this compensation committee report shall be deemed to be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, through any general statement incorporating by reference in its entirety the proxy statement in which this report appears, except to the extent that the Company specifically incorporates this report or a portion of it by reference. In addition, this report shall not be deemed filed under either the Securities Act or the Exchange Act.

The compensation committee of the board of directors, which is comprised solely of independent directors within the meaning of applicable rules of The NASDAQ Stock Market, Inc., outside directors within the meaning of Section 162 of the Internal Revenue Code of 1986, as amended, and non-employee directors within the meaning of Rule 16b-3 under the Securities Exchange Act of 1934, as amended, is responsible for developing executive compensation policies and advising the board of directors with respect to such policies and administering the Company's cash incentive, stock option and employee stock purchase plans. The compensation committee sets performance goals and objectives for the chief executive officer and the other executive officers, evaluates their performance with respect to those goals and sets their compensation based upon the evaluation of their performance. In evaluating executive officer pay, the compensation committee may retain the services of a compensation consultant and consider recommendations from the chief executive officer with respect to goals and compensation of the other executive officers. The compensation committee assesses the information it receives in accordance with its business judgment. The compensation committee also periodically reviews director compensation. All decisions with respect to executive and director compensation are approved by the compensation committee and recommended to the full board for ratification. George McNamee, Paul Kern and Ronald Chwang are the current members of the compensation committee.

The compensation committee has reviewed and discussed the Compensation Discussion and Analysis (the "CD&A") for the year ended January 2, 2010 with management. In reliance on the reviews and discussions referred to above, the compensation committee recommended to the board of directors, and the board of directors has approved, that the CD&A be included in the proxy statement for the year ended January 2, 2010 for filing with the SEC.

Respectfully submitted by the
Compensation Committee,

George C. McNamee (chairman)
Paul J. Kern
Ronald Chwang

COMPENSATION AND OTHER INFORMATION CONCERNING DIRECTORS AND OFFICERS

Compensation Discussion & Analysis

Overview

Our compensation philosophy is based on a desire to balance retention of executive talent with pay for performance-based incentive compensation, which is designed to reward our named executive officers for continued service and our sustained financial and operating performance. We believe that the compensation of our named executive officers should align our executives' interests with those of our stockholders and focus executive behavior on the achievement of both near-term corporate targets as well as long-term business objectives and strategies. It is the responsibility of the compensation committee of our board of directors to administer our compensation practices to ensure that they are competitive and include incentives that are designed to appropriately drive our performance, including our Adjusted EBITDA, revenue, operating cash flow and working capital. Our compensation committee reviews and approves all of our executive compensation policies, including executive officer salaries, cash incentives and equity awards.

Objectives of Our Compensation Programs

Our compensation programs for our executive officers are designed to achieve the following objectives:

- to provide competitive compensation that attracts, motivates and retains the best talent and the highest caliber executives to serve us and help us to achieve our strategic objectives;
- to align management's interest with our success;
- to connect a significant portion of the total potential cash compensation paid to executives to our annual financial performance or the division, region or segment of our business for which an executive has management responsibility by basing cash incentive compensation on corresponding financial targets;
- to align management's interest with the interests of stockholders through long-term equity incentives; and
- to provide management with performance goals that are directly linked to our annual plan for growth and profit.

We believe that the compensation of our named executive officers should reflect their success as a management team, rather than as individuals, in attaining key operating objectives, such as improved Adjusted EBITDA performance and operating cash flow, as well as longer-term strategic objectives, such as invention, product development and evaluation of potential acquisitions. We define Adjusted EBITDA as earnings before interest, taxes, depreciation and amortization, merger and acquisition expenses, and non-cash stock compensation.

We also believe that their compensation should not be based on the short-term performance of our stock, whether favorable or unfavorable, but rather that the price of our stock will, in the long-term, reflect our operating performance, and ultimately, the management of the company by our named executive officers. We seek to have the long-term performance of our stock reflected in executive compensation through our stock option and other equity incentive programs.

Methodologies for Establishing Executive Compensation

The compensation committee, which is comprised entirely of independent directors, reviews the compensation packages for our named executive officers, including an analysis of all elements of compensation separately and in the aggregate. In determining the appropriate compensation levels for our chief executive officer, the compensation committee meets outside the presence of all our executive officers. With respect to the compensation levels of all other named executive officers, the compensation committee meets outside the presence of all executive officers except our chief executive officer. Our chief executive officer annually reviews each other named executive officer's performance with the compensation committee.

With the input of our human resources department and compensation consultants, the chief executive officer makes recommendations to the compensation committee regarding base salary levels, target incentive

awards, performance goals for incentive compensation and equity awards for named executive officers, other than Mr. Angle. In conjunction with the annual performance review of each named executive officer in January of each year, the compensation committee carefully considers the recommendations of the chief executive officer when setting base salary, bonus payments under the prior year's incentive compensation plan, target amounts and performance goals for the current year's incentive compensation plan, and any other special adjustments or bonuses. In addition, the compensation committee similarly determines equity incentive awards, if any, for each named executive officer.

Our compensation plans are developed, in part, by utilizing publicly available compensation data and subscription compensation survey data for national and regional companies in the technology, defense, household durables and robotics industries. We believe that the practices of this group of companies provide us with appropriate compensation benchmarks, because these companies have similar organizational structures and tend to compete with us to attract executives and other employees. For benchmarking executive compensation, we typically review the compensation data we have collected from the complete group of companies, as well as a subset of the data from companies with revenues, numbers of employees and market capitalizations similar to our profile.

With respect to 2009 base salary, cash incentive compensation, and long-term incentives, we reviewed companies with similar-sized revenues of greater than \$160 million and less than \$630 million and market capitalizations of between \$70 million to \$670 million, in particular: Aerovironment, Inc., Applied Signal Technology, Argon ST, Inc., Audiovox Corp., Axsys Technologies, Inc., Ducommun Incorporated, Dynamics Research Corp., Gencorp Inc., ICx Technologies, Inc., LoJack Corporation, Netezza Corp., Raven Industries Inc., Tivo, Inc. and Universal Electronics Inc.

The compensation committee engaged a consultant, DolmatConnell & Partners, to help evaluate peer companies for cash compensation and long-term incentive purposes, analyze applicable compensation data and determine appropriate compensation levels for our named executive officers. In addition, we engaged a consultant, Wilson Group, to assist in development of our performance incentive plan, which is the cash incentive program that applies to all employees at the manager level and above. Certain elements of the performance incentive plan, including identification of a limited number of key financial metrics as elements of incentive cash, balancing corporate and divisional priorities, are consistent between compensation policies adopted for executive officers and other managerial employees.

We will annually reassess the relevance of our peer group and make changes when judged appropriate. We believe that the use of benchmarking is an important factor in remaining competitive with our peers and furthering our objective of attracting, motivating and retaining highly qualified personnel.

The compensation committee reviews all components of compensation for named executive officers. In accordance with its charter, the compensation committee also, among other responsibilities, administers our incentive compensation plan, and reviews and makes recommendations to management on company-wide compensation programs and practices. In setting compensation levels for our executive officers in fiscal 2009, the compensation committee considered many factors in addition to benchmarking described above, including, but not limited to:

- the scope and strategic impact of the executive officer's responsibilities,
- our past business and segment performance and future expectations,
- our long-term goals and strategies,
- the performance and experience of each individual,
- past salary levels of each individual and of the named executive officers as a group,
- relative levels of pay among the executive officers,
- the amount of base salary in the context of the executive officer's total compensation and other benefits,
- for each named executive officer, other than the chief executive officer, the evaluations and recommendations of the chief executive officer, and

- the competitiveness of the compensation packages relative to the selected benchmarks as highlighted by the independent compensation consultant's analysis.

The compensation committee determines compensation for our chief executive officer using the same factors it uses for other executive officers, placing relatively less emphasis on base salary, and instead, creating greater performance-based opportunities through long-term equity and short term cash incentive compensation, which we believe better aligns our chief executive officer's interests with our success and the interests of our stockholders. In assessing the compensation paid to our chief executive officer, the compensation committee relies on both information from our selected benchmarks and its judgment with respect to the factors described above.

Elements of Compensation

Our executive compensation program consists of three primary elements: salary, long-term equity interest, primarily in the form of stock options and awards of restricted stock units, and an annual cash incentive program based on both corporate and, if appropriate, divisional performance. All of our executive officers also are eligible for certain benefits offered to employees generally, including life, health, disability and dental insurance, as well as to participate in our 401(k) plan. We also enter into executive agreements with our executive officers that provide for certain severance benefits upon termination of employment, including a termination following a change in control of the Company.

Annual Cash Compensation

Base Salary. The compensation committee believes that our executive officers, including our chief executive officer, are paid salaries in line with their qualifications, experience and responsibilities. Salaries are structured so that they are comparable with salaries paid by the peer companies reviewed by the compensation committee in the technology and robotics industry. We target base salaries for each of our executives at the market median (50th percentile) in the technology and robotics industry and also take into consideration many additional factors (described below) that we believe enable us to attract, motivate and retain our leadership team in an extremely competitive environment. Salaries are reviewed generally on an annual basis.

The compensation committee reviewed the base salaries for each of our executive officers, taking into account an assessment of the individual's responsibilities, experience, individual performance and contribution to our performance, and also generally take into account the competitive environment for attracting and retaining executives consistent with our business needs. With respect to each of our executive officers, other than Mr. Angle, Mr. Angle provided a detailed evaluation and recommendation related to base salary adjustments, if any. However, due to the macroeconomic conditions, which included a great amount of uncertainty during the compensation committee's evaluation of executive compensation during the first fiscal quarter of 2009, it was determined that executive officers would not receive salary adjustments during 2009, a policy applied across-the-board to our workforce.

In light of the considerations discussed above, for fiscal year 2009, the annual base salaries of our chief executive officer, chief financial officer, president, home robots, president, government & industrial robots, and senior vice president and general counsel were \$378,769, \$350,012, \$325,000, \$325,000 and \$284,875, respectively, which are the same levels of base salaries paid to our executive officers in 2008, except for the president, home robots, who started on March 30, 2009. We believe that the base salaries paid to our executive officers during our fiscal year 2009 helped to achieve our executive compensation objectives, compare favorably to our peer group and, in light of our overall compensation program, are within our target of providing total compensation at the market median.

Cash Incentive Compensation

The compensation committee believes that some portion of overall cash compensation for executive officers should be "at risk," *i.e.*, contingent upon successful achievement of significant financial and business objectives and implementation of our business strategy. For our named executive officers, including our chief executive officer, the granting of cash incentive payments is based on an evaluation of achievement against predetermined financial and operational metrics in accordance with our Senior Executive Incentive Compensation Plan that was adopted by the compensation committee. Target cash incentives for named executive

officers are generally targeted at the 50th percentile of similar cash incentives provided to officers in peer companies reviewed by the compensation committee in the technology and robotics industries. The amount of cash incentives paid to the named executive officers, however, is subject to the discretion of the compensation committee based on its assessment of our performance in general or the achievement of specific goals.

For fiscal 2009, the target bonus awards under our Senior Executive Incentive Compensation Plan for each of our named executive officers, as a percentage of base salary earned during the fiscal year, were 85% for our chief executive officer, 65% for our chief financial officer, 65% for the president of our home robots division, 65% for the president of our government & industrial robots division, and 50% for our senior vice president and general counsel. These target payout amounts were set at levels the compensation committee determined were appropriate in order to achieve our objective of retaining those executives who perform at or above the levels necessary for us to achieve our business plan, which, among other things, involved growing our company in a cost-effective way.

We designed our Senior Executive Incentive Compensation Plan to focus our executives on achieving key corporate financial objectives and strategic milestones, and to reward substantial achievement of these company financial objectives and strategic milestones. The 2009 performance goals and cash incentive payment criteria established by the compensation committee under our Senior Executive Incentive Compensation Plan were designed to require significant effort and operational success on the part of us and our named executive officers for achievement.

While the Senior Executive Incentive Compensation Plan is designed to provide cash incentive payments based upon objectively determinable formulas that tie cash incentive payments to specific financial goals and strategic milestones, the compensation committee retains the discretion to adjust cash incentive payments under the Senior Executive Incentive Compensation Plan based upon additional factors.

For each executive officer, 100% of his target cash incentive compensation in 2009 was tied to key financial and operating performance measures.

For our chief executive officer, chief financial officer, and senior vice president and general counsel, 75% of the target cash incentive was tied to achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$26.4 million, with the ability to earn 125% of the target cash incentive for this element by achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$29.0 million. In addition, 25% of the target cash incentive was tied to achieving operating cash flow of \$9.1 million, with the ability to earn 125% of the target cash incentive for this element by achieving an operating cash flow of \$10.0 million.

For our president, home robots, his target cash incentive had four elements:

- 25% of his target cash incentive was tied to achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$26.4 million, with the ability to earn 125% of the target cash incentive for this element by achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$29.0 million.
- 15% of his target cash incentive was tied to achieving divisional revenue of \$164.3 million, the ability to earn 125% of the target cash incentive for this element by achieving divisional revenue of \$180.8 million.
- 50% of his target cash incentive was tied to achieving a target level of divisional contribution margin with the ability to earn 125% of the target cash incentive for this element by achieving a divisional contribution margin in excess of this target. Generally, contribution margin was calculated as division specific revenue less cost of sales and operating expenses, excluding cash incentive and stock based compensation. Since the specific contribution margin targets are highly confidential, we do not publicly disclose these targets. Disclosing the contribution margin targets would provide competitors and other third parties with insights into our internal confidential strategic and planning processes, sales and marketing budgets and other confidential matters, which might allow our competitors to predict certain business strategies, thereby causing competitive harm. The contribution margin targets were positioned to be aggressive, but achievable.

- 10% of his target cash incentive was tied to achieving divisional inventory levels at fiscal year end at or below \$30.0 million, with the ability to earn 125% of the target cash incentive for this element by achieving divisional inventory levels at fiscal year end at or below \$27.0 million.

For our president, government & industrial robots, his target cash incentive had four elements:

- 25% of his target cash incentive was tied to achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$26.4 million, with the ability to earn 125% of the target cash incentive for this element by achieving an Adjusted EBITDA, excluding cash incentive compensation expense, of \$29.0 million.
- 15% of his target cash incentive was tied to achieving divisional revenue of \$140.8 million, with a threshold payment of 50% of the target cash incentive for this element by achieving divisional revenue of \$112.7 million.
- 50% of his target cash incentive was tied to achieving a target level of divisional contribution margin with the ability to earn 125% of the target cash incentive for this element by achieving a divisional contribution margin in excess of this target. Generally, contribution margin was calculated as division specific revenue less cost of sales and operating expenses, excluding cash incentive and stock based compensation. Since the specific contribution margin targets are highly confidential, we do not publicly disclose these targets. Disclosing the contribution margin targets would provide competitors and other third parties with insights into our internal confidential strategic and planning processes, sales and marketing budgets and other confidential matters, which might allow our competitors to predict certain business strategies, thereby causing competitive harm. The contribution margin targets were positioned to be aggressive, but achievable.
- 10% of his target cash incentive was tied to achieving divisional inventory levels at fiscal year end at or below \$8.0 million, with the ability to earn 125% of the target cash incentive for this element by achieving divisional inventory levels at fiscal year end at or below \$7.2 million.

The compensation committee chose this mix of financial targets for cash incentive compensation because it believed that executive officers should be focused on a small set of critical financial and operating metrics that reflect both corporate and divisional strategies in a manner that reinforce the executive's role and impact. Moreover, the compensation committee believed that the metrics should encourage collaboration and accountability within divisions and with corporate functions.

Identical financial measures, although with differing weightings, were used for the company's performance incentive plan, which is the cash incentive program that applies to all employees at the manager level and above.

The following table shows the company's achievement against the various metrics used for calculating the cash incentive compensation for our executive officers:

<u>Metric</u>	<u>Minimum (50% earned)</u>	<u>Target (100%)</u>	<u>Maximum (125%)</u>	<u>Performance</u>	<u>Percentage Earned</u>
	<u>in millions</u>				
Adjusted EBITDA, excluding cash incentive compensation expense	\$ 21.1	\$ 26.4	\$ 29.0	\$ 29.4	125%
Operating Cash Flow	\$ 7.3	\$ 9.1	\$ 10.0	\$ 40.6	125%
Home Robots Divisional Revenue	\$131.5	\$164.3	\$180.8	\$165.9	102%
Government & Industrial Divisional Revenue	\$112.7	\$140.8	\$154.9	\$132.7	86%
Home Robots Divisional Contribution Margin	*	*	*	*	113%
Government & Industrial Divisional Contribution Margin	*	*	*	*	85%
Home Robots Divisional Inventory	\$ 36.0	\$ 30.0	\$ 27.0	\$ 23.7	125%
Government & Industrial Divisional Inventory	\$ 9.6	\$ 8.0	\$ 7.2	\$ 8.7	78%

Based on these elements, the chief executive officer, chief financial officer, president, home robots, president, government & industrial robots, and senior vice president and general counsel achieved 125%, 125%, 115%, 94% and 125%, respectively, of each executive's total target cash incentive compensation amount. In addition, based upon its discretion under the Senior Executive Incentive Compensation Plan, the compensation committee determined that a bonus of \$45,546 should be paid to the president, government & industrial robots based upon a number of factors including completion of significant business and operational milestones and the comparable cash incentive compensation of companies within our peer group.

Based on these factors, the compensation committee determined that our chief executive officer, chief financial officer, president, home robots, president, government & industrial robots, and senior vice president and general counsel should receive \$410,180, \$289,854, \$187,011, \$247,940, and \$181,475, respectively, which corresponds to 125%, 125%, 115%, 115% and 125%, respectively, of each executive's total target cash incentive compensation amount.

Because Mr. Beck joined us in March 2009, after a portion of the year had passed, and in accordance with the terms of his employment offer letter, the compensation committee provided that his cash incentive compensation would be paid at a minimum of 100% of his threshold bonus amount. However, because under the Senior Executive Incentive Compensation Plan Mr. Beck earned 115% of his target amount, his cash incentive compensation was set at the higher level.

Long-Term Incentives

Executive officers (and other employees) are eligible to receive restricted stock, stock option grants, deferred stock awards and other stock awards that are intended to promote success by aligning employee financial interests with long-term shareholder value. These stock-based incentives are based on various factors primarily relating to the responsibilities of the individual officer or employee, their past performance, anticipated future contributions and prior option grants. In general, our compensation committee bases its decisions to grant stock-based incentives on recommendations of management and the compensation committee's analysis of peer group compensation information, with the intention of keeping the executives' overall compensation, including the equity component of that compensation, at a competitive level with the comparator companies reviewed by the compensation committee in the technology and robotics industries. Our compensation committee also considers the number of shares of common stock outstanding, the number of shares of common stock authorized for issuance under its equity compensation plans, the number of options and shares held by the executive officer for whom an award is being considered and the other elements of the officer's compensation, as well as our compensation objectives and policies described above. During fiscal year 2009, stock options and deferred stock awards were granted to our named executive officers. As with the determination of base salaries and short term incentive payments, the compensation committee exercises subjective judgment and discretion in view of the above criteria.

Other Compensation

We also have various broad-based employee benefit plans. Our executive officers participate in these plans on the same terms as other eligible employees, subject to any legal limits on the amounts that may be contributed or paid to executive officers under these plans. We offer a 401(k) plan, which allows our employees to invest in a wide array of funds on a pre-tax basis. We do not provide pension arrangements or post-retirement health coverage for our named executive officers or other employees. We also maintain insurance and other benefit plans for our employees. Executive officers receive higher life, accidental death and dismemberment and disability insurance benefits than other employees. In addition, one executive officer receives amounts allocable to use of our corporate apartment. We also enter into executive agreements with our executive officers providing for certain severance benefits which may be triggered as a result of the termination of such officer's employment under certain circumstances. We offer no perquisites, other than the use of our corporate apartment, that are not otherwise available to all of our employees.

Executive Agreements

We have entered into executive agreements with each of our executive officers. The executive agreements provide for severance payments equal to 50% of such officer's annual base salary, as well as certain continued

health benefits, in the event that we terminate his or her employment other than for cause. In addition, these executive agreements provide that if we experience a change in control and the employment of such officer is terminated without cause, or if such officer terminates his or her employment for certain reasons including a substantial reduction in salary or bonus or geographic movement during the one-year period following the change in control, then all unvested stock options held by such officer become fully-vested and immediately exercisable and such officer is entitled to severance payments equal to 200% of his or her annual base salary and 200% of such officer's annual bonus, as well as certain continued health benefits.

It is the belief of the compensation committee that these provisions are consistent with executive severance arrangements that are customary for public companies at our stage of development and were necessary in order to hire and/or retain the executives. From time to time, the Company's executive officers enter into stock restriction agreements upon the exercise of their option grants.

We have also entered into indemnification agreements with each of our executive officers and directors, providing for indemnification against expenses and liabilities reasonably incurred in connection with their service for us on our behalf.

On December 30, 2002, we entered into an independent contractor agreement with Dr. Rodney Brooks. On August 8, 2008, we amended and restated this independent contractor agreement. Our independent contractor agreement with Dr. Brooks shall continue until terminated by either party upon 60 days' written notice.

Tax Deductibility of Executive Compensation

In general, under Section 162(m) of the Internal Revenue Code of 1986, as amended, or the Code, we cannot deduct, for federal income tax purposes, compensation in excess of \$1,000,000 paid to certain executive officers. This deduction limitation does not apply, however, to compensation that constitutes "qualified performance-based compensation" within the meaning of Section 162(m) of the Code and the regulations promulgated thereunder. We have considered the limitations on deductions imposed by Section 162(m) of the Code and it is our present intention, for so long as it is consistent with our overall compensation objective, to structure executive compensation to minimize application of the deduction limitations of Section 162(m) of the Code.

Risk Oversight of Compensation Programs

The compensation committee believes that our compensation program for executive officers is not structured to be reasonably likely to present a material adverse risk to us based on the following factors:

- Our compensation program for executive officers is designed to provide a balanced mix of cash and equity, annual and longer-term incentives, and performance targets.
- The base salary portion of compensation is designed to provide a steady income regardless of our stock price performance so that executives do not feel pressured to focus primarily on stock price performance to the detriment of other important business metrics.
- Our stock option grants, restricted stock awards and restricted stock unit grants generally vest over four years and are only valuable if our stock price increases over time.
- Maximum payout levels for the cash incentive compensation are capped.

Executive Compensation Summary

The following table sets forth summary compensation information for our chief executive officer, chief financial officer and the three other most highly compensated executive officers:

SUMMARY COMPENSATION TABLE

Name and Principal Position	Year	Salary \$(1)	Bonus (\$)	Stock Awards \$(2)	Option Awards \$(2)	Non-Equity Incentive Plan Compensation (\$)	All Other Compensation \$(3)(4)	Total (\$)
Colin M. Angle	2009	386,053	—	274,999	270,790	410,180	7,350	1,349,372
Chairman, Chief Executive Officer and Director	2008	372,288	105,714	279,219	217,935	—	6,900	982,056
	2007	324,820	—	85,488	173,870	0	6,750	590,928
John J. Leahy	2009	356,743	—	58,332	57,441	289,854	7,350	769,720
Executive Vice President, Chief Financial Officer and Treasurer	2008	195,199	122,504	843,000	1,384,540	—	5,654	2,550,897
Jeffrey A. Beck(5)	2009	250,000	—	343,000	695,745	187,011	6,750	1,482,506
President and General Manager Home Robots								
Joseph W. Dyer(6)	2009	331,250	45,546	116,998	115,209	202,394	7,350	818,747
President and General Manager Government & Industrial	2008	322,074	153,380	196,995	117,349	—	6,900	796,698
	2007	300,240	—	53,428	108,668	0	6,750	469,086
Glen D. Weinstein	2009	290,353	—	87,998	86,652	181,475	7,350	653,828
Senior Vice President, General Counsel and Secretary	2008	282,704	88,954	125,906	117,349	—	6,900	621,813

- (1) Represents salary earned in the fiscal years presented which covered 53 weeks, 52 weeks and 52 weeks respectively, for fiscal years 2009, 2008 and 2007.
- (2) Represents the aggregate grant date fair value for stock and option awards granted in the fiscal years ended January 2, 2010, December 27, 2008 and December 29, 2007, as appropriate, in accordance with FASB ASC Topic 718. See the information appearing in note 2 to our consolidated financial statements included as part of our Annual Report on Form 10-K for the fiscal year ended January 2, 2010 for certain assumptions made in the valuation of stock and option awards.
- (3) Excludes medical, group life insurance and certain other benefits received by the named executive officers that are available generally to all of our salaried employees and certain prerequisites and other personal benefits received by the named executive officers which do not exceed \$10,000.
- (4) Represents 401(k) matching contributions.
- (5) Mr. Beck joined as President and General Manager Home Robots on March 30, 2009.
- (6) Mr. Dyer received a bonus payment of \$45,546 based upon a number of factors including completion of significant business and operational milestones and the comparable cash incentive compensation of companies within our peer group.

Grants of Plan-Based Awards in 2009

The following table sets forth, for each of the named executive officers, information about grants of plan-based awards during fiscal year 2009.

GRANTS OF PLAN-BASED AWARDS — 2009

Name	Grant Date	Estimated Possible Payouts Under Non-Equity Incentive Plan Awards(1)			All Other Stock Awards: Number of Shares of Stock or Units (#)(2)	All Other Option Awards: Number of Securities Underlying Options (#)(2)	Exercise or Base Price of Option Awards (\$/Sh)	Grant Date Fair Value of Stock and Option Awards (\$)
		Threshold (\$)	Target (\$)	Maximum (\$)				
Colin M. Angle	—	—	328,145	656,290	—	—	—	
	2/20/2009	—	—	—	35,438	—	7.76	274,999
	2/20/2009	—	—	—	—	73,829	7.76	270,790
John J. Leahy	—	—	231,883	463,766	—	—	—	
	2/20/2009	—	—	—	7,517	—	7.76	58,332
	2/20/2009	—	—	—	—	15,661	7.76	57,441
Jeffrey A. Beck	—	—	162,500	325,000	—	—	—	
	4/24/2009	—	—	—	35,000	—	9.80	343,000
	4/24/2009	—	—	—	—	150,000	9.80	695,745
Joseph W. Dyer	—	—	215,313	430,626	—	—	—	
	2/20/2009	—	—	—	15,077	—	7.76	116,998
	2/20/2009	—	—	—	—	31,411	7.76	115,209
Glen D. Weinstein	—	—	145,177	290,354	—	—	—	
	2/20/2009	—	—	—	11,340	—	7.76	87,998
	2/20/2009	—	—	—	—	23,625	7.76	86,652

(1) This reflects the threshold, target and maximum incentive cash payout levels established under our Senior Executive Incentive Compensation Plan.

(2) All stock awards and option awards were made pursuant to our 2005 Stock Option and Incentive Plan (the “2005 Plan”).

Discussion of Summary Compensation and Grants of Plan-Based Awards Tables

The compensation paid to the named executive officers includes salary, cash incentive compensation and equity incentive compensation. In addition, each named executive officer is eligible to receive contributions to his or her 401(k) plan under our matching contribution program.

We have entered into executive agreements with each of our executive officers. The executive agreements provide for severance payments equal to 50% of such officer’s annual base salary, as well as certain continued health benefits, in the event that we terminate his or her employment other than for cause. In addition, these executive agreements provide that if we experience a change in control and the employment of such officer is terminated without cause, or if such officer terminates his or her employment for certain reasons including a substantial reduction in salary or bonus or geographic movement during the one-year period following the change in control, then all unvested stock options held by such officer become fully-vested and immediately exercisable and such officer is entitled to severance payments equal to 200% of his or her annual base salary and 200% of such officer’s annual bonus, as well as certain continued health benefits.

In 2009, salary was approximately 28.6%, 46.3%, 16.9%, 40.5% and 44.4% of the total compensation for Messrs. Angle, Leahy, Beck, Dyer and Weinstein, respectively. In 2008, salary was approximately 37.9%, 7.7%, 40.4%, and 45.5% of the total compensation for Messrs. Angle, Leahy, Dyer and Weinstein, respectively. In 2007, salary was approximately 55.0% and 64.0% of the total compensation for Messrs. Angle and Dyer, respectively.

Our named executive officers are eligible to participate in our Senior Executive Incentive Compensation Plan, which provides for cash incentive payments based on an evaluation of the achievement against predetermined measurable financial and operational metrics in accordance with the terms of the plan as adopted by the compensation committee. Our named executive officers are also eligible to receive restricted stock, stock option grants and other stock awards. These stock-based incentives are based on various factors primarily relating to the responsibilities of the individual officer, their past performance, anticipated future contributions and prior option grants. See additional information regarding the cash incentive and equity compensation of our named executive officers under “Compensation Discussion & Analysis — Elements of Compensation” above.

Outstanding Equity Awards at Fiscal Year End

The following table sets forth, for each of the named executive officers, information about unexercised option awards and unvested restricted stock awards that were held as of January 2, 2010.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR END — 2009

Name	Grant Date	Option Awards				Stock Awards	
		Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Option Exercise Price (\$)	Option Expiration Date	Number of Shares or Units of Stock That Have Not Vested (#)	Market Value of Shares or Units of Stock That Have Not Vested (\$)

	2/20/09	—	23,625(6)	7.76	2/20/2016	11,340(6)	199,584

- (1) Mr. Angle’s stock option grants vest over a four-year period, at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter. Mr. Angle’s restricted stock awards vest over a four-year period, at a rate of twenty-five percent (25%) on each anniversary of the grant.
- (2) Mr. Leahy’s stock option grant vests over a four-year period, at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter. Mr. Leahy’s restricted stock award vests over a four-year period, at a rate of twenty-five percent (25%) on each anniversary of the grant.
- (3) Mr. Beck’s stock option grant vests over a four-year period, at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter. Mr. Beck’s restricted stock award vests over a four-year period, at a rate of twenty-five percent (25%) on each anniversary of the grant.

- (4) Mr. Dyer's stock option grants vest over a four-year period, at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter. Mr. Dyer's restricted stock awards vest over a four-year period, at a rate of twenty-five percent (25%) on each anniversary of the grant.
- (5) Mr. Weinstein's stock option grants vest over a five-year period, at a rate of twenty percent (20%) on the first anniversary of the grant, and annually thereafter.
- (6) Mr. Weinstein's stock option grants vest over a four-year period, at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter. Mr. Weinstein's restricted stock awards vest over a four-year period, at a rate of twenty-five percent (25%) on each anniversary of the grant.

Option Exercises and Stock Vested

The following table sets forth, for each of the named executive officers, information with respect to the exercise of stock options and the vesting of restricted stock awards during the year ended January 2, 2010, as well as the year-end value of exercised options and vested restricted stock.

OPTION EXERCISES AND STOCK VESTED — 2009

Name	Option Awards		Stock Awards	
	Shares Acquired on Exercise(#)	Value Realized on Exercise\$(1)	Number of Shares Acquired on Vesting(#)	Value Realized on Vesting(\$)
Colin M. Angle	—	—	5,408	49,030
John J. Leahy	—	—	15,000	201,900
Jeffrey A. Beck	—	—	—	—
Joseph W. Dyer	3,334	(600)	3,708	33,300
Glen D. Weinstein	21,702	315,427	3,338	32,918

- (1) Amounts disclosed in this column were calculated based on the difference between the fair market value of our common stock on the date of exercise and the exercise price of the options in accordance with regulations promulgated under the Exchange Act.

Potential Benefits Upon Termination or Change in Control

Severance and Change in Control Arrangements in General

The executive agreements described under "Transactions with Our Executive Officers and Directors" below provide that, upon termination of the executive officer's employment without cause, the executive officer is entitled to severance payments equal to 50% of the executive officer's base salary, continued health plan premium payments for up to six months, and any unpaid compensation, benefits or unused vacation accrued. The executive agreements also provide that, upon an involuntary termination upon a change in control, or upon a resignation for good reason upon a change in control, the executive officer is entitled to 200% of the executive officer's base salary, 200% of the executive officer's target cash incentive compensation or other performance, profit-sharing or any other similar arrangement, continued health plan premium payments for up to two years, full vesting of all unvested stock, stock options, awards and rights, and any unpaid compensation, benefits or unused vacation accrued.

Cash Payments and/or Acceleration of Vesting Following Certain Termination Events

Assuming the employment of our named executive officers was terminated involuntarily and without cause (not in connection with a change in control) on January 2, 2010, our named executive officers would be entitled to cash payments in the amounts set forth opposite their names in the below tables, subject to any deferrals required under Section 409A of the Internal Revenue Code of 1986, as amended.

Name	Base Salary (\$)	Continuation of Health Plan Premium Payments (\$)	Accrued Vacation Pay (\$)	Total (\$)
Colin M. Angle	189,384	9,633	8,395	207,412
John J. Leahy	175,006	9,633	1,417	186,056
Jeffrey A. Beck	162,500	8,922	0	171,422
Joseph W. Dyer	162,500	275	25,000	187,775
Glen D. Weinstein	142,437	8,922	19,928	171,287

Assuming the employment of our named executive officers was terminated involuntarily and without cause, or such officers resigned with good reason, during the one-year period following a change in control on January 2, 2010, our named executive officers would be entitled to cash payments in the amounts set forth opposite their names in the below table, subject to any deferrals required under Section 409A of the Internal Revenue Code of 1986, as amended, and acceleration of vesting as set forth in the below table. The total amount payable to each executive officer is subject to reduction in certain circumstances if the amount would cause the executive officer to incur an excise tax under Section 4999 of the Internal Revenue Code of 1986, as amended. The following table provides the market value (that is, the value based upon our stock price on January 2, 2010, minus the exercise price) of stock options that would become exercisable or vested as a result of these acceleration events as of January 2, 2010.

Name	Base Salary (\$)	Bonus (\$)	Continuation of Health Plan Premium Payments (\$)	Accrued Vacation Pay (\$)	Market Value of Stock Options (\$)	Market Value of Restricted Stock (\$)	Total (\$)
Colin M. Angle	757,538	643,907	38,532	8,395	745,910	885,790	3,080,072
John J. Leahy	700,024	455,016	38,532	1,417	597,854	924,299	2,717,142
Jeffrey A. Beck	650,000	422,500	35,688	—	1,170,000	616,000	2,894,188
Joseph W. Dyer	650,000	422,500	1,100	25,000	320,634	446,477	1,865,711
Glen D. Weinstein	569,750	284,875	35,688	19,928	414,621	349,395	1,674,257

Director Compensation

In connection with our efforts to attract and retain highly-qualified individuals to serve on our board of directors, we maintain a cash and equity compensation policy for our non-employee members of our board of directors. In 2009, each of our non-employee members of our board of directors was entitled to the following cash compensation:

Annual retainer for Board membership	\$30,000
Audit Committee	
Annual retainer for committee membership	\$10,000
Additional retainer for committee chair	\$10,000
Compensation Committee	
Annual retainer for committee membership	\$ 7,500
Additional retainer for committee chair	\$ 7,500
Nominating and Corporate Governance Committee	
Annual retainer for committee membership	\$ 5,000
Additional retainer for committee chair	\$ 5,000

Pursuant to our Non-employee Directors' Deferred Compensation Program, each non-employee director may elect in advance to defer the receipt of these cash fees. During the deferral period, the cash fees will be deemed invested in stock units. The deferred compensation will be settled in shares of our common stock upon the termination of service of the director or such other time as may have been previously elected by the director. The shares will be issued from our 2005 Plan.

In 2009, each of our non-employee members of our board of directors was entitled to the following equity compensation under our 2005 Plan:

- Upon initial election to the board of directors, a non-employee director will receive a one-time option to purchase 40,000 shares of our common stock, which will vest over a four-year period at a rate of twenty-five percent (25%) on the first anniversary of the grant, and quarterly thereafter.
- On the date of each annual meeting of stockholders, each non-employee director will receive a stock option award to purchase 10,000 shares of our common stock, which will vest on the date of the first anniversary of such grant.

All stock options will be granted at the fair market value on the date of the award. All of our directors are reimbursed for reasonable out-of-pocket expenses incurred in attending meetings of the board of directors.

The following table provides compensation information for the fiscal year ended January 2, 2010 for each non-employee member of our board of directors. No member of our board of directors employed by us receives separate compensation for services rendered as a member of our board of directors.

DIRECTOR COMPENSATION TABLE — 2009

<u>Name</u>	<u>Fees Earned or Paid in Cash (\$)</u>	<u>Option Awards \$(2)(3)</u>	<u>Total (\$)</u>
Rodney A. Brooks, Ph.D.	30,000	59,794	89,794
Ronald Chwang, Ph.D.	37,500	59,794	97,294
Jacques S. Gansler, Ph.D.	40,000	59,794	99,794
Andrea Geisser	50,000(1)	59,794	109,794
Helen Greiner	7,500	59,794	67,294
Paul J. Kern, Gen. U.S. Army (ret.)	37,500(1)	59,794	97,294
George C. McNamee	60,000	59,794	119,794
Peter T. Meekin	45,000(1)	59,794	104,794

- (1) Messrs. Geisser, Kern and Meekin deferred all of their 2009 cash compensation pursuant to our Non-employee Directors' Deferred Compensation Program under which they received phantom stock in lieu of cash.
- (2) Represents the grant date fair value of stock option awards granted in the fiscal year ended January 2, 2010 in accordance with FASB ASC Topic 718. See the information appearing in note 2 to our consolidated financial statements included as part of our Annual Report on Form 10-K for the fiscal year ended January 2, 2010 for certain assumptions made in the valuation of stock option awards.

- (3) The non-employee members of our board of directors who held such position on January 2, 2010 held the following aggregate number of unexercised options as of such date:

<u>Name</u>	<u>Number of Securities Underlying Unexercised Options</u>
Rodney A. Brooks, Ph.D.	19,333
Ronald Chwang, Ph.D.	80,000
Jacques S. Gansler, Ph.D.	90,000
Andrea Geisser	80,000
Helen Greiner	31,333
Paul J. Kern, Gen. U.S. Army (ret.)	80,000
George C. McNamee	80,000
Peter T. Meekin	80,000

- (4) The following table presents the fair value of each grant of stock options in 2009 to the non-employee members of our board of directors, computed in accordance with FASB ASC Topic 718:

<u>Name</u>	<u>Grant Date</u>	<u>Number of Securities Underlying Options</u>	<u>Exercise Price of Option Awards (\$)</u>	<u>Grant Date Fair Value of Options (\$)</u>
Rodney A. Brooks, Ph.D.	6/26/2009	10,000	13.46	59,794
Ronald Chwang, Ph.D.	6/26/2009	10,000	13.46	59,794
Jacques S. Gansler, Ph.D.	6/26/2009	10,000	13.46	59,794
Andrea Geisser	6/26/2009	10,000	13.46	59,794
Helen Greiner	6/26/2009	10,000	13.46	59,794
Paul J. Kern, Gen. U.S. Army (ret.) ...	6/26/2009	10,000	13.46	59,794
George C. McNamee	6/26/2009	10,000	13.46	59,794
Peter T. Meekin	6/26/2009	10,000	13.46	59,794

Transactions with Related Persons

Other than compensation agreements and other arrangements which are described in “Compensation Discussion & Analysis,” in 2009, there has not been, and there is not currently proposed, any transaction or series of similar transactions to which we were or will be a party in which the amount involved exceeded or will exceed \$120,000 and in which any director, executive officer, holder of five percent or more of any class of our capital stock or any member of their immediate family had or will have a direct or indirect material interest.

Our board of directors has adopted a written related party transaction approval policy, which sets forth our policies and procedures for the review, approval or ratification of any transaction required to be reported in our filings with the Securities and Exchange Commission. Our policy with regard to related party transactions is that all related party transactions are to be reviewed by our general counsel, who will determine whether the contemplated transaction or arrangement requires the approval of the board of directors, the nominating and corporate governance committee, both or neither.

PROPOSAL 2

RATIFICATION OF APPOINTMENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTANTS

The audit committee of the board of directors has retained the firm of PricewaterhouseCoopers LLP, independent registered public accountants, to serve as independent registered public accountants for our 2010 fiscal year. PricewaterhouseCoopers LLP has served as our independent registered public accounting firm since 1999. The audit committee reviewed and discussed its selection of, and the performance of, PricewaterhouseCoopers LLP for our 2009 fiscal year. As a matter of good corporate governance, the audit committee has determined to submit its selection to stockholders for ratification. If the selection of independent registered public accountants is ratified, the audit committee in its discretion may select a different independent registered public accounting firm at any time during the year if it determines that such a change would be in the best interests of us and our stockholders.

The audit committee of the board of directors has implemented procedures under our audit committee pre-approval policy for audit and non-audit services, or the Pre-Approval Policy, to ensure that all audit and permitted non-audit services to be provided to us have been pre-approved by the audit committee. Specifically, the audit committee pre-approves the use of PricewaterhouseCoopers LLP for specified audit and non-audit services, within approved monetary limits. If a proposed service has not been pre-approved pursuant to the Pre-Approval Policy, then it must be specifically pre-approved by the audit committee before it may be provided by PricewaterhouseCoopers LLP. Any pre-approved services exceeding the pre-approved monetary limits require specific approval by the audit committee. For additional information concerning the audit committee and its activities with PricewaterhouseCoopers LLP, see “The Board of Directors and Its Committees” and “Report of the Audit Committee of the Board of Directors.”

Representatives of PricewaterhouseCoopers LLP attended all of the meetings of the audit committee in 2009. We expect that a representative of PricewaterhouseCoopers LLP will attend the annual meeting, and the representative will have an opportunity to make a statement if he or she so desires. The representative will also be available to respond to appropriate questions from stockholders.

PricewaterhouseCoopers LLP Fees

The following table shows the aggregate fees for professional services rendered by PricewaterhouseCoopers LLP to us during the fiscal years ended January 2, 2010 and December 27, 2008.

	<u>2009</u>	<u>2008</u>
Audit Fees	\$710,848	\$718,702
Audit-Related Fees	31,653	30,924
Tax Fees	—	25,000
All Other Fees	<u>3,075</u>	<u>3,075</u>
Total	<u>\$745,576</u>	<u>\$777,701</u>

Audit Fees

Audit Fees for both years consist of fees for professional services associated with the annual consolidated financial statements audit, statutory filings, consents and assistance with and review of documents filed with the Securities and Exchange Commission.

Audit-Related Fees

Consists of fees for accounting consultations and other services that were reasonably related to the performance of audits or reviews of our financial statements and were not reported above under “Audit Fees.”

Tax Fees

Tax Fees consist of fees for professional services rendered for assistance with federal, state, local and international tax compliance.

All Other Fees

All other fees include licenses to technical accounting research software.

The audit committee has determined that the provision of services described above to us by PricewaterhouseCoopers LLP is compatible with maintaining their independence.

Recommendation of the Board

THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS THAT YOU VOTE “FOR” THE RATIFICATION OF PRICEWATERHOUSECOOPERS LLP AS iROBOT’S INDEPENDENT REGISTERED PUBLIC ACCOUNTANTS FOR 2010.

OTHER MATTERS

The board of directors knows of no other matters to be brought before the annual meeting. If any other matters are properly brought before the annual meeting, the persons appointed in the accompanying proxy intend to vote the shares represented thereby in accordance with their best judgment on such matters, under applicable laws.

STOCKHOLDER PROPOSALS

Proposals of stockholders intended for inclusion in the proxy statement to be furnished to all stockholders entitled to vote at our 2011 annual meeting of stockholders, pursuant to Rule 14a-8 promulgated under the Exchange Act by the Securities and Exchange Commission, must be received at the Company’s principal executive offices not later than December 13, 2010. Stockholders who wish to make a proposal at the 2011 annual meeting — other than one that will be included in the Company’s proxy statement — must notify us between January 27, 2011 and February 26, 2011. If a stockholder who wishes to present a proposal fails to notify us by February 26, 2011 and such proposal is brought before the 2011 annual meeting, then under the Securities and Exchange Commission’s proxy rules, the proxies solicited by management with respect to the 2011 annual meeting will confer discretionary voting authority with respect to the stockholder’s proposal on the persons selected by management to vote the proxies. If a stockholder makes a timely notification, the proxies may still exercise discretionary voting authority under circumstances consistent with the Securities and Exchange Commission’s proxy rules. In order to curtail controversy as to the date on which we received a proposal, it is suggested that proponents submit their proposals by Certified Mail, Return Receipt Requested, to iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730, Attention: Secretary.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Exchange Act requires our directors, executive officers and persons who own more than ten percent of a registered class of our equity securities to file reports of ownership and changes in ownership with the Securities and Exchange Commission. Such persons are required by regulations of the Securities and Exchange Commission to furnish us with copies of all such filings. Based solely on our review of copies of such filings we believe that all such persons complied on a timely basis with all Section 16(a) filing requirements during the fiscal year ended January 2, 2010, except that Mr. Dyer did not timely file a Form 4 with respect to one transaction.

EXPENSES AND SOLICITATION

The cost of solicitation of proxies will be borne by us and, in addition to soliciting stockholders by mail through its regular employees, we may request banks, brokers and other custodians, nominees and fiduciaries to solicit their customers who have our stock registered in the names of a nominee and, if so, will reimburse such banks, brokers and other custodians, nominees and fiduciaries for their reasonable out-of-pocket costs. Solicitation by our officers and employees may also be made of some stockholders in person or by mail, telephone, e-mail or telegraph following the original solicitation. We may also retain an independent proxy solicitation firm to assist in the solicitation of proxies.

HOUSEHOLDING OF PROXY MATERIALS

Our 2009 Annual Report, including audited financial statements for the fiscal year ended January 2, 2010, is being mailed to you along with this proxy statement. In order to reduce printing and postage costs, Broadridge Financial Solutions has undertaken an effort to deliver only one Annual Report and one proxy statement to multiple shareholders sharing an address. This delivery method, called “householding,” is not being used, however, if Broadridge has received contrary instructions from one or more of the stockholders sharing an address. If your household has received only one Annual Report and one proxy statement, we will deliver promptly a separate copy of the Annual Report and the proxy statement to any shareholder who sends a written request to iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730, Attention: Secretary, Office of the General Counsel, (781) 430-3000. If your household is receiving multiple copies of our Annual Report or proxy statement and you wish to request delivery of a single copy, you may send a written request to iRobot Corporation, 8 Crosby Drive, Bedford, Massachusetts 01730, Attention: Secretary, Office of the General Counsel.

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:
Common Stock, \$0.01 par value per share The NASDAQ Stock Market LLC

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:
None

Indicate by check-mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check-mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Common Stock held by nonaffiliates of the registrant was approximately \$268,894,000 based on the last reported sale of the Common Stock on the NASDAQ Global Market on June 27, 2009.

As of February 16, 2010, there were 25,095,696 shares of the registrant's Common Stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

The registrant intends to file a definitive Proxy Statement pursuant to Regulation 14A within 120 days of the end of the fiscal year ended January 2, 2010. Portions of such Proxy Statement are incorporated by reference into Part III of this Form 10-K.

ITEM 1. BUSINESS

This Annual Report on Form 10-K contains forward-looking statements. All statements other than statements of historical facts contained in this Annual Report on Form 10-K, including statements regarding our future results of operations and financial position, business strategy, plans and objectives of management for future operations, and plans for product development and manufacturing are forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. We discuss certain of these risks in greater detail in the “Risk Factors” section and elsewhere in this Annual Report on Form 10-K. Also, these forward-looking statements speak only as of the date of this Annual Report on Form 10-K, and we have no plans to update our forward-looking statements to reflect events or circumstances occurring after the date of this Annual Report. We caution readers not to place undue reliance upon any such forward-looking statements.

iRobot, Roomba, Scooba, iRobot Dirt Dog, PackBot, Warrior, Looj, Verro, Create, Negotiator, Virtual Wall, Home Base, and AWARE are trademarks of iRobot Corporation.

Overview

iRobot Corporation (“iRobot” or the “Company” or “we”) designs and builds robots that make a difference. For over 20 years, we have developed proprietary technology incorporating advanced concepts in navigation, mobility, manipulation and artificial intelligence to build industry-leading robots. Our Roomba floor vacuuming robots, Scooba floor washing robots and Looj gutter cleaning robot perform time-consuming domestic chores. Our PackBot and Small Unmanned Ground Vehicle (SUGV) tactical ground military robots perform battlefield reconnaissance and bomb disposal. Our Negotiator ground robot performs multi-purpose tasks for local police and first responders. Our Seaglider unmanned underwater robot performs long endurance oceanic missions. We sell our robots to consumers through a variety of distribution channels, including chain stores and other national retailers, and through our on-line store, and to the U.S. military and other government agencies worldwide. We maintain certifications for AS9100 and Capability Maturity Model Integration, or CMMI. These certifications enable us to service our military products and services.

Since our founding by roboticists who performed research at the Massachusetts Institute of Technology, we have accumulated expertise in all the disciplines necessary to design and build durable, high-performance and cost-effective robots through the close integration of software, electronics and hardware. Our core technologies serve as reusable building blocks that we adapt and expand to develop next generation and new products, reducing the time, cost and risk of product development. For example, our proprietary AWARE Robot Intelligence Systems enable the behavioral control of robots. Our AWARE systems allow our Roomba floor vacuuming robot to clean an entire floor while avoiding obstacles and not falling down stairs, and also allow our PackBot robots to accomplish complex missions such as waypoint navigation and real-time obstacle avoidance.

Our significant expertise in robot design and engineering, combined with our management team’s experience in military and consumer markets, positions us to capitalize on the growth we expect in the market for robot-based products. We believe that the sophisticated technologies in our existing consumer and military applications are adaptable to a broad array of markets such as law enforcement, homeland security, commercial cleaning, elder care, oil services, home automation, landscaping, agriculture, construction and other vertical markets. Our strategy is to maintain a leadership position in pursuing new applications for robot solutions by leveraging our ability to innovate, to bring new products to market quickly, to reduce costs through design and outsourcing capabilities, and to commercialize the results of our research, much of which is government funded.

Over the past seven years, we sold approximately 5 million of our home care robots. We also sold during that time more than 2,900 of our PackBot tactical military robots, most of which have been sold to the U.S. military and deployed on missions in Afghanistan and Iraq.

Strategy

Our objective is to expand our leadership globally in designing and building practical robots and in developing robotic technology. Key elements of our strategy to achieve this objective include:

Continued Growth through Profitability, Operational Excellence and Customer Focus. Our ability to continue to grow, to delight our customers with innovative products, and to deliver value and exceed end-user expectations depends on our ability to improve profitability and operating processes and to provide best-in-class service. We intend to consistently improve our profitability through disciplined allocation of resources and by reducing costs of materials, adjusting prices, optimizing our product and channel mix, focusing on our discretionary spending and reducing our seasonality. We will continue to focus on improving the scalability and efficiency of our supply chain process and our purchase and supply practices, and on mitigating single source supply exposure. We will identify, develop and enhance product features and functionality, as well as our ability to efficiently service customers who have problems, by enhancing customer outreach and surveys, and investigating and aggressively focusing on product reliability.

Deliver Great Products and Continue to Expand Our Existing Markets. Our success is built upon our ability to deliver a broad range of innovative products rapidly at economical price points and to offer a broad product line to our customers. Within the consumer market, we offer floor cleaning products for various surfaces at multiple price points, a gutter cleaning product, a pool cleaning product, and a number of product accessories. We are extending our military robot offerings. In addition, we intend to leverage our increasing installed base to expand our revenues from recurring sales of consumables, services and support.

Innovate to Penetrate New Markets. Our goal is to design and build innovative robots that make a difference. We develop robots with functionalities that are adaptable for use in a broad range of applications. We intend to increase the penetration of our products in existing markets, expand existing products into new markets, and develop and launch new products into current and adjacent markets. For example, we are fostering the emerging UUV (unmanned underwater vehicle) market and continuing to grow our international presence by entering new markets. In addition, during fiscal 2009, we announced the establishment of a newly-created healthcare business unit, committed to exploring the potential of robotics as an assistive technology to promote wellness and enhance quality of life for seniors.

Leverage Research and Development Across Different Products and Markets. We leverage our research and development across all of our products and markets. For example, we use technological expertise developed through government-funded research and development projects across our other product development efforts. Similarly, expertise developed while designing consumer products is used in designing products for government and industrial applications. This strategy helps us in avoiding the need to start each robot project from scratch, developing robots in a cost-effective manner and minimizing time to market.

Continue to Strengthen Our Brand. We intend to continue to enhance our brand image and corporate identity. The iRobot brand is designed to communicate innovation, reliability, safety and value. Our robots' performance and uniqueness have enabled us to obtain strong word-of-mouth and extensive press coverage leading to increasing brand awareness, brand personality and momentum. We intend to continue to invest in our marketing programs to strengthen our brand recognition and reinforce our message of innovation, reliability, safety and value.

Complement Core Competencies with Strategic Alliances. Our core competencies are the design, development and marketing of robots. We rely on strategic alliances to provide complementary competencies that we integrate into our products and to enhance market access. For example, our alliance with The Boeing Company allows us to accelerate product development of the SUGV, through extensive use of Commercial Off The Shelf (COTS) components, and our alliance with Advanced Scientific Concepts, Inc. allows us to integrate LADAR technology for navigation and mapping applications into our autonomous vehicles. We outsource other non-core activities, such as manufacturing and back-office functions, which helps us focus our resources on our core competencies.

Develop a Community of Third-Party Developers Around Our Platforms. We have developed products around which communities of third-party developers can create related accessories, software and complementary products. We intend to foster this community by making our products into extensible platforms with open interfaces

designed to carry payloads. For example, our robots are designed to allow third-party designers to add sensors and other functionalities, such as acoustic sniper detection and explosives detection.

Develop Employees and Culture of Accountability. We intend to continue to hire only top talent and to invest in our employees through training and on-the-job experience. We will develop innovative people plans to become the employer of choice. In addition, we will foster a culture among our employees of accountability, trust and mutual reliance by closely tracking important employee milestones and metrics, expanding rewards and recognition for top performers, and better leveraging our stock grant program.

Technology

We are focused on behavior-based, artificially-intelligent systems developed to meet customer requirements in multiple market segments. In contrast to robotic manufacturing equipment or entertainment systems that are designed to repeat actions in specific, known environments, our systems are designed to complete missions in complex and dynamic real-world environments.

Our robots rely on the interplay among behavior-based artificially intelligent systems, real-world dynamic sensors, user-friendly interfaces and tightly-integrated, electromechanical designs to accomplish their missions efficiently.

AWARE Robot Intelligence Systems. Our proprietary AWARE Robot Intelligence Systems are code bases that enable the behavioral control of robots. Moreover, the AWARE systems include modules that control behaviors, sensor fusion, power management and communication. Our AWARE systems allow our Roomba floor vacuuming robot and our Scooba floor washing robot to clean an entire floor while avoiding obstacles and not falling down stairs, and also allow our PackBot robots and our other unmanned ground vehicles to accomplish complex missions such as waypoint navigation and real-time obstacle avoidance.

Real-World, Dynamic Sensing. The degree of intelligence that our robots display is directly attributable to their ability to perceive — or sense — the world around them. Using specialized hardware and signal processing, we have developed sensors that fit particular cost-performance criteria. In other cases, we use off-the-shelf sensing hardware, such as laser scanners, cameras and optical sensors. We have the exclusive right from Advanced Scientifics Concepts, Inc. to use its LADAR technology for unmanned ground vehicles and robots. This LADAR technology is a next-generation solid state sensor that marks an important advancement for navigation and mapping applications for all autonomous vehicles. Additionally, we have an agreement with ICx Technologies to integrate its explosive-detecting technology into our PackBot platform. The payload, called the ICx Fido for iRobot PackBot 500, can detect explosive vapors emanating from Improvised Explosive Devices (IEDs).

User-Friendly Interfaces. Our robots require that users interact and instruct our robots in intuitive ways without extensive end-user set-up, installation, training or instruction. For example, our Roomba robots require only one button to have the robot begin its mission, determine the size of the room to be cleaned, thoroughly clean the room and return to its re-charger, right out of the box without any pre-programmed knowledge of the user's home. Similarly, our PackBot robots use intuitive controllers, interoperable between systems, that integrate high-level supervisory commands from the user into the behaviors of the robot.

Tightly-Integrated, Electromechanical Design. Our products rely on our ability to build inherently robust integrated electrical and mechanical components into required form factors. For instance, the computer that powers the PackBot tactical military robot must withstand being dropped from more than ten feet onto concrete. Such high performance specifications require tight design integration.

Combining these four components, we have created proprietary, reusable building blocks of robotics capabilities, including mobility platforms, manipulators, navigation and control algorithms and user interfaces. Our technology building blocks typically allow us to take a known platform and modify it for a new mission instead of starting from scratch for each application. We believe this allows us to design and develop innovative robots cost-effectively.

Products and Development Contracts

We design and build robots for the consumer and government and industrial markets. With two decades of leadership in the robot industry, we remain committed to establishing robot and software platforms for invention and discovery, building key partnerships to develop mission-critical payloads and creating robots that improve the standards of safety and living worldwide.

Consumer Products

We sell various products that are designed for use in and around the home. Our current consumer products are focused on both indoor and outdoor cleaning applications. We believe our consumer products provide value to our customers by delivering better cleaning solutions at an affordable price and by freeing people from repetitive home cleaning tasks.

Home Floor Cleaning Robots

Over the past seven years, we sold approximately 5 million home floor cleaning robots. We currently offer multiple Roomba floor vacuuming robots and Scooba floor washing robots with varying price points and performance characteristics.

Our Roomba robot's compact disc shape allows it to clean under beds and other furniture, resulting in cleaner floors since the Roomba can access more of the floor than standard upright vacuum cleaners. Roomba is programmed to keep operating until the floor is clean. In addition, Roomba eliminates the need to push a vacuum — it cleans automatically upon the push of a button.

We offer multiple Roomba models with various features. The suggested retail price for the Roomba robots range from \$129 to \$549 depending on model, configuration and accessory packages.

Scooba, our second major consumer product line, is the first floor washing robot available for home use. Our Scooba robot utilizes the expertise gained from years of Roomba development to create a robot that scrubs your floor.

Our Scooba robot's innovative cleaning process allows the robot to simultaneously sweep, wash, scrub and dry hard floors, all at the touch of a button. Unlike a conventional mop that spreads dirty water on the floor, Scooba will apply only fresh water and cleaning solution to the floor from a clean tank. Scooba will clean dirt and grime, and is safe for use on all sealed, hard floor surfaces, including wood and tile.

Scooba has the ability to navigate around the room using a light-touch bumper and is smart enough to avoid carpets. Scooba features an advanced diagnostic system to provide the user with important maintenance feedback and improve user experience and product life. The suggested retail price for the Scooba robots range from \$299 to \$499.

Pool Cleaning Robots

Our Verro Pool Cleaning Robot is used to clean a standard size pool in about an hour while removing debris as small as two microns from the pool floor, walls and stairs. Verro is brought to market under the iRobot brand through a relationship with the Aqua Products Group companies including AquaJet LLC and Aquatron, Inc., which developed the pool cleaning robots. There are three models available with a range of suggested retail prices from \$399 to \$999.

Gutter Cleaning Robot

Our Looj Gutter Cleaning Robot was designed to simplify the difficult and dangerous job of gutter cleaning. The Looj cleans an entire stretch of gutter, reducing the number of times a ladder must be repositioned and climbed during gutter cleaning. The 2.25-inch high Looj drives under gutter straps propelled by a three-stage auger that dislodges and sweeps out dirt, leaves and other debris that can cause costly water damage, overflows and ice dams.

The Looj also features a detachable handle that doubles as a wireless remote control, providing full control of the robot while cleaning. The suggested retail price for the Looj ranges from \$129 to \$169.

Programmable Robot

Our Create Programmable Robot is a fully assembled programmable robot. The Create has ten built-in demos and 32 sensors that allow users to experiment with robotics. An open cargo bay allows the user to add their grippers, wireless connections, computers or other hardware. The Create is based on the iRobot Roomba technology and is compatible with Roomba's re-chargeable batteries, remote control and other accessories. The suggested retail price for the Create ranges from \$129 to \$299.

Government and Industrial Products

In government and industrial product markets, we currently offer both ground and maritime unmanned vehicles. Our tactical ground robots include the combat-tested 510 PackBot line of small, unmanned ground robots, the 310 SUGV and 320 SUGV (Small Unmanned Ground Vehicle) multi-purpose ground robots and the low-cost 210 Negotiator for state and local police and first responders. The PackBot, SUGV, and Negotiator robot series make up a family of robots using many common platform components and offer our patented flipper technology that enables robots to easily climb stairs, navigate rubble, and penetrate inaccessible areas. As of December 2009, more than 2,900 PackBot robots have been delivered to military and civil defense forces worldwide. The robots are currently priced between approximately \$20,000 and \$195,000 per unit, depending on configuration and quantities ordered. Within our maritime business, the 1Ka Seaglider is used on long endurance oceanic missions. Our government and industrial robots are designed for high-performance, durability and ease of use while performing search, reconnaissance, mapping, bomb disposal and other dangerous missions.

In 2009, we continued to refine the PackBot product line, focusing on enhanced modularity and providing new capabilities to support new mission areas. Our unique Aware 2 software was successfully incorporated into the advanced 510 PackBot chassis and operator control unit. As a result, PackBot can now support multiple configurations and payloads with the same chassis and operator control unit, providing customers with a single robot capable of multiple missions. iRobot also introduced Configure-To-Order (CTO) procurement options for our commercial 510 PackBot, allowing customers to tailor the product to their specific mission needs. The combined benefits of the Aware 2 software and CTO procurement options establish the 510 PackBot as a truly modular multi-mission robotic platform. Additionally, we have expanded the PackBot line to include the following configurations targeted to state and local first responders, Army and Marine Corps Combat Engineers, and others.

iRobot 510 PackBot (Advanced EOD configuration): This advanced robot quickly adapts to different Improvised Explosive Devices (IEDs) and conventional ordnance, keeping Explosive Ordnance Disposal (EOD) personnel at safe stand-off distances.

iRobot 510 PackBot (FasTac configuration): This multi-mission robot was specifically designed for combat infantry forces and is currently used in combat by maneuver and maneuver support units for a variety of tasks.

iRobot 510 PackBot (First Responder configuration): This configuration provides a lower price alternative for state and local customers who may not need all the capability of the 510 PackBot with EOD capability.

iRobot 510 PackBot (Engineer configuration): This configuration is based on the First Responder configuration but also includes tools for the Engineer mission and a lift kit for heavier items. Additionally, the Engineer configuration supports an optional thermal camera.

We continue to sell and support the 500 PackBot line for certain government customers. These configurations include:

EOD configuration: This is a rugged, lightweight robot designed to conduct explosive ordnance disposal, hazardous materials, search-and-surveillance and other vital law enforcement tasks for bomb squads, SWAT teams, military units and other authorities.

ICx Fido Explosives Detection configuration: This explosives-sniffing robot screens packages and other potentially dangerous items while the operator remains at a safe distance.

We also offer more than 60 accessories for the PackBot that provide additional capabilities for the robot, expanding its range and scope of missions.

iRobot 210 Negotiator: In 2008, we introduced the 210 Negotiator in a Civil Response configuration. This rugged robot performs basic reconnaissance for public safety professionals, increasing situational awareness in high-risk scenarios, including bomb identification, hostage situations, search and rescue and other dangerous missions.

310 SUGV: In 2009, iRobot, in a strategic partnership with The Boeing Company, developed the 310 SUGV, a man-portable robot with dexterous manipulator and wearable controller for dismantled mobile operations. A smaller and lighter version of the combat-proven iRobot, PackBot, 310 SUGV enters areas that are inaccessible or too dangerous for people, providing state-of-the-art technology for infantry troops, combat engineers, mobile EOD technicians and other personnel. The 310 SUGV gathers situational awareness in dangerous conditions while keeping war fighters and public safety professionals out of harm's way.

iRobot IKa Seaglider: This Unmanned Underwater Vehicle (UUV) is used on long endurance oceanic missions to measure temperature, salinity, depth-averaged current and other data for oceanographers and military planners. Seagliders are typically deployed on autonomous missions for six months or more, replacing manned research vessels at considerable economic advantage.

Contract Research and Development Projects

We are involved in several contract development projects with various U.S. governmental agencies and departments. The durations of these projects range from a few months to several years. These projects are usually funded as either cost-plus, firm fixed price, or time and materials contracts. In a cost-plus contract, we are allowed to recover our actual costs plus a fixed fee. The total price of a cost-plus contract is based primarily on allowable costs incurred, but generally is subject to a maximum contract funding limit. Under a firm fixed price contract, we receive a fixed amount upon satisfying contractually defined deliverables. On our time and materials contracts, we recover a specific amount per hour worked based on a bill rate schedule, plus the cost of direct materials, subcontracts, and other non-labor costs, including an agreed-upon mark-up. A time and materials contract may provide for a not-to-exceed price ceiling, as well as the potential that we will absorb any cost overrun.

Government funding is provided to further the development of robot technologies with the expectation that if the projects result in the development of technically viable prototypes, the government will purchase multiple production units for future use in the field. The government funding that we receive allows us to accelerate the development of multiple technologies. While the U.S. government retains certain rights to military projects that it has funded, such as the right to use inventions and disclose technical data relating to those projects without constraining the recipient's use of that data, we retain ownership of patents and know-how and are generally free to develop other commercial products, both consumer and industrial, utilizing the technologies developed during these projects. The rights which the government retains, however, may allow it to provide use of patent rights and know-how to others, and some of the know-how might be used by these third parties for their own development of consumer and industrial products. The contract development projects that we are currently undertaking include, but are not limited to:

Small Unmanned Ground Vehicle (SUGV) and Centralized Controller Device. (CCD): 2009 was a year of significant change and transformation for the Future Combat Systems (FCS) Program which was originally intended to transform the U.S. Army to be strategically responsive and dominant at every point on the spectrum of operations, through real-time network centric communications and systems of a family of manned vehicles and unmanned platforms by the next decade. Following a Defense Acquisition Board meeting, The Department of Defense terminated the Manned Ground Vehicle portion of FCS, accelerated the unmanned systems portion of FCS, and provided guidance for a restructuring of FCS into a series of smaller programs. A new entity, the Program Executive Office for Integration, or PEO-I, was created to manage the remaining elements of FCS. The new name for our program under the PEO-I is called Brigade Combat Team Modernization or BCTM.

Our specific role in the BCTM program has been expanded and accelerated to design and develop the SUGV, (intended to be the “soldier’s robot”). The SUGV is a light-weight, man-portable robot that supports reconnaissance, remote sensing and urban warfare. Based on input from soldiers and commanders in the field, to focus on infantry first, the Army moved to more aggressively support current operations with modernized capabilities, including the SUGV. This acceleration of the SUGV development program has resulted in the inclusion of our product into the first implementation of capability currently referred to as Increment 1. The SUGV successfully completed a formal Limited User Test at Fort Bliss, Texas during the summer of 2009. This testing formed the basis of a positive decision to proceed with low rate initial production in December of 2009, which is expected to lead to fielding in 2011.

In addition, we have contracted with Lockheed Martin Corporation, the provider of the CCD for the BCTM program, to be a key supplier of design and development for the CCD’s controls and display through its estimated delivery in 2015. The CCD is a handheld device that will allow an individual soldier to remotely control or query the different systems within a brigade combat team — from a Class I Unmanned Aerial Vehicle to an unmanned ground system. Development of the common controller device is providing us the opportunity to build additional core competency in the design of user interface devices and human factors design.

Our involvement in the FCS program has enabled us to improve various management and control systems and enhance our engineering capabilities to achieve the Software Engineering Institute’s Configuration Maturity Model certification at Level III. The program has also funded the development of earned value measurement and advanced modeling and simulation.

iRobot 710 Warrior Warrior is an approximately 350 pound tracked vehicle, capable of transporting up to 150 pounds of payload, with a small footprint and extreme mobility. This effort is currently supported by the Joint Ground Robotics Enterprise and U.S. Army Tank Automotive Research, Development and Engineering Center (TARDEC). The Warrior design incorporates a number of features present in our other robots and demonstrates many of the advantages that modular payloads and common interfaces can bring to the military robotics community.

Daredevil Project: Daredevil is an applied research project funded by TARDEC in which we are investigating the development of an integrated sensor suite consisting of ultra wideband radar and high-resolution imaging sensors to provide improved sensing capabilities for Unmanned Ground Vehicles (UGVs), such as the iRobot PackBot.

UGV/UAV Collaboration, or MAGMA Project (Multi-Autonomous Ground Multi-Air unmanned vehicle collaboration): In coordination with researchers from Carnegie Mellon University, the goal of this U.S. Army Armament Research, Development and Engineering Center (ARDEC)-funded project is to develop a collaborative engagement tool for mission planning and task allocation for the command and control of multiple unmanned air and ground vehicles.

LANdroids Project: LANdroids is a Defense Advanced Research Projects Agency (DARPA) program that is developing robots that establish and maintain communications for war fighters in urban settings (in buildings, around buildings, etc.). We have a contract to develop pocket-sized autonomous robotic radio relay nodes that war fighters can toss on the ground as they deploy.

We are engaged in a number of other research programs funded by the DARPA, ARDEC, the Office of Naval Research (ONR), TARDEC, and several other U.S. governmental agencies.

Strategic Alliances

Strategic alliances are an important part of our product development and distribution strategies. We rely on strategic alliances to provide technology, complementary product offerings and increased and quicker access to markets. We seek to form relationships with organizations that can provide best-in-class technology or market advantages for establishing iRobot technology in new market segments.

Examples of our recent strategic alliances include:

The Boeing Company: We have entered into a strategic business agreement with The Boeing Company to develop and market a commercial version of the SUGV that is being developed under the Army's BCTM (formerly FCS) program. This collaboration will accelerate product development through extensive use of COTS components to produce a commercial version of the SUGV several years earlier than planned for use by our U.S. military, domestic and international customers. In addition to cooperative development, we are working with The Boeing Company to market the SUGV by leveraging The Boeing Company's extensive, domestic and international marketing network.

Advanced Scientific Concepts, Inc.: In 2007, we entered into agreement with Advanced Scientific Concepts, Inc. for exclusive rights to use its LADAR technology for unmanned ground vehicles in exchange for future commitments to purchase units. LADAR is a next-generation solid state sensor technology that marks an important advancement for navigation and mapping applications for all autonomous vehicles. LADAR sensors have no moving parts and can be compact, light and rugged, making them highly suitable for military and industrial uses. We will assist Advanced Scientific Concepts, Inc. in designing versions of its LADAR technology for use on our military robots. We expect to demonstrate the technology to key customers starting in early 2010, with delivery of a product expected by third quarter 2010.

Our strategy of working closely with third parties extends to the design of our products. By offering extensible platforms designed to carry payloads, we have designed and manufactured our products to leverage the work of those individuals and organizations that offer specialized technological expertise. The PackBot, the Roomba and the Scooba robots are designed with open interfaces that allow third-party developers to add payloads to our robots, improving their functionality.

Sales and Distribution Channels

We sell our products through distinct sales channels to the consumer and government and industrial markets.

Home Robots

We sell our consumer products through a network of national retailers. In 2009, this network consisted of more than 30 retailers which often sell either one or some combination of our products. Internationally, our products have been sold in over 40 countries, primarily through a network of in-country distributors who resell to retail stores in their respective countries. We also offer our products domestically and internationally through the on-line store on our website.

We have a philosophy to choose supportive channel partners, and we have grown, and intend to continue to selectively grow our retail network globally and by product line. Certain smaller domestic retail operations are supported by distributors to whom we sell product directly. The table below represents the breakdown of our home robots product revenue for the fiscal years ended January 2, 2010 and December 27, 2008.

<u>Channel</u>	<u>Fiscal Year Ended</u>	
	<u>January 2, 2010</u>	<u>December 27, 2008</u>
Domestic	30.8%	44.3%
International	53.8	38.0
Direct	<u>15.4</u>	<u>17.7</u>
Total	100.0%	100.0%

Although our retail network is our primary distribution channel for our consumer products, our direct-to-consumer offerings through our on-line store is our single largest outlet, representing 15.4% and 17.7% of total home robots division revenue for fiscal 2009 and 2008, respectively. We have established valuable databases and customer lists that allow us to target directly those consumers most likely to purchase a new robot or upgrade. Our increased focus on international sales activities has resulted in an increase of \$23.2 million in international home robots revenue for fiscal 2009 as compared to fiscal 2008. We believe we maintain a close connection with our

customers in each of our markets, which provides an enhanced position from which to improve our distribution and product offerings.

In the United States, we maintain an in-house sales and product management team. Outside of the United States and Canada, we sell our consumer products through distributors and our website supported by our international sales team. Our consumer distribution strategy is intended to increase our global penetration and presence while maintaining high quality standards to ensure end-user satisfaction.

Government and Industrial

We sell our government and industrial products directly to end users and indirectly through prime contractors and distributors. While the majority of government and industrial products have been sold to date to various operations within the U.S. federal government, we also sell to state and local as well as to international government organizations. Our military products are sold overseas in compliance with the International Traffic in Arms Regulations, or ITAR. We have sold our products to the governments of various countries in the past several years, including the United Kingdom, France, Germany, Sweden, Norway, Israel, Australia, Republic of Korea, Singapore and others.

Customers for our government products, and research and development contracts for the year ended January 2, 2010, include:

Robot Product Customers

- U.S. Army
- U.S. Marine Corp
- U.S. Army and Marine Corps Robotic Systems Joint Program Office
- U.S. Navy EOD Technical Division (Joint Services Explosive Ordnance Disposal Procurement Agency)
- U.S. Air Force
- Domestic Police and First Responders
- Foreign governments, including the United Kingdom, France, Germany, Sweden, Norway, Israel, Australia, Republic of Korea, Singapore

Research and Development Contracts

- U.S. Army Future Combat Systems (FCS/BCTM) Program
- U.S. Defense Advanced Research Projects Agency (DARPA)
- U.S. Space and Naval Warfare Systems Command (SPAWAR)
- U.S. Army Tank-Automotive and Armaments Command (TACOM)
- Technical Support Working Group (TSWG)
- U.S. Army Armament Research, Development and Engineering Center (ARDEC)
- National Center for Defense Robotics (NCDR)
- Office of Naval Research (ONR)

Our government products are sold by a team of sales specialists with significant experience in selling to government and defense agencies. All of these individuals have years of experience selling military products to government procurement offices, both in the United States and internationally. We maintain a direct sales and support presence in Europe.

Customer Service and Support

We also invest in our ongoing customer service and support. Consumer customer service representatives, the majority of whom are employees of outsourced service organizations, are extensively trained on the technical intricacies of our consumer products. Government and industrial customer representatives are usually former military personnel who are experienced in logistical and technical support requirements for military operations.

Marketing and Brand

We market our home robots in the United States to end-user customers directly through our sales and product management team. We also market our consumer products in the United States through our retail network of more than 30 retailers and internationally through in-country distributors and our international sales team. We market our government and industrial products directly through our team of government sales specialists to end users and

indirectly through prime contractors. We also market our product offerings through the iRobot website. Our marketing strategy is to increase our brand awareness and associate the iRobot brand with innovation, reliability, safety and value. Our sales and marketing expenses represented 13.7%, 15.2% and 18.0% of our total revenue in 2009, 2008 and 2007, respectively.

We believe that we have built a trusted, recognized brand by providing high-quality robots. We believe that customer word-of-mouth has been a significant driver of our brand's success to date, which can work very well for products that inspire a high level of user loyalty because users are likely to share their positive experiences. Our grass-roots marketing efforts focus on feeding this word-of-mouth momentum and we use public relations as well as advertising to promote our products.

Our innovative robots and public relations campaigns have generated extensive press coverage. In addition, iRobot and our consumer robots have won several awards and our inclusion among the first-tier partners on the FCS program has greatly enhanced our brand and awareness among government and industrial customers. Through these efforts, we have been able to build our brand, and we expect that our reputation for innovative products and customer support will continue to play a significant role in our growth and success.

We expect to invest in national advertising, consumer and industry trade shows, direct marketing and public relations to further build brand awareness. We believe that our significant in-house experience designing direct marketing campaigns and promotional materials, combined with our media-targeting expertise, gives us a significant competitive advantage.

Our website is also playing an increasing role in supporting brand awareness, addressing customer questions and serving as a showcase for our products. Our home robots and accessories are also sold domestically and internationally through our on-line store. In 2009, the on-line store was the single largest outlet of our home robots division products.

Manufacturing

Our core competencies are the design, development and marketing of robots. Our manufacturing strategy is to outsource non-core activities, such as the production of our robots, to third-party entities skilled in manufacturing. By relying on the outsourced manufacture of both our consumer and military robots, we can focus our engineering expertise on the design of robots.

Using our engineering team, we believe that we can rapidly prototype design concepts and products to achieve optimal value, produce products at lower cost points and optimize our designs for manufacturing requirements, size and functionality.

Manufacturing a new product requires a close relationship between our product designers and the manufacturing organizations. Using multiple engineering techniques, our products are introduced to the selected production facility at an early-development stage and the feedback provided by manufacturing is incorporated into the design before tooling is finalized and mass production begins. As a result, we believe that we can significantly reduce the time required to move a product from its design phase to mass production deliveries, with improved quality and yields.

We outsource the manufacturing of our consumer products to two contract manufacturers, Jetta Company Limited and Kin Yat Industrial Co. Ltd., each of which manufactures our consumer products at a single plant in China. Jetta Company Limited has several manufacturing locations and has been manufacturing products since 1977. Jetta Company Limited brings substantial experience to our production requirements. Kin Yat Industrial Co. Ltd. has been in business since 1981, has several manufacturing locations in China, and began manufacturing our Roomba 500 series in 2007.

Our PackBot family of government and industrial products is manufactured by Gem City Engineering and Manufacturing Corporation, or GEM, at one plant in Dayton, Ohio. GEM's location is particularly important as military products supplied to the U.S. government must have the majority of their content manufactured in the United States. GEM has multiple facilities and relies on subcontractors for certain component manufacturing capabilities. GEM has been in the business of manufacturing primarily machined metal products since 1936, and

has produced numerous products for military contractors. We believe that GEM's engineers are skilled in the production of products meeting military specifications, and in preparing final products for military inspection and conducting quality reviews.

Our Small Unmanned Ground Vehicle (SUGV) family of government and industrial products is manufactured by Benchmark Electronics, Inc., at a facility in Nashua, New Hampshire. Benchmark is a large geographically dispersed contract manufacturer headquartered in Angleton, Texas with locations around the world. Benchmark provides significant additional outsourced manufacturing capacity for iRobot. Benchmark sources its material from numerous subcontractors with the majority of the content manufactured in the United States to support military products.

Our Maritime family of underwater robotic products is manufactured by Polaris Contract Manufacturing, Inc. a wholly-owned subsidiary of Lockheed Martin, Inc., at a facility in Marion, Massachusetts. Our Negotiator family of products targeted for municipal markets is manufactured by Kaynes Technology Pvt. Ltd., at a facility in Mysore, India. These contract manufacturers provide high quality, scalable, cost effective manufacturing services.

Research and Development

We believe that our future success depends upon our ability to continue to develop new products and product accessories, and enhancements to and applications for our existing products. For the years ended January 2, 2010, December 27, 2008 and December 29, 2007, our research and development expenses were \$14.7 million, \$17.6 million and \$17.1 million, respectively. In addition to our internal research and development activities, for the years ended January 2, 2010, December 27, 2008 and December 29, 2007, we have incurred research and development expenses under funded development arrangements with governments and industrial third parties of \$30.8 million, \$23.9 million and \$18.8 million, respectively. Of our total research and development spending in 2009, 2008 and 2007, approximately 63.9%, 51.7% and 37.9%, respectively was funded by government-sponsored research and development contracts. For the years ended January 2, 2010, December 27, 2008 and December 29, 2007, the combined investment in future technologies, classified as cost of revenue and research and development expense, was \$45.5 million, \$41.5 million and \$35.9 million, respectively. We intend to continue our investment in research and development to respond to and anticipate customer needs, and to enable us to introduce new products over the next few years that will continue to address our existing market sectors.

Team Organization

Our research and development is conducted by small teams dedicated to particular projects, examples of which include the Roomba team, Scooba team, Warrior team and PackBot team. In connection with our SUGV program, we have instituted a formal integrated product team structure consisting of integrated System of Systems, Integrated Logistical Support, Program Operations and Business Operations teams to work together to deliver a platform that integrates with the FCS/BCTM system of systems. Our domestic research and development efforts are primarily located at our headquarters in Bedford, Massachusetts, our office in Durham, North Carolina, and our special projects engineering office in San Luis Obispo, California. In addition, through 2009, we utilized an engineering design center in Mysore, India and a product development team in Hong Kong.

Spiral Development

One of the methods we use to develop military products is a "spiral development" process to get field tested equipment to the troops more quickly. After we develop a new product or product upgrade that will fulfill the desired requirements of the user, the product is tested with soldiers. The user provides performance feedback on the product to the in-field engineer. Revisions are made quickly and retested. This method has allowed our research and development team to not only make revisions on existing products quickly and efficiently, but also capture feedback for future upgrades and innovations to meet user needs. Periodically we send engineers in the field with our PackBot tactical military robots to solicit feedback from users which is often times incorporated into future product development and product enhancements.

Leveraged Model

Our research and development efforts for our next-generation products are supported by a variety of sources. Our next-generation military products are predominately supported by U.S. governmental research organizations, such as the Defense Advanced Research Projects Agency, or DARPA, U.S. Space and Warfare Command, or SPAWAR, Technical Support Working Group, or TSWG, U.S. Army Tank-Automotive and Armaments Command, or TACOM, U.S. Army Armament Research, Development and Engineering Center, or ARDEC, and the BCTM program. While the U.S. government retains certain rights in the research projects that it has funded, we retain ownership of patents and know-how and are generally free to develop other commercial products, including consumer and industrial products, utilizing the technologies developed during these projects. Similarly, expertise developed while designing consumer products is used in designing products for government and industrial applications. We also work with strategic collaborators to develop industry-specific technologies. Moreover, we continue to reinvest in advanced research and development projects to maintain our technical capability and to enhance our product offerings.

Competition

The market for robots is highly competitive, rapidly evolving and subject to changing technologies, shifting customer needs and expectations and the likely increased introduction of new products. We believe that a number of established companies have developed or are developing robots that will compete directly with our product offerings, and many of our competitors have significantly more financial and other resources than we possess. Our current principal competitors include:

- developers of robot floor cleaning products such as AB Electrolux, ACE ROBOT Co., Agait Technology Corp. (wholly owned subsidiary of ASUSTek Computer Inc.), Alfred Kärcher GmbH & Co., Evolution Robotics, Inc. LG Electronics Inc., Infinuvo/Metapo, Inc, Matsutek Enterprises Co Ltd., Microrobot CO., Ltd., Neato Robotics, Inc., Samsung Electronics Co., Ltd., Shenzhen Goldluck Electronic Co., Ltd., and Yujin Robotic Co. Ltd.;
- developers of small unmanned ground vehicles such as Foster-Miller, Inc. — a wholly owned subsidiary of QinetiQ North America, Inc., Allen-Vanguard Corporation, and Remotec — a division of Northrop Grumman Corporation;
- established government contractors working on unmanned systems such as Lockheed Martin Corporation, The Boeing Company, BAE Systems, Inc. and General Dynamics Corporation; and
- developers of small unmanned underwater vehicles such as BlueFin Robotics, a wholly owned subsidiary of Battelle Memorial Institute, Hydroid a wholly owned subsidiary of Kongsberg Maritime AS; Webb Research — a wholly owned subsidiary of Teledyne Technologies Company, and Ocean Server Technology Inc.

While we believe many of our customers purchase our Roomba floor vacuuming robots and Scooba floor washing robots as a supplement to, rather than a replacement for, their traditional vacuum cleaners and wet floor cleaning methods, we do compete in some cases with providers of traditional cleaning products.

We believe that the principal competitive factors in the market for robots include product features, performance for the intended mission, cost of purchase, total cost of system operation, including maintenance and support, ease of use, integration with existing equipment, quality, reliability, customer support, brand and reputation.

Our ability to remain competitive will depend to a great extent upon our ongoing performance in the areas of product development and customer support. We cannot assure you that our products will continue to compete favorably or that we will be successful in the face of increasing competition from new products and enhancements introduced by existing competitors or new companies entering the markets in which we provide products.

Intellectual Property

We believe that our continued success depends in large part on our proprietary technology, the intellectual skills of our employees and the ability of our employees to continue to innovate. We rely on a combination of patent,

copyright, trademark and trade secret laws, as well as confidentiality agreements, to establish and protect our proprietary rights.

As of January 2, 2010, we held 71 U.S. patents and more than 150 pending U.S. patent applications. Also, we held 34 foreign patents, additional design registrations, and more than 108 pending foreign applications. Our U.S. patents will begin to expire in 2019. We will continue to file and prosecute patent (or design registration, as applicable) applications when and where appropriate to attempt to protect our rights in our proprietary technologies. We also encourage our employees to continue to invent and develop new technologies so as to maintain our competitiveness in the marketplace. It is possible that our current patents, or patents which we may later acquire, may be successfully challenged or invalidated in whole or in part. It is also possible that we may not obtain issued patents for our pending patent applications or other inventions we seek to protect. In that regard, we sometimes permit certain intellectual property to lapse or go abandoned under appropriate circumstances and due to uncertainties inherent in prosecuting patent applications, sometimes patent applications are rejected and we subsequently abandon them. It is also possible that we may not develop proprietary products or technologies in the future that are patentable, or that any patent issued to us may not provide us with any competitive advantages, or that the patents of others will harm or altogether preclude our ability to do business.

Our registered U.S. trademarks include iRobot, Roomba, Scooba, iRobot Dirt Dog, Create, PackBot, Negotiator, Aware, Home Base, Looj, Verro, Virtual Wall, and Warrior. Our marks, iRobot, Roomba, Scooba, and certain other trademarks, have also been registered in selected foreign countries.

Our means of protecting our proprietary rights may not be adequate and our competitors may independently develop technology that is similar to ours. Legal protections afford only limited protection for our technology. The laws of many countries do not protect our proprietary rights to as great an extent as do the laws of the United States. Despite our efforts to protect our proprietary rights, unauthorized parties have in the past attempted, and may in the future attempt, to copy aspects of our products or to obtain and use information that we regard as proprietary. Third parties may also design around our proprietary rights, which may render our protected products less valuable, if the design around is favorably received in the marketplace. In addition, if any of our products or the technology underlying our products is covered by third-party patents or other intellectual property rights, we could be subject to various legal actions. We cannot assure you that our products do not infringe patents held by others or that they will not in the future. We have received in the past communications from third parties relating to technologies used in our Roomba floor vacuuming robots that have alleged infringement of patents or violation of other intellectual property rights. In response to these communications, we have contacted these third parties to convey our good faith belief that we do not infringe the patents in question or otherwise violate those parties' rights. Although there have been no additional actions or communications with respect to these allegations, we cannot assure you that we will not receive further correspondence from these parties, or not be subject to additional allegations of infringement from others. Litigation may be necessary to enforce our intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others, or to defend against claims of infringement or invalidity, misappropriation, or other claims. Any such litigation could result in substantial costs and diversion of our resources. Moreover, any settlement of or adverse judgment resulting from such litigation could require us to obtain a license to continue to use the technology that is the subject of the claim, or otherwise restrict or prohibit our use of the technology. Any required licenses may not be available to us on acceptable terms, if at all. If we attempt to design around the technology at issue or to find another provider of suitable alternative technology to permit us to continue offering applicable software or product solutions, our continued supply of software or product solutions could be disrupted or our introduction of new or enhanced software or products could be significantly delayed.

Regulations

We are subject to various government regulations, including various U.S. federal government regulations as a contractor and subcontractor to the U.S. federal government. Among the most significant U.S. federal government regulations affecting our business are:

- the Federal Acquisition Regulations and supplemental agency regulations, which comprehensively regulate the formation and administration of, and performance under government contracts;

- the Truth in Negotiations Act, which requires certification and disclosure of all cost and pricing data in connection with contract negotiations;
- the Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under cost-based government contracts;
- the Foreign Corrupt Practices Act, which prohibits U.S. companies from providing anything of value to a foreign official to help obtain, retain or direct business, or obtain any unfair advantages;
- the False Claims Act and the False Statements Act, which, respectively, impose penalties for payments made on the basis of false facts provided to the government, and impose penalties on the basis of false statements, even if they do not result in a payment; and
- laws, regulations and executive orders restricting the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data.

We also need special security clearances to continue working on and advancing certain of our projects with the U.S. federal government. Classified programs generally will require that we comply with various Executive Orders, federal laws and regulations and customer security requirements that may include restrictions on how we develop, store, protect and share information, and may require our employees to obtain government clearances.

The nature of the work we do for the federal government may also limit the parties who may invest in or acquire us. Export laws may keep us from providing potential foreign acquirers with a review of the technical data they would be acquiring. In addition, there are special requirements for foreign parties who wish to buy or acquire control or influence over companies that control technology or produce goods in the security interests of the United States. There may need to be a review under the Exon-Florio provisions of the Defense Production Act. Finally, the government may require a prospective foreign owner to establish intermediaries to actually run that part of the company that does classified work, and establishing a subsidiary and its separate operation may make such an acquisition less appealing to such potential acquirers.

In addition, the export from the United States of many of our products may require the issuance of a license by the U.S. Department of Commerce under the Export Administration Act, as amended, and its implementing Regulations as kept in force by the International Emergency Economic Powers Act of 1977, as amended. Some of our products may require the issuance of a license by the U.S. Department of State under the Arms Export Control Act and its implementing Regulations, which licenses are generally harder to obtain and take longer to obtain than do Export Administration Act licenses.

Our business may require the compliance with state or local laws designed to limit the uses of personal user information gathered online or require online services to establish privacy policies.

Government and Industrial Product Backlog

Our government and industrial product backlog consists of written orders or contracts to purchase our products received from our government and industrial customers. Total backlog of product sales to government and industrial customers, which includes federal, state, local and foreign governments, and non-government customers, as of January 2, 2010 and December 27, 2008 amounted to approximately \$42.2 million and \$8.4 million, respectively. Our funded research and development contracts may be cancelled or delayed at any time without significant, if any, penalty. As a result, we believe that backlog with respect to our funded research and development is not meaningful. There can be no assurance that any of our backlog will result in revenue.

Employees

As of January 2, 2010, we had 538 full-time employees located in the United States and abroad, of whom 254 are in research and development, 119 are in operations, 65 are in sales and marketing and 100 are in general and administration. We believe that we have a good relationship with our employees.

Available Information

We were incorporated in California in August 1990 under the name IS Robotics, Inc. and reincorporated as IS Robotics Corporation in Massachusetts in June 1994. We reincorporated in Delaware as iRobot Corporation in December 2000. We conduct operations and maintain a number of subsidiaries in the United States and abroad, including operations in Hong Kong, the United Kingdom, China and India. We also maintain iRobot Securities Corporation, a Massachusetts securities corporation, to invest our cash balances on a short-term basis. Our website address is www.irobot.com. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are available free of charge through the investor relations page of our internet website as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

ITEM 1A. RISK FACTORS

We operate in a rapidly changing environment that involves a number of risks, some of which are beyond our control. This discussion highlights some of the risks which may affect future operating results. These are the risks and uncertainties we believe are most important for you to consider. Additional risks and uncertainties not presently known to us, which we currently deem immaterial or which are similar to those faced by other companies in our industry or business in general, may also impair our business operations. If any of the following risks or uncertainties actually occurs, our business, financial condition and operating results would likely suffer.

Risks Related to Our Business

We operate in an emerging market, which makes it difficult to evaluate our business and future prospects.

Robots represent a new and emerging market. Accordingly, our business and future prospects are difficult to evaluate. We cannot accurately predict the extent to which demand for consumer robots will increase, if at all. Moreover, there are only a limited number of major programs under which the U.S. federal government is currently funding the development or purchase of military robots. You should consider the challenges, risks and uncertainties frequently encountered by companies using new and unproven business models in rapidly evolving markets. These challenges include our ability to:

- generate sufficient revenue and gross margin to maintain profitability;
- acquire and maintain market share in our consumer and military markets;
- manage growth in our operations;
- attract and retain customers of our consumer robots;
- develop and renew government contracts for our military robots;
- attract and retain additional engineers and other highly-qualified personnel;
- adapt to new or changing policies and spending priorities of governments and government agencies; and
- access additional capital when required and on reasonable terms.

If we fail to successfully address these and other challenges, risks and uncertainties, our business, results of operations and financial condition would be materially harmed.

Our financial results often vary significantly from quarter-to-quarter due to a number of factors, which may lead to volatility in our stock price.

Our quarterly revenue and other operating results have varied in the past and are likely to continue to vary significantly from quarter-to-quarter. For instance, our consumer product revenue is significantly seasonal. For the fiscal years ended January 2, 2010 and December 27, 2008, we generated 59.7% and 58.6%, respectively, of our revenue from sales of consumer products in the second half of the year. This variability may lead to volatility in our stock price as equity research analysts and investors respond to these quarterly fluctuations. These fluctuations will be due to numerous factors including:

- seasonality in the sales of our consumer products;
- the size and timing of orders from retail stores for our home care robots;
- the size and timing of orders from military and other government agencies;
- the mix of products that we sell in the period;
- disruption of supply of our products from our manufacturers;
- the inability to attract and retain qualified, revenue-generating personnel;
- unanticipated costs incurred in the introduction of new products;

- costs and availability of labor and raw materials;
- costs of freight;
- changes in our rate of returns for our consumer products;
- our ability to introduce new products and enhancements to our existing products on a timely basis;
- price reductions;
- warranty costs associated with our consumer products;
- the amount of government funding and the political, budgetary and purchasing constraints of our government agency customers;
- cancellations, delays or contract amendments by government agency customers; and
- significant cost overruns due to program management inefficiencies.

Predicting revenue for any particular quarter and from sales of our consumer products includes many challenges. Chain stores and other national retailers typically place orders for the holiday season in the third quarter and early in the fourth quarter. The timing of these holiday season shipments could materially affect our third or fourth quarter results in any fiscal year. Because of quarterly fluctuations, we believe that quarter-to-quarter comparisons of our operating results are not necessarily meaningful. Moreover, our operating results may not meet expectations of equity research analysts or investors. If this occurs, the trading price of our common stock could fall substantially either suddenly or over time.

Global economic conditions and any associated impact on consumer spending could have a material adverse effect on our business, results of operations and financial condition.

Continued economic uncertainty and reductions in consumer spending may result in reductions in sales of our consumer robots, which would adversely affect our business, results of operations and our financial condition. In addition, recent disruptions in national and international credit markets have led to a scarcity of credit, tighter lending standards and higher interest rates on consumer and business loans. Continued disruptions in credit markets may materially limit consumer credit availability and restrict credit availability of our retail customers, which would also impact purchases of our consumer robots. Any reduction in sales of our consumer robots, resulting from reductions in consumer spending or continued disruption in the availability of credit to retailers or consumers, could materially and adversely affect our business, results of operations and financial condition.

Our future profitability may fluctuate, and we have a limited operating history on which you can base your evaluation of our business.

As of January 2, 2010, we had an accumulated deficit of \$7.6 million. Over the past six years, our accumulated deficit has decreased by \$19.5 million due to annual operating profitability. Because we operate in a rapidly evolving industry, there are challenges to predicting our future operating results, and we cannot be certain that our revenues will grow at rates that will allow us to maintain profitability during every fiscal quarter, or even every fiscal year. In addition, we only have limited operating history on which you can base your evaluation of our business. Failure to maintain profitability may result in our inability to access capital under our existing credit arrangements.

A majority of our business currently depends on our consumer robots, and our sales growth and operating results would be negatively impacted if we are unable to enhance our current consumer robots or develop new consumer robots at competitive prices or in a timely manner.

For the years ended January 2, 2010 and December 27, 2008, we derived 55.5% and 56.4% of our total revenue from our consumer robots, respectively. For the foreseeable future, we expect that a significant portion of our revenue will continue to be derived from sales of consumer robots in general and home floor care products in particular. Accordingly, our future success depends upon our ability to further penetrate the consumer home care market, to enhance our current consumer products and develop and introduce new consumer products offering enhanced performance and functionality at competitive prices. The development and application of new

technologies involve time, substantial costs and risks. Our inability to achieve significant sales of our newly introduced robots, or to enhance, develop and introduce other products in a timely manner, or at all, would materially harm our sales growth and operating results.

We depend on the U.S. federal government for a significant portion of our revenue, and any reduction in the amount of business that we do with the U.S. federal government would negatively impact our operating results and financial condition.

For the years ended January 2, 2010 and December 27, 2008, we derived 36.9% and 40.3% of our total revenue, respectively, directly or indirectly, from the U.S. federal government and its agencies. Any reduction in the amount of revenue that we derive from a limited number of U.S. federal government agencies without an offsetting increase in new sales to other customers would have a material adverse effect on our operating results.

Our participation in specific major U.S. federal government programs is critical to both the development and sale of our military robots. For example, in the years ended January 2, 2010 and December 27, 2008, 40.3% and 56.7% of our total contract revenue was derived from our participation in the U.S. Army's FCS/BCTM program, respectively. Future sales of our PackBot robots will depend largely on our ability to secure contracts with the U.S. military under its robot programs. We expect that there will continue to be only a limited number of major programs under which U.S. federal government agencies will seek to fund the development of, or purchase, robots. Our business will, therefore, suffer if we are not awarded, either directly or indirectly through third-party contractors, government contracts for robots that we are qualified to develop or build. In addition, if the U.S. federal government or government agencies terminate or reduce the related prime contract under which we serve as a subcontractor, revenues that we derive under that contract could be lost, which would negatively impact our business and financial results. Moreover, it is difficult to predict the timing of the award of government contracts and our revenue could fluctuate significantly based on the timing of any such awards.

Even if we continue to receive funding for research and development under these contracts, there can be no assurance that we will successfully complete the development of robots pursuant to these contracts or that, if successfully developed, the U.S. federal government or any other customer will purchase these robots from us. The U.S. federal government has the right when it contracts to use the technology developed by us to have robots supplied by third parties. Any failure by us to complete the development of these robots, or to achieve successful sales of these robots, would harm our business and results of operations.

Our contracts with the U.S. federal government contain certain provisions that may be unfavorable to us and subject us to government audits, which could materially harm our business and results of operations.

Our contracts and subcontracts with the U.S. federal government subject us to certain risks and give the U.S. federal government rights and remedies not typically found in commercial contracts, including rights that allow the U.S. federal government to:

- terminate contracts for convenience, in whole or in part, at any time and for any reason;
- reduce or modify contracts or subcontracts if its requirements or budgetary constraints change;
- cancel multi-year contracts and related orders if funds for contract performance for any subsequent year become unavailable;
- exercise production priorities, which allow it to require that we accept government purchase orders or produce products under its contracts before we produce products under other contracts, which may displace or delay production of more profitable orders;
- claim certain rights in products provided by us; and
- control or prohibit the export of certain of our products.

Several of our prime contracts with the U.S. federal government do not contain a limitation of liability provision, creating a risk of responsibility for direct and consequential damages. Several subcontracts with prime contractors hold the prime contractor harmless against liability that stems from our work and do not contain a

limitation of liability. These provisions could cause substantial liability for us, especially given the use to which our products may be put.

In addition, we are subject to audits by the U.S. federal government as part of routine audits of government contracts. As part of an audit, these agencies may review our performance on contracts, cost structures and compliance with applicable laws, regulations and standards. If any of our costs are found to be allocated improperly to a specific contract, the costs may not be reimbursed and any costs already reimbursed for such contract may have to be refunded. Accordingly, an audit could result in a material adjustment to our revenue and results of operations. Moreover, if an audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or debarment from doing business with the government.

If any of the foregoing were to occur, or if the U.S. federal government otherwise ceased doing business with us or decreased the amount of business with us, our business and operating results could be materially harmed and the value of your investment in our common stock could be impaired.

Some of our contracts with the U.S. federal government allow it to use inventions developed under the contracts and to disclose technical data to third parties, which could harm our ability to compete.

Some of our contracts allow the U.S. federal government rights to use, or have others use, patented inventions developed under those contracts on behalf of the government. Some of the contracts allow the federal government to disclose technical data without constraining the recipient in how that data is used. The ability of third parties to use patents and technical data for government purposes creates the possibility that the government could attempt to establish additional sources for the products we provide that stem from these contracts. It may also allow the government the ability to negotiate with us to reduce our prices for products we provide to it. The potential that the government may release some of the technical data without constraint creates the possibility that third parties may be able to use this data to compete with us in the commercial sector.

Government contracts are subject to a competitive bidding process that can consume significant resources without generating any revenue.

Government contracts are frequently awarded only after formal competitive bidding processes, which are protracted. In many cases, unsuccessful bidders for government agency contracts are provided the opportunity to protest certain contract awards through various agency, administrative and judicial channels. If any of the government contracts awarded to us are protested, we may be required to expend substantial time, effort and financial resources without realizing any revenue with respect to the potential contract. The protest process may substantially delay our contract performance, distract management and result in cancellation of the contract award entirely.

We depend on single source manufacturers, and our reputation and results of operations would be harmed if these manufacturers fail to meet our requirements.

We currently depend on one contract manufacturer, Jetta Company Limited, to manufacture our Roomba 400 series and Scooba series of home robot products at a single plant in China, and one contract manufacturer, Kin Yat Industrial Co Limited, to manufacture our Roomba 500 series of home robot products at a single plant in China. In addition, we rely on several other single source contract manufacturers, including Gem City Engineering and Manufacturing for the manufacturing of our PackBot products, Kaynes Technology Pvt. Ltd., for the manufacturing of our Negotiator products, and Polaris Contract Manufacturing, Inc. for the manufacturing of our Maritime family of underwater robotic products. We do not have a long-term contract with Jetta Company Limited and the manufacture of our consumer products is provided on a purchase-order basis. These manufacturers supply substantially all of the raw materials and provide all facilities and labor required to manufacture our products. If these companies were to terminate their arrangements with us or fail to provide the required capacity and quality on a timely basis, we would be unable to manufacture our products until replacement contract manufacturing services could be obtained. To qualify a new contract manufacturer, familiarize it with our products, quality standards and other requirements, and commence volume production is a costly and time-consuming

process. We cannot assure you that we would be able to establish alternative manufacturing relationships on acceptable terms.

Our reliance on these contract manufacturers involves certain risks, including the following:

- lack of direct control over production capacity and delivery schedules;
- lack of direct control over quality assurance, manufacturing yields and production costs;
- lack of enforceable contractual provisions over the production and costs of consumer products;
- risk of loss of inventory while in transit from China or India;
- risks associated with international commerce with China and India, including unexpected changes in legal and regulatory requirements, changes in tariffs and trade policies, risks associated with the protection of intellectual property and political and economic instability; and
- Our attempts to add additional manufacturing resources may be significantly delayed and thereby create disruptions in production of our products.

Any interruption in the manufacture of our products would be likely to result in delays in shipment, lost sales and revenue and damage to our reputation in the market, all of which would harm our business and results of operations. In addition, while our contract obligations with our contract manufacturers in China are typically denominated in U.S. dollars, changes in currency exchange rates could impact our suppliers and increase our prices.

Any efforts to expand our product offerings beyond our current markets may not succeed, which could negatively impact our operating results.

We have focused on selling our robots in the home floor care and military markets. We plan to expand into other markets. For example, we have devoted significant time and incurred expenses in connection with the development of our consumer robots. In addition, we have devoted significant time and incurred expenses in connection with the development of the Negotiator product for the civil law enforcement market and the Seaglider product for the maritime market. Efforts to expand our product offerings beyond the two markets that we currently serve, however, may divert management resources from existing operations and require us to commit significant financial resources to an unproven business, either of which could significantly impair our operating results. Moreover, efforts to expand beyond our existing markets may never result in new products that achieve market acceptance, create additional revenue or become profitable.

If we are unable to implement appropriate controls and procedures to manage our growth, we may not be able to successfully implement our business plan.

Our headcount and operations are growing rapidly. This rapid growth has placed, and will continue to place, a significant strain on our management, administrative, operational and financial infrastructure. From December 27, 2008 to January 2, 2010, the number of our employees increased from 479 to 538. We anticipate further growth will be required to address increases in our product offerings and the geographic scope of our customer base. Our success will depend in part upon the ability of our senior management to manage this growth effectively. To do so, we must continue to hire, train, manage and integrate a significant number of qualified managers and employees. If our new employees perform poorly, or if we are unsuccessful in hiring, training, managing and integrating these new employees, or retaining these or our existing employees, our business may suffer.

In addition, we face risks associated with managing operations outside the United States, including operations in Hong Kong, China, India and the United Kingdom. To manage the expected continued growth of our headcount and operations, we will need to continue to improve our information technology infrastructure, operational, financial and management controls and reporting systems and procedures, and manage expanded operations in geographically distributed locations. Our expected additional headcount and capital investments will increase our costs, which will make it more difficult for us to offset any future revenue shortfalls by offsetting expense reductions in the short term. If we fail to successfully manage our growth, we will be unable to successfully execute our business plan, which could have a negative impact on our business, financial condition or results of operations.

If the consumer robot market does not experience significant growth or if our products do not achieve broad acceptance, we will not be able to achieve our anticipated level of growth.

We derive a substantial portion of our revenue from sales of our consumer robots, including our home care robots. For the years ended January 2, 2010 and December 27, 2008, consumer robots accounted for 55.5% and 56.4%, respectively, of our total revenue. We face challenges in predicting the future growth rate or the size of the consumer robot market in general or the home care robot market in particular. Demand for home care robots may not increase, or may decrease, either generally or in specific geographic markets, for particular types of robots or during particular time periods. The expansion of the home robot market and the market for our products depends on a number of factors, such as:

- the cost, performance and reliability of our products and products offered by our competitors;
- public perceptions regarding the effectiveness and value of robots;
- customer satisfaction with robots; and
- marketing efforts and publicity regarding robots.

Even if consumer robots gain wide market acceptance, our robots may not adequately address market requirements and may not continue to gain market acceptance. If robots generally, or our robots specifically, do not gain wide market acceptance, we may not be able to achieve our anticipated level of growth, and our revenue and results of operations would suffer.

Our business and results of operations could be adversely affected by significant changes in the policies and spending priorities of governments and government agencies.

We derive a substantial portion of our revenue from sales to and contracts with U.S. federal, state and local governments and government agencies, and subcontracts under federal government prime contracts. For the years ended January 2, 2010 and December 27, 2008, U.S. federal government orders, contracts and subcontracts accounted for 36.9% and 40.3%, respectively, of our total revenue. We believe that the success and growth of our business will continue to depend on our successful procurement of government contracts either directly or through prime contractors. Many of our government customers are subject to stringent budgetary constraints and our continued performance under these contracts, or award of additional contracts from these agencies, could be jeopardized by spending reductions or budget cutbacks at these agencies. We cannot assure you that future levels of expenditures and authorizations will continue for governmental programs in which we provide products and services. A significant decline in government expenditures generally, or with respect to programs for which we provide products, could adversely affect our government product and funded research and development revenues and prospects, which would harm our business, financial condition and operating results. Our operating results may also be negatively impacted by other developments that affect these governments and government agencies generally, including:

- changes in government programs that are related to our products and services;
- adoption of new laws or regulations relating to government contracting or changes to existing laws or regulations;
- changes in political or public support for security and defense programs;
- delays or changes in the government appropriations process;
- uncertainties associated with the war on terror and other geo-political matters; and
- delays in the payment of our invoices by government payment offices.

These developments and other factors could cause governments and governmental agencies, or prime contractors that use us as a subcontractor, to reduce their purchases under existing contracts, to exercise their rights to terminate contracts at-will or to abstain from renewing contracts, any of which would cause our revenue to decline and could otherwise harm our business, financial condition and results of operations.

We face intense competition from other providers of robots, including diversified technology providers, as well as competition from providers offering alternative products, which could negatively impact our results of operations and cause our market share to decline.

We believe that a number of companies have developed or are developing robots that will compete directly with our product offerings. Additionally, large and small companies, government-sponsored laboratories and universities are aggressively pursuing contracts for robot-focused research and development. Many current and potential competitors have substantially greater financial, marketing, research and manufacturing resources than we possess, and there can be no assurance that our current and future competitors will not be more successful than us. Moreover, while we believe many of our customers purchase our floor vacuuming robots as a supplement to, rather than a replacement for, their traditional vacuum cleaners; we also compete in some cases with providers of traditional vacuum cleaners. Our current principal competitors include:

- developers of robot floor cleaning products such as AB Electrolux, ACE ROBOT Co., Agait Technology Corp. (wholly owned subsidiary of ASUSTek Computer Inc.), Alfred Kärcher GmbH & Co., Evolution Robotics, Inc. LG Electronics Inc., Infinuvo/Metapo, Inc, Matsutek Enterprises Co Ltd., Microrobot CO., Ltd., Neato Robotics, Inc., Samsung Electronics Co., Ltd., Shenzhen Goldluck Electronic Co., Ltd., and Yujin Robotic Co. Ltd.;
- developers of small unmanned ground vehicles such as Foster-Miller, Inc. — a wholly owned subsidiary of QinetiQ North America, Inc., Allen-Vanguard Corporation, and Remotec — a division of Northrop Grumman Corporation; and
- established government contractors working on unmanned systems such as Lockheed Martin Corporation, the Boeing Company, BAE Systems, Inc. and General Dynamics Corporation.
- developers of small unmanned underwater vehicles such as BlueFin Robotics, a wholly owned subsidiary of Battelle Memorial Institute, Hydroid a wholly owned subsidiary of Kongsberg Maritime AS; Webb Research — a wholly owned subsidiary of Teledyne Technologies Company, and Ocean Server Technology Inc.

In the event that the robot market expands, we expect that competition will intensify as additional competitors enter the market and current competitors expand their product lines. Companies competing with us may introduce products that are competitively priced, have increased performance or functionality, or incorporate technological advances that we have not yet developed or implemented. Increased competitive pressure could result in a loss of sales or market share or cause us to lower prices for our products, any of which would harm our business and operating results.

The market for robots is highly competitive, rapidly evolving and subject to changing technologies, shifting customer needs and expectations and the likely increased introduction of new products. Our ability to remain competitive will depend to a great extent upon our ongoing performance in the areas of product development and customer support. We cannot assure you that our products will continue to compete favorably or that we will be successful in the face of increasing competition from new products and enhancements introduced by existing competitors or new companies entering the markets in which we provide products. Our failure to compete successfully could cause our revenue and market share to decline, which would negatively impact our results of operations and financial condition.

Our business is significantly seasonal and, because many of our expenses are based on anticipated levels of annual revenue, our business and operating results will suffer if we do not achieve revenue consistent with our expectations.

Our home robots revenue is significantly seasonal. For the fiscal years ended January 2, 2010 and December 27, 2008, we generated 59.7% and 58.6%, respectively, of our revenue from sales of consumer products in the second half of the year. We expect a majority of such revenue will continue to be generated in the second half of the year for the foreseeable future. As a result of this seasonality, we believe that quarter-to-quarter comparisons of our operating results are not necessarily meaningful and that these comparisons cannot be relied upon as indicators of future performance.

We base our current and future expense levels on our internal operating plans and sales forecasts, including forecasts of holiday sales for our consumer products. A significant portion of our operating expenses, such as research and development expenses, certain marketing and promotional expenses and employee wages and salaries, do not vary directly with sales and are difficult to adjust in the short term. As a result, if sales for a quarter, particularly the final quarter of a fiscal year, are below our expectations, we might not be able to reduce operating expenses for that quarter and, therefore, we would not be able to reduce our operating expenses for the fiscal year. Accordingly, a sales shortfall during a fiscal quarter, and in particular the fourth quarter of a fiscal year, could have a disproportionate effect on our operating results for that quarter or that year. As a result of these factors, we may report operating results that do not meet the expectations of equity research analysts and investors. This could cause the trading price of our common stock to decline.

If critical components of our products that we currently purchase from a small number of suppliers become unavailable, we may incur delays in shipment, which could damage our business.

We and our outsourced manufacturers obtain hardware components, various subsystems, raw materials and batteries from a limited group of suppliers, some of which are sole suppliers. We do not have any long-term agreements with these suppliers obligating them to continue to sell components or products to us. Our reliance on these suppliers involves significant risks and uncertainties, including whether our suppliers will provide an adequate supply of required components of sufficient quality, will increase prices for the components and will perform their obligations on a timely basis. If we or our outsourced manufacturers are unable to obtain components from third-party suppliers in the quantities and of the quality that we require, on a timely basis and at acceptable prices, we may not be able to deliver our products on a timely or cost-effective basis to our customers, which could cause customers to terminate their contracts with us, reduce our gross margin and seriously harm our business, results of operations and financial condition. Moreover, if any of our suppliers become financially unstable, we may have to find new suppliers. It may take several months to locate alternative suppliers, if required, or to re-tool our products to accommodate components from different suppliers. We may experience significant delays in manufacturing and shipping our products to customers and incur additional development, manufacturing and other costs to establish alternative sources of supply if we lose any of these sources. We cannot predict if we will be able to obtain replacement components within the time frames that we require at an affordable cost, or at all. In particular, the prices of ABS plastic and nickel (for batteries) have fluctuated greatly and we cannot provide assurance that the prices of these components will not materially impact our results of operations.

Our products are complex and could have unknown defects or errors, which may give rise to claims against us, diminish our brand or divert our resources from other purposes.

Our robots rely on the interplay among behavior-based artificially intelligent systems, real-world dynamic sensors, user-friendly interfaces and tightly-integrated, electromechanical designs to accomplish their missions. Despite testing, our new or existing products have contained defects and errors and may in the future contain defects, errors or performance problems when first introduced, when new versions or enhancements are released, or even after these products have been used by our customers for a period of time. These problems could result in expensive and time-consuming design modifications or warranty charges, delays in the introduction of new products or enhancements, significant increases in our service and maintenance costs, exposure to liability for damages, damaged customer relationships and harm to our reputation, any of which could materially harm our results of operations and ability to achieve market acceptance. Our quality control procedures relating to the raw materials and components that it receives from third-party suppliers as well as our quality control procedures relating to its products after those products are designed, manufactured and packaged may not be sufficient. In addition, increased development and warranty costs, including the costs of any mandatory or voluntary recall or product upgrades, could be substantial and could reduce our operating margins. Moreover, because military robots are used in dangerous situations, the failure or malfunction of any of these robots, including our own, could significantly damage our reputation and support for robot solutions in general. The existence of any defects, errors, or failures in our products could also lead to product liability claims or lawsuits against us. A successful product liability claim could result in substantial cost, diminish our brand and divert management's attention and resources, which could have a negative impact on our business, financial condition and results of operations.

The robot industry is and will likely continue to be characterized by rapid technological change, which will require us to develop new products and product enhancements, and could render our existing products obsolete.

Continuing technological changes in the robot industry and in the markets in which we sell our robots could undermine our competitive position or make our robots obsolete, either generally or for particular types of services. Our future success will depend upon our ability to develop and introduce a variety of new capabilities and enhancements to our existing product offerings, as well as introduce a variety of new product offerings, to address the changing needs of the markets in which we offer our robots. Delays in introducing new products and enhancements, the failure to choose correctly among technical alternatives or the failure to offer innovative products or enhancements at competitive prices may cause existing and potential customers to forego purchases of our products and purchase our competitors' products. Moreover, the development of new products has required, and will require, that we expend significant financial and management resources. We have incurred, and expect to continue to incur, significant research and development expenses in connection with our efforts to expand our product offerings. If we are unable to devote adequate resources to develop new products or cannot otherwise successfully develop new products or enhancements that meet customer requirements on a timely basis, our products could lose market share, our revenue and profits could decline, or we could experience operating losses. Moreover, if we are unable to offset our product development costs through sales of existing or new products or product enhancements, our operating results and gross margins would be negatively impacted.

If we are unable to attract and retain additional skilled personnel, we may be unable to grow our business.

To execute our growth plan, we must attract and retain additional, highly-qualified personnel. Competition for hiring these employees is intense, especially with regard to engineers with high levels of experience in designing, developing and integrating robots. Many of the companies with which we compete for hiring experienced employees have greater resources than we have. In addition, in making employment decisions, particularly in the high-technology industries, job candidates often consider the value of the equity they are to receive in connection with their employment. Therefore, significant volatility in the price of our stock may adversely affect our ability to attract or retain technical personnel. Furthermore, changes to accounting principles generally accepted in the United States relating to the expensing of stock options may discourage us from granting the sizes or types of stock options that job candidates may require to accept our offer of employment. If we fail to attract new technical personnel or fail to retain and motivate our current employees, our business and future growth prospects could be severely harmed.

We may be sued by third parties for alleged infringement of their proprietary rights, which could be costly, time-consuming and limit our ability to use certain technologies in the future.

If the size of our markets increases, we would be more likely to be subject to claims that our technologies infringe upon the intellectual property or other proprietary rights of third parties. In addition, the vendors from which we license technology used in our products could become subject to similar infringement claims. Our vendors, or we, may not be able to withstand third-party infringement claims. Any claims, with or without merit, could be time-consuming and expensive, and could divert our management's attention away from the execution of our business plan. Moreover, any settlement or adverse judgment resulting from the claim could require us to pay substantial amounts or obtain a license to continue to use the technology that is the subject of the claim, or otherwise restrict or prohibit our use of the technology. There can be no assurance that we would be able to obtain a license from the third party asserting the claim on commercially reasonable terms, if at all, that we would be able to develop alternative technology on a timely basis, if at all, or that we would be able to obtain a license to use a suitable alternative technology to permit us to continue offering, and our customers to continue using, our affected product. In addition, we may be required to indemnify our retail and distribution partners for third-party intellectual property infringement claims, which would increase the cost to us of an adverse ruling in such a claim. An adverse determination could also prevent us from offering our products to others. Infringement claims asserted against us or our vendors may have a material adverse effect on our business, results of operations or financial condition.

If we fail to maintain or increase our consumer robot sales through our primary distribution channels, which include third-party retailers, our product sales and results of operations would be negatively impacted.

Chain stores and other national retailers are the primary distribution channels for our consumer robots. We do not have long-term contracts regarding purchase volumes with any of our retail partners. As a result, purchases generally occur on an order-by-order basis, and the relationships, as well as particular orders, can generally be terminated or otherwise materially changed at any time by our retail partners. A decision by a major retail partner, whether motivated by competitive considerations, financial difficulties, economic conditions or otherwise, to decrease its purchases from us, to reduce the shelf space for our products or to change its manner of doing business with us could significantly damage our consumer product sales and negatively impact our business, financial condition and results of operations. In addition, during recent years, various retailers, including some of our partners, have experienced significant changes and difficulties, including consolidation of ownership, increased centralization of purchasing decisions, restructurings, bankruptcies and liquidations. These and other financial problems of some of our retailers increase the risk of extending credit to these retailers. A significant adverse change in a retail partner relationship with us or in a retail partner's financial position could cause us to limit or discontinue business with that partner, require us to assume more credit risk relating to that partner's receivables or limit our ability to collect amounts related to previous purchases by that partner, all of which could harm our business and financial condition. Disruption of the iRobot on-line store could also decrease our home care robot sales.

If we fail to enhance our brand, our ability to expand our customer base will be impaired and our operating results may suffer.

We believe that developing and maintaining awareness of the iRobot brand is critical to achieving widespread acceptance of our existing and future products and is an important element in attracting new customers. Furthermore, we expect the importance of global brand recognition to increase as competition develops. Successful promotion of our brand will depend largely on the effectiveness of our marketing efforts, including our mass media outreach, in-store training and presentations and public relations, and our ability to provide customers with reliable and technically sophisticated robots at competitive prices. If customers do not perceive our products to be of high quality, our brand and reputation could be harmed, which could adversely impact our financial results. In addition, brand promotion efforts may not yield significant revenue or increased revenue sufficient to offset the additional expenses incurred in building our brand. If we incur substantial expenses to promote and maintain our brand, we may fail to attract sufficient customers to realize a return on our brand-building efforts, and our business would suffer.

If our existing collaborations are unsuccessful or we fail to establish new collaborations, our ability to develop and commercialize additional products could be significantly harmed.

If we cannot maintain our existing collaborations or establish new collaborations, we may not be able to develop additional products. We anticipate that some of our future products will be developed and commercialized in collaboration with companies that have expertise outside the robot field. For example, we are currently collaborating with: The Boeing Company, acting by and through its Integrated Defense Systems Combat Systems business unit, on the development of the PackBot SUGV-Early; Lockheed-Martin on the FCS Command Controller device; ICx Nomadics for joint development of explosive and chemical detection unmanned systems, under the Joint Force protection Advanced Security System. Under these collaborations, we may be dependent on our collaborators to fund some portion of development of the product or to manufacture and market either the primary product that is developed pursuant to the collaboration or complementary products required in order to operate our products. In addition, we cannot assure you that we will be able to establish additional collaborative relationships on acceptable terms.

Our existing collaborations and any future collaborations with third parties may not be scientifically or commercially successful. Factors that may affect the success of our collaborations include the following:

- our collaborators may not devote the resources necessary or may otherwise be unable to complete development and commercialization of these potential products;

- our existing collaborations are and future collaborations may be subject to termination on short notice;
- our collaborators may be pursuing alternative technologies or developing alternative products, either on their own or in collaboration with others, that may be competitive with our products, which could affect our collaborators' commitment to the collaboration with us;
- reductions in marketing or sales efforts or a discontinuation of marketing or sales of our products by our collaborators could reduce our revenue;
- our collaborators may terminate their collaborations with us, which could make it difficult for us to attract new collaborators or harm our reputation in the business and financial communities; and
- our collaborators may pursue higher priority programs or change the focus of their development programs, which would weaken our collaborators' commitment to us.

We depend on the experience and expertise of our senior management team and key technical employees, and the loss of any key employee may impair our ability to operate effectively.

Our success depends upon the continued services of our senior management team and key technical employees, such as our project management personnel and senior engineers. Moreover, we often must comply with provisions in government contracts that require employment of persons with specified levels of education and work experience. Each of our executive officers, key technical personnel and other employees could terminate his or her relationship with us at any time. The loss of any member of our senior management team might significantly delay or prevent the achievement of our business objectives and could materially harm our business and customer relationships. In addition, because of the highly technical nature of our robots, the loss of any significant number of our existing engineering and project management personnel could have a material adverse effect on our business and operating results.

We are subject to extensive U.S. federal government regulation, and our failure to comply with applicable regulations could subject us to penalties that may restrict our ability to conduct our business.

As a contractor and subcontractor to the U.S. federal government, we are subject to and must comply with various government regulations that impact our operating costs, profit margins and the internal organization and operation of our business. Among the most significant regulations affecting our business are:

- the Federal Acquisition Regulations and supplemental agency regulations, which comprehensively regulate the formation and administration of, and performance under government contracts;
- the Truth in Negotiations Act, which requires certification and disclosure of all cost and pricing data in connection with contract negotiations;
- the Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under cost-based government contracts;
- the Foreign Corrupt Practices Act, which prohibits U.S. companies from providing anything of value to a foreign official to help obtain, retain or direct business, or obtain any unfair advantage;
- the False Claims Act and the False Statements Act, which, respectively, impose penalties for payments made on the basis of false facts provided to the government, and impose penalties on the basis of false statements, even if they do not result in a payment;
- laws, regulations and executive orders restricting the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data;
- Certain contracts from the U.S. federal government may require us to maintain certain certifications including but not limited to AS9100 and CMMI;
- Contractor Purchasing Systems review (CPSR) requirements, which evaluate the efficiency and effectiveness with which we spend U.S. Government funds; and

- The sale of our products in countries outside the United States is regulated by the governments of those countries. While compliance with such regulation will generally be undertaken by international distributors, we may assist with such compliance and in certain cases may be liable if a distributor fails to comply.

Also, we need special clearances to continue working on and advancing certain of our projects with the U.S. federal government. Obtaining and maintaining security clearances for employees involves a lengthy process, and it is difficult to identify, recruit and retain employees who already hold security clearances. If our employees are unable to obtain security clearances in a timely manner, or at all, or if our employees who hold security clearances are unable to maintain the clearances or terminate employment with us, then a customer requiring classified work could terminate the contract or decide not to renew it upon its expiration. In addition, we expect that many of the contracts on which we will bid will require us to demonstrate our ability to obtain facility security clearances and employ personnel with specified types of security clearances. To the extent we are not able to obtain facility security clearances or engage employees with the required security clearances for a particular contract, we may not be able to bid on or win new contracts, or effectively rebid on expiring contracts. For example, if we were to lose our security clearance, we would be unable to continue to participate in the U.S. Army's Brigade Combat Team Modernization program. Classified programs generally will require that we comply with various Executive Orders, federal laws and regulations and customer security requirements that may include restrictions on how we develop, store, protect and share information, and may require our employees to obtain government clearances.

Our failure to comply with applicable regulations, rules and approvals could result in the imposition of penalties, the loss of our government contracts or our suspension or debarment from contracting with the federal government generally, any of which would harm our business, financial condition and results of operations.

If we fail to protect, or incur significant costs in defending, our intellectual property and other proprietary rights, our business and results of operations could be materially harmed.

Our success depends on our ability to protect our intellectual property and other proprietary rights. We rely primarily on patents, trademarks, copyrights, trade secrets and unfair competition laws, as well as license agreements and other contractual provisions, to protect our intellectual property and other proprietary rights. Significant technology used in our products, however, is not the subject of any patent protection, and we may be unable to obtain patent protection on such technology in the future. Moreover, existing U.S. legal standards relating to the validity, enforceability and scope of protection of intellectual property rights offer only limited protection, may not provide us with any competitive advantages, and may be challenged by third parties. In addition, the laws of countries other than the United States in which we market our products may afford little or no effective protection of our intellectual property. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property or otherwise gaining access to our technology. Unauthorized third parties may try to copy or reverse engineer our products or portions of our products or otherwise obtain and use our intellectual property. Some of our contracts with the U.S. federal government allow the federal government to disclose technical data regarding the products developed on behalf of the government under the contract without constraining the recipient on how it is used. This ability of the government creates the potential that third parties may be able to use this data to compete with us in the commercial sector. If we fail to protect our intellectual property and other proprietary rights, our business, results of operations or financial condition could be materially harmed.

In addition, defending our intellectual property rights may entail significant expense. We believe that certain products in the marketplace may infringe our existing intellectual property rights. We have, from time to time, resorted to legal proceedings to protect our intellectual property and may continue to do so in the future. We may be required to expend significant resources to monitor and protect our intellectual property rights. Any of our intellectual property rights may be challenged by others or invalidated through administrative processes or litigation. If we resort to legal proceedings to enforce our intellectual property rights or to determine the validity and scope of the intellectual property or other proprietary rights of others, the proceedings could result in significant expense to us and divert the attention and efforts of our management and technical employees, even if we were to prevail.

Acquisitions and potential future acquisitions could be difficult to integrate, divert the attention of key personnel, disrupt our business, dilute stockholder value and impair our financial results.

As part of our business strategy, we intend to consider additional acquisitions of companies, technologies and products that we believe could accelerate our ability to compete in our core markets or allow us to enter new markets. Acquisitions involve numerous risks, any of which could harm our business, including:

- difficulties in integrating the operations, technologies, products, existing contracts, accounting and personnel of the target company and realizing the anticipated synergies of the combined businesses;
- difficulties in supporting and transitioning customers, if any, of the target company;
- diversion of financial and management resources from existing operations;
- the price we pay or other resources that we devote may exceed the value we realize, or the value we could have realized if we had allocated the purchase price or other resources to another opportunity;
- risks of entering new markets in which we have limited or no experience;
- potential loss of key employees, customers and strategic alliances from either our current business or the target company's business;
- assumption of unanticipated problems or latent liabilities, such as problems with the quality of the target company's products; and
- inability to generate sufficient revenue to offset acquisition costs.

Acquisitions also frequently result in the recording of goodwill and other intangible assets which are subject to potential impairments in the future that could harm our financial results. In addition, if we finance acquisitions by issuing convertible debt or equity securities, our existing stockholders may be diluted, which could lower the market price of our common stock. As a result, if we fail to properly evaluate acquisitions or investments, we may not achieve the anticipated benefits of any such acquisitions, and we may incur costs in excess of what we anticipate. The failure to successfully evaluate and execute acquisitions or investments or otherwise adequately address these risks could materially harm our business and financial results.

We may not be able to obtain capital when desired on favorable terms, if at all, or without dilution to our stockholders.

We anticipate that our current cash, cash equivalents, cash provided by operating activities and funds available through our working capital line of credit, will be sufficient to meet our current and anticipated needs for general corporate purposes. We operate in an emerging market, however, which makes our prospects difficult to evaluate. It is possible that we may not generate sufficient cash flow from operations or otherwise have the capital resources to meet our future capital needs. For example in fiscal 2007 we consumed \$27 million of our cash and short term investments. If similar consumptions of cash were to continue, we may need additional financing to execute on our current or future business strategies, including to:

- hire additional engineers and other personnel;
- develop new, or enhance existing, robots and robot accessories;
- enhance our operating infrastructure;
- acquire complementary businesses or technologies; or
- otherwise respond to competitive pressures.

If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our stockholders could be significantly diluted, and these newly-issued securities may have rights, preferences or privileges senior to those of existing stockholders. We cannot assure you that additional financing will be available on terms favorable to us, or at all. If adequate funds are not available or are not available on acceptable terms, if and when needed, our ability to fund our operations, take advantage of unanticipated

opportunities, develop or enhance our products, or otherwise respond to competitive pressures would be significantly limited. In addition, our access to credit through our working capital line of credit may be limited by the restrictive financial covenants contained in that agreement, which require us to maintain profitability.

Environmental laws and regulations and unforeseen costs could negatively impact our future earnings.

The manufacture and sale of our products in certain states and countries may subject us to environmental and other regulations. We also face increasing complexity in our product design as we adjust to new and upcoming requirements relating to our products, including the restrictions on lead and certain other substances in electronics that apply to specified electronics products put on the market in the European Union (Restriction of Hazardous Substances in Electrical and Electronic Equipment Directive). Similar laws and regulations have been or may be enacted in other regions, including in the United States, Canada, Mexico, China, the United Kingdom, Germany and Japan. There is no assurance that such existing laws or future laws will not impair future earnings or results of operations.

Business disruptions resulting from international uncertainties could negatively impact our profitability.

We derive, and expect to continue to derive, a portion of our revenue from international sales in various European markets, Canada, Japan, Korea and Singapore. For the fiscal years ended January 2, 2010 and December 27, 2008, sales to non-U.S. customers accounted for 33.3% and 23.4% of total revenue, respectively. Our international revenue and operations are subject to a number of material risks, including, but not limited to:

- difficulties in staffing, managing and supporting operations in multiple countries;
- difficulties in enforcing agreements and collecting receivables through foreign legal systems and other relevant legal issues;
- fewer legal protections for intellectual property;
- foreign and U.S. taxation issues, tariffs, and international trade barriers;
- difficulties in obtaining any necessary governmental authorizations for the export of our products to certain foreign jurisdictions;
- potential fluctuations in foreign economies;
- government currency control and restrictions on repatriation of earnings;
- fluctuations in the value of foreign currencies and interest rates;
- general economic and political conditions in the markets in which we operate;
- domestic and international economic or political changes, hostilities and other disruptions in regions where we currently operate or may operate in the future;
- changes in foreign currency exchange rates;
- different and changing legal and regulatory requirements in the jurisdictions in which we currently operate or may operate in the future; and
- Outside of the United States, we primarily rely on a network of exclusive distributors, some of whom may be operating without written contracts.

Negative developments in any of these areas in one or more countries could result in a reduction in demand for our products, the cancellation or delay of orders already placed, threats to our intellectual property, difficulty in collecting receivables, and a higher cost of doing business, any of which could negatively impact our business, financial condition or results of operations. Moreover, our sales, including sales to customers outside the United States, are primarily denominated in U.S. dollars, and downward fluctuations in the value of foreign currencies relative to the U.S. dollar may make our products more expensive than other products, which could harm our business.

If we experience a disaster or other business continuity problem, we may not be able to recover successfully, which could cause material financial loss, loss of human capital, regulatory actions, reputational harm, or legal liability.

If we experience a local or regional disaster or other business continuity problem, such as an earthquake, terrorist attack, pandemic or other natural or man-made disaster, our continued success will depend, in part, on the availability of our personnel, our office facilities, and the proper functioning of our computer, telecommunication and other related systems and operations. As we grow our operations in new geographic regions, the potential for particular types of natural or man-made disasters, political, economic or infrastructure instabilities, or other country- or region-specific business continuity risks increases.

If we suffer any data breaches involving the designs, schematics or source code for our products, our business and financial results could be adversely affected.

We securely store our designs, schematics and source code for our products as they are created. A breach, whether physical, electronic or otherwise, of the systems on which this sensitive data is stored could lead to damage or piracy of our products. If we are subject to data security breaches, we may have a loss in sales or increased costs arising from the restoration or implementation of additional security measures, either of which could materially and adversely affect our business and financial results.

If we are unable to continue to obtain U.S. federal government authorization regarding the export of our products, or if current or future export laws limit or otherwise restrict our business, we could be prohibited from shipping our products to certain countries, which would harm our ability to generate revenue.

We must comply with U.S. laws regulating the export of our products. In addition, we are required to obtain a license from the U.S. federal government to export our PackBot, Warrior and SUGV lines of tactical military robots. We cannot be sure of our ability to obtain any licenses required to export our products or to receive authorization from the U.S. federal government for international sales or domestic sales to foreign persons. Moreover, the export regimes and the governing policies applicable to our business are subject to change. We cannot assure you of the extent that such export authorizations will be available to us, if at all, in the future. In some cases where we act as a subcontractor, we rely upon the compliance activities of our prime contractors, and we cannot assure you that they have taken or will take all measures necessary to comply with applicable export laws. If we or our prime contractor partners cannot obtain required government approvals under applicable regulations in a timely manner or at all, we would be delayed or prevented from selling our products in international jurisdictions, which could materially harm our business, operating results and ability to generate revenue.

State and local taxing authorities may determine that we are required to collect and remit sales tax in additional jurisdictions.

We collect and remit sales tax in states in which we have a physical presence or in which we believe nexus exists, which obligates us to collect sales tax. Other states may, from time to time, claim that we have state-related activities constituting a sufficient nexus to require such collection. Additionally, many other states seek to impose sales tax collection obligations on companies that sell goods to customers in their state, or directly to the state and its political subdivisions, even without a physical presence. A successful assertion by one or more states that we should collect sales tax on the sale of merchandise could result in substantial tax liabilities related to past sales.

Currently, U.S. Supreme Court decisions restrict the imposition of obligations to collect state and local sales and use taxes with respect to sales made over the Internet. However, a number of states, as well as the U.S. Congress, have been considering initiatives that could limit or supersede the Supreme Court's position regarding sales and use taxes on Internet sales. If any of these initiatives were successful, we could be required to collect sales and use taxes in additional states, which could result in substantial tax liabilities and penalties in connection with past sales.

Our income tax provision and other tax liabilities may be insufficient if taxing authorities are successful in asserting tax positions that are contrary to our position. Additionally, there is no guarantee that we will realize our deferred tax assets.

From time to time, we are audited by various federal, state and local authorities regarding income tax matters. Significant judgment is required to determine our provision for income taxes and our liabilities for federal, state, local and other taxes. Although we believe our approach to determining the appropriate tax treatment is supportable and in accordance with relevant authoritative guidance it is possible that the final tax authority will take a tax position that is materially different than that which is reflected in our income tax provision. Such differences could have a material adverse effect on our income tax provision or benefit, in the reporting period in which such determination is made and, consequently, on our results of operations, financial position and/or cash flows for such period.

At January 2, 2010, we had gross deferred tax assets of \$18.6 million and a valuation allowance of \$3.8 million resulting in net deferred tax asset of \$14.8 million. Future adjustments, either increases or decreases, to our deferred tax asset valuation allowance will be determined based upon changes in the expected realization of our net deferred tax assets. The realization of our deferred tax assets ultimately depends on the existence of sufficient taxable income in either the carryback or carryforward periods under the tax law. Due to significant estimates utilized in establishing the valuation allowance and the potential for changes in facts and circumstances, it is possible that we will be required to record adjustments to the valuation allowance in future reporting periods. Our results of operations would be impacted negatively if we determine that increases to our deferred tax asset valuation allowance are required in a future reporting period.

Our directors and management will exercise significant control over our company, which will limit your ability to influence corporate matters.

As of January 2, 2010, our directors and executive officers and their affiliates collectively beneficially owned approximately 20.6% of our outstanding common stock. As a result, these stockholders, if they act together, will be able to influence our management and affairs and all matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. This concentration of ownership may have the effect of delaying or preventing a change in control of our company and might negatively affect the market price of our common stock.

Provisions in our certificate of incorporation and by-laws, our shareholder rights agreement or Delaware law might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the trading price of our common stock.

Provisions of our certificate of incorporation and by-laws and Delaware law may discourage, delay or prevent a merger, acquisition or other change in control that stockholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares of our common stock. These provisions may also prevent or frustrate attempts by our stockholders to replace or remove our management. These provisions include:

- limitations on the removal of directors;
- a classified board of directors so that not all members of our board are elected at one time;
- advance notice requirements for stockholder proposals and nominations;
- the inability of stockholders to act by written consent or to call special meetings;
- the ability of our board of directors to make, alter or repeal our by-laws; and
- the ability of our board of directors to designate the terms of and issue new series of preferred stock without stockholder approval.

The affirmative vote of the holders of at least 75% of our shares of capital stock entitled to vote is necessary to amend or repeal the above provisions of our certificate of incorporation. In addition, absent approval of our board of

directors, our by-laws may only be amended or repealed by the affirmative vote of the holders of at least 75% of our shares of capital stock entitled to vote.

We have also adopted a shareholder rights agreement that entitles our stockholders to acquire shares of our common stock at a price equal to 50% of the then-current market value in limited circumstances when a third party acquires or announces its intention to acquire 15% or more of our outstanding common stock.

In addition, Section 203 of the Delaware General Corporation Law prohibits a publicly-held Delaware corporation from engaging in a business combination with an interested stockholder, generally a person which together with its affiliates owns, or within the last three years has owned, 15% of our voting stock, for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in a prescribed manner.

The existence of the foregoing provisions and anti-takeover measures could limit the price that investors might be willing to pay in the future for shares of our common stock. They could also deter potential acquirers of our company, thereby reducing the likelihood that you could receive a premium for your common stock in an acquisition.

ITEM 1B. *UNRESOLVED STAFF COMMENTS*

None.

ITEM 2. *PROPERTIES*

Our corporate headquarters are located in Bedford, Massachusetts, where we lease approximately 157,000 square feet. This lease expires on May 1, 2020. We lease 15,700 square feet in Durham, North Carolina supporting our government and industrial division's unmanned underwater vehicles. We lease 6,150 square feet of space at a facility in Burlington, Massachusetts, for our prototype work on unmanned ground vehicles. We also lease 7,550 square feet in Mysore, India and we lease smaller facilities in Hong Kong; Shenzhen, China; London, England; San Luis Obispo, California; and Crystal City, Virginia. We do not own any real property. We believe that our leased facilities and additional or alternative space available to us will be adequate to meet our needs for the foreseeable future.

ITEM 3. *LEGAL PROCEEDINGS*

From time to time and in the ordinary course of business, we are subject to various claims, charges and litigation. The outcome of litigation cannot be predicted with certainty and some lawsuits, claims or proceedings may be disposed of unfavorably to us, which could materially affect our financial condition or results of operations.

ITEM 4. *SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS*

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed on the NASDAQ Global Market under the symbol "IRBT". The following table sets forth, for the periods indicated, the high and low sales prices per share for our common stock as reported on the NASDAQ Global Market.

	<u>High</u>	<u>Low</u>
Fiscal 2008:		
First quarter	\$22.42	\$16.76
Second quarter	\$18.63	\$12.48
Third quarter	\$17.62	\$11.29
Fourth quarter	\$15.82	\$ 7.17
Fiscal 2009:		
First quarter	\$10.20	\$ 7.00
Second quarter	\$13.50	\$ 7.40
Third quarter	\$13.59	\$10.21
Fourth quarter	\$17.85	\$11.23

As of February 16, 2010, there were approximately 25,095,696 shares of our common stock outstanding held by approximately 137 stockholders of record and the last reported sale price of our common stock on the NASDAQ Global Market on February 16, 2010 was \$16.88 per share.

Dividend Policy

We have never declared or paid any cash dividends on our capital stock. We currently expect to retain future earnings, if any, to finance the growth and development of our business and we do not anticipate paying any cash dividends in the foreseeable future.

Issuer Purchases of Equity Securities

During the fiscal quarter ended January 2, 2010, there were no repurchases made by us or on our behalf, or by any "affiliated purchasers," of shares of our common stock.

ITEM 6. SELECTED FINANCIAL DATA

The selected historical financial data set forth below as of January 2, 2010 and December 27, 2008 and for the years ended January 2, 2010, December 27, 2008 and December 29, 2007 are derived from our financial statements, which have been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm, and which are included elsewhere in this Annual Report on Form 10-K. The selected historical financial data as of December 29, 2007, December 30, 2006 and December 31, 2005 and for the years ended December 30, 2006 and December 31, 2005 are derived from our financial statements, which have been audited by PricewaterhouseCoopers LLP and which are not included elsewhere in this Annual Report.

The following selected consolidated financial data should be read in conjunction with our consolidated financial statements, the related notes and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included elsewhere in this Annual Report on Form 10-K. The historical results are not necessarily indicative of the results to be expected for any future period.

	Year Ended				
	January 2, 2010	December 27, 2008	December 29, 2007	December 30, 2006	December 31, 2005
(In thousands, except earnings per share amounts)					
Consolidated Statements of Operations:					
Revenue					
Product revenue	\$262,199	\$281,187	\$227,457	\$167,687	\$124,616

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information contained in this section has been derived from our consolidated financial statements and should be read together with our consolidated financial statements and related notes included elsewhere in this Annual Report on Form 10-K. This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended, or the Exchange Act, and are subject to the "safe harbor" created by those sections. In particular, statements contained in this Annual Report on Form 10-K that are not historical facts, including, but not limited to statements concerning new product sales, product development and offerings, Roomba, Scooba, Looj and Verro products, PackBot tactical military robots, the Small Unmanned Ground Vehicle, Unmanned Underwater Vehicle, our home robot and government and industrial robot divisions, competition and strategy and our market position, market acceptance of our products, seasonal factors, revenue recognition, profits, growth of revenues, composition of revenues, cost of revenues, operating expenses, sales, marketing and support expenses, general and administrative expenses, research and development expenses, compensation costs, our ability to attract and retain qualified personnel, credit facility and equipment facility, valuations of investments, valuation and composition of stock-based awards, and liquidity, constitute forward-looking statements and are made under these safe harbor provisions. Some of the forward-looking statements can be identified by the use of forward-looking terms such as "believes," "expects," "may," "will," "should," "could," "seek," "intends," "plans," "estimates," "anticipates," or other comparable terms. Forward-looking statements involve inherent risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. We urge you to consider the risks and uncertainties discussed in greater detail under the heading "Risk Factors" in evaluating our forward-looking statements. We have no plans to update our forward-looking statements to reflect events or circumstances after the date of this report. We caution readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made.

Overview

iRobot designs and builds robots that make a difference. For over 20 years, we have developed proprietary technology incorporating advanced concepts in navigation, mobility, manipulation and artificial intelligence to build industry-leading robots. Our Roomba floor vacuuming robot and Scooba floor washing robot perform time-consuming domestic chores in the home, while our Looj gutter cleaning robot and Verro pool cleaning robot perform tasks outside the home. Our PackBot and Small Unmanned Ground Vehicle (SUGV) tactical ground military robots perform battlefield reconnaissance and bomb disposal. Our Negotiator ground robot performs multi-purpose tasks for local police and first responders. Our 1Ka Seaglider unmanned underwater robot performs long endurance oceanic missions. We sell our robots to consumers through a variety of distribution channels, including chain stores and other national retailers, and through our on-line store, and to the U.S. military and other government agencies worldwide. We maintain certifications for AS9100 and Capability Maturity Model Integration, or CMMI. These certifications enable us to service our military products and services.

As of January 2, 2010, we had 538 full-time employees. We have developed expertise in the disciplines necessary to build durable, high-performance and cost-effective robots through the close integration of software, electronics and hardware. Our core technologies serve as reusable building blocks that we adapt and expand to develop next generation and new products, reducing the time, cost and risk of product development. Our significant expertise in robot design and engineering, combined with our management team's experience in military and consumer markets, positions us to capitalize on the expected growth in the market for robots.

Over the past seven years, we have sold approximately 5 million of our home care robots. We have also sold more than 2,900 of our PackBot tactical military robots, most of which have been sold to the U.S. military and deployed on missions in Afghanistan and Iraq.

Although we have successfully launched consumer and government and industrial products, our continued success depends upon our ability to respond to a number of future challenges. We believe the most significant of these challenges include increasing competition in the markets for both our consumer and government and

industrial products, our ability to obtain U.S. federal government funding for research and development programs, and our ability to successfully develop and introduce products and product enhancements.

Initial Public Offering

On November 15, 2005, we completed our initial public offering of 4,945,000 shares of common stock at \$24.00 per share, comprised of 3,260,870 primary shares and 1,684,130 shares offered by selling stockholders, which includes the exercise of the over-allotment option by the underwriters of the offering. In connection with the offering, all of the outstanding shares of our preferred stock were converted into an equal number of shares of common stock. The sale of the 3,260,870 shares of common stock in connection with our initial public offering resulted in net proceeds to us of approximately \$70.4 million after deducting underwriters' discounts and offering-related expenses. A summary of the terms of the offering can be found in our Registration Statement No. 333-126907 on Form S-1, as amended, as filed with the Securities and Exchange Commission.

Revenue

We currently derive revenue from product sales and research and development programs. Product revenue is derived from the sale of our various home cleaning robots and government and industrial robots and related accessories. Research and development revenue is derived from the execution of contracts awarded by the U.S. federal government, other governments and a small number of other partners. In the future, we expect to derive increasing revenue from product maintenance and support services due to a focused effort to market these services to the expanding installed base of our robots.

We currently derive a majority of our product revenue from the sale of our home cleaning robots and our PackBot tactical military robots. For the fiscal years ended January 2, 2010 and December 27, 2008, product revenues accounted for 87.8% and 91.4% of total revenue, respectively. For the fiscal years ended January 2, 2010 and December 27, 2008, our funded research and development contracts accounted for approximately 12.2% and 8.6% of our total revenue, respectively. We expect to continue to perform funded research and development work with the intent of leveraging the technology developed to advance our new product development efforts. In the future, however, we expect that revenue from funded research and development contracts could grow modestly on an absolute dollar basis and represent a decreasing percentage of our total revenue due to the anticipated growth in consumer and military product revenue.

For the fiscal years ended January 2, 2010 and December 27, 2008 approximately 56.9% and 56.0%, respectively, of our home robot product revenue resulted from sales to 15 customers. For fiscal 2007 the customers were comprised primarily of U.S. retailers, and for fiscal 2008, the customers were comprised of both U.S. retailers and international distributors. Direct-to-consumer revenue generated through our on-line store accounted for 15.4% of our home robot product revenue for the fiscal year ended January 2, 2010 compared to 17.7% in the fiscal year ended December 27, 2008. In addition, 78.6% and 93.3% of military product revenue, and 94.5% and 89.8% of funded research and development contract revenue, resulted from orders and contracts with the U.S. federal government in the fiscal years ended January 2, 2010 and December 27, 2008, respectively.

For the fiscal years ended January 2, 2010 and December 27, 2008, sales to non-U.S. customers accounted for 33.3% and 23.4% of total revenue, respectively.

Our revenue from product sales is generated through sales to our retail distribution channels, our distributor network and to certain U.S. and foreign governments. We recognize revenue from the sales of home robots under the terms of agreements with customers upon transfer of title and risk of loss to the customer, net of estimated returns, provided that collection is determined to be probable and no significant obligations remain.

Revenue from consumer product sales is significantly seasonal, with a majority of our consumer product revenue generated in the second half of the year (in advance of the holiday season). The timing of holiday season shipments could materially affect our third or fourth quarter consumer product revenue in any fiscal year. Revenue from our military robot sales and revenue from funded research and development contracts are occasionally influenced by the September 30 fiscal year-end of the U.S. federal government, but are not otherwise significantly

seasonal. In addition, our revenue can be affected by the timing of the release of new products and the award of new contracts.

Cost of Revenue

Cost of product revenue includes the cost of raw materials and labor that go into the development and manufacture of our products as well as manufacturing overhead costs such as manufacturing engineering, quality assurance, logistics and warranty costs. For the fiscal years ended January 2, 2010 and December 27, 2008, cost of product revenue was 67.4% and 67.7% of total product revenue, respectively. Raw material costs, which are our most significant cost items, can fluctuate materially on a periodic basis, although many components have been historically stable. Additionally, unit costs can vary significantly depending on the mix of products sold. There can be no assurance that our costs of raw materials will not increase. Labor costs also comprise a significant portion of our cost of revenue. Compared to our PackBot tactical military robots, labor costs for our home robots comprise a greater percentage of the associated cost of revenue. We outsource the manufacture of our home robots to contract manufacturers in China. While labor costs in China traditionally have been favorable compared to labor costs elsewhere in the world, including the United States, we believe that labor in China is becoming more scarce. Consequently, the labor costs for our home robots could increase in the future.

Cost of contract revenue includes the direct labor costs of engineering resources committed to funded research and development contracts, as well as third-party consulting, travel and associated direct material costs. Additionally, we include overhead expenses such as indirect engineering labor, occupancy costs associated with the project resources, engineering tools and supplies and program management expenses. For the fiscal years ended January 2, 2010 and December 27, 2008, cost of contract revenue was 84.5% and 90.4% of total contract revenue, respectively.

Gross Margin

Our gross margin as a percentage of revenue varies according to the mix of product and contract revenue, the mix of products sold, total sales volume, the level of defective product returns, and levels of other product costs such as warranty, scrap, re-work and manufacturing overhead. For the years ended January 2, 2010 and December 27, 2008, gross margin was 30.5% and 30.4% of total revenue, respectively.

Research and Development Expenses

Research and development expenses consist primarily of:

- salaries and related costs for our engineers;
- costs for high technology components used in product and prototype development; and
- costs of test equipment used during product development.

We have significantly expanded our research and development capabilities and expect to continue to expand these capabilities in the future. We are committed to consistently maintaining the level of innovative design and development of new products as we strive to enhance our ability to serve our existing consumer and military markets as well as new markets for robots. In October 2009, we announced the establishment of a newly-created healthcare business unit, committed to exploring the potential of robotics as an assistive technology to promote wellness and enhance quality of life for seniors. We anticipate that research and development expenses will increase in absolute dollars for the foreseeable future.

For the fiscal years ended January 2, 2010 and December 27, 2008, research and development expense was \$14.7 million and \$17.6 million, or 4.9% and 5.7% of total revenue, respectively.

In addition to our internal research and development activities discussed above, we incur research and development expenses under funded development arrangements with both governments and other third parties. For the fiscal years ended January 2, 2010 and December 27, 2008, these expenses amounted to \$30.8 million and \$23.9 million, respectively. In accordance with generally accepted accounting principles, these expenses have been classified as cost of revenue rather than research and development expense. For the years ended January 2, 2010,

December 27, 2008 and December 29, 2007, the combined investment in future technologies, classified as cost of revenue and research and development expense, was \$45.5 million, \$41.5 million and \$35.9 million, respectively.

Selling, General and Administrative Expenses

Our selling, general and administrative expenses consist primarily of:

- salaries and related costs for sales and marketing personnel;
- salaries and related costs for executives and administrative personnel;
- advertising, marketing and other brand-building costs;
- fulfillment costs associated with direct-to-consumer sales through our on-line store;
- customer service costs;
- professional services costs;
- information systems and infrastructure costs;
- travel and related costs; and
- occupancy and other overhead costs.

We anticipate that selling, general and administrative expenses will increase in absolute dollars but remain relatively flat as a percentage of revenue in the foreseeable future as we continue to build the iRobot brand and also maintain company profitability.

For the fiscal years ended January 2, 2010 and December 27, 2008, selling, general and administrative expense was \$71.0 million and \$75.7 million, or 23.8% and 24.6% of total revenue, respectively.

Litigation and Related Expenses

In fiscal 2007, we incurred \$2.3 million of litigation and settlement-related costs associated with two related lawsuits filed by us in August 2007. The first of these lawsuits was filed in Massachusetts Superior Court, and subsequently transferred to the United States District Court for the District of Massachusetts, against Robotic FX, Inc. and Jameel Ahed alleging, among other things, misappropriation of trade secrets and breach of contract. The second lawsuit was filed in the United States District Court for the Northern District of Alabama against Robotic FX, Inc. alleging willful infringement of two patents owned by us. See Note 11 to the Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K for a more detailed discussion of this litigation and related settlement.

Fiscal Periods

We operate and report using a 52-53 week fiscal year ending on the Saturday closest to December 31. Accordingly, our fiscal quarters will end on the Saturday that falls closest to the last day of the third month of each quarter.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our actual results may differ from these estimates.

We believe that of our significant accounting policies, which are described in the notes to our consolidated financial statements, the following accounting policies involve a greater degree of judgment and complexity. Accordingly, we believe that the following accounting policies are the most critical to aid in fully understanding and evaluating our consolidated financial condition and results of operations.

Revenue Recognition

We recognize revenue from sales of consumer products under the terms of the customer agreement upon transfer of title and risk of loss to the customer, provided the price is fixed or determinable, collection is determined to be probable and no significant obligations remain. Sales to resellers are subject to agreements allowing for limited rights of return for defective products only, rebates and price protection. We have typically not taken product returns except for defective products. Accordingly, we reduce revenue for our estimates of liabilities for these rights at the time the related sale is recorded. We establish a provision for sales returns for products sold by resellers directly based on historical return experience and other relevant data. Our international distributor agreements do not currently allow for product returns and, as a result, no reserve for returns is established for this group of customers. We have aggregated and analyzed historical returns from resellers and end users which form the basis of our estimate of future sales returns by resellers or end users. When a right of return exists, the provision for these estimated returns is recorded as a reduction of revenue at the time that the related revenue is recorded. If actual returns from retailers differ significantly from our estimates, such differences could have a material impact on our results of operations for the period in which the actual returns become known. Our returns reserve is calculated as a percentage of gross consumer product revenue. A one percentage point increase or decrease in our actual experience of returns would have a material impact on our quarterly and annual results of operations. The estimates for returns are adjusted periodically based upon historical rates of returns. The estimates and reserve for rebates and price protection are based on specific programs, expected usage and historical experience. Actual results could differ from these estimates. If future trends or our ability to estimate were to change significantly from those experienced in the past, incremental reductions or increases to revenue may result based on this new experience.

Under cost-plus research and development contracts, we recognize revenue based on costs incurred plus a pro-rata portion of the total fixed fee. We recognize revenue on firm fixed price (FFP) contracts using the percentage-of-completion method. For government product FFP contracts revenue is recognized as the product is shipped or in accordance with the contract terms. Costs and estimated gross margins on contracts are recorded as work is performed based on the percentage that incurred costs bear to estimated total costs utilizing the most recent estimates of costs and funding. Changes in job performance, job conditions and estimated profitability, including those arising from final contract settlements and government audit, may result in revisions to costs and income, and are recorded or recognized, as the case may be, in the period in which the revisions are determined. Since many contracts extend over a long period of time, revisions in cost and funding estimates during the progress of work have the effect of adjusting earnings applicable to past performance in the current period. When the current contract estimate indicates a loss, provision is made for the total anticipated loss in the current period. Revenue earned in excess of billings, if any, is recorded as unbilled revenue. Billings in excess of revenue earned, if any, are recorded as deferred revenue.

Accounting for Stock-Based Awards

Effective January 1, 2006, we adopted the relevant authoritative guidance which establishes accounting for equity instruments exchanged for employee services. Under the provisions of this guidance, share-based compensation cost is measured at the grant date, based on the calculated fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grants). We adopted the prospective transition method as provided by this guidance and, accordingly financial statement amounts for the prior periods presented in this Annual Report on Form 10-K have not been restated to reflect the fair value method of expensing share-based compensation. Prior to January 1, 2006, we accounted for share-based compensation to employees in accordance with the authoritative guidance in effect at that time.

In a review of our stock-based compensation accounting methodology performed during the second quarter of fiscal 2007, we determined that a cumulative adjustment of \$0.5 million of incremental stock-based compensation expense, and a balance sheet reclassification of \$0.8 million from deferred compensation to additional paid-in capital, were required due to a correction in the application of the relevant authoritative guidance. Upon adoption of this guidance on January 1, 2006, we incorrectly valued 259,700 stock options that were granted between the date that we filed our initial Form S-1 registration statement with the Securities and Exchange Commission on July 27, 2005 and the date we became a public company (November 8, 2005). We believe that this adjustment did not have a material impact to our full year results for 2007. In addition, we do not believe the adjustment is material to the

amounts reported by us in previous periods. This cumulative adjustment is included in the gross margin and operating expenses for the fiscal year ended December 29, 2007.

Entities that became public companies after June 15, 2005 and used the minimum value method of measuring equity share options and similar instruments as a non-public company for either recognition or pro forma disclosure purposes under previous authoritative guidance must apply the provisions of the current authoritative guidance prospectively to new and/or modified awards after the adoption of this current guidance. Companies should continue to account for any portion of awards outstanding at the date of initial application of the current authoritative guidance using the accounting principles originally applied to those awards. Accordingly we did not record any cumulative effect of a change in accounting principle associated with the adoption of the current authoritative guidance on January 1, 2006.

Under the provisions of the relevant authoritative guidance, we recognized \$6.3 million of stock-based compensation expense during the fiscal year ended January 2, 2010 for stock options granted subsequent to our initial filing of our Form S-1 with the SEC. The unamortized fair value as of January 2, 2010 associated with these grants was \$10.3 million with a weighted average remaining recognition period of 2.31 years.

The risk-free interest rate is derived from the average U.S. Treasury constant maturity rate, which approximates the rate in effect at the time of grant, commensurate with the expected life of the instrument. The dividend yield is zero based upon the fact that we have never paid and have no present intention to pay cash dividends. The expected term calculation is based upon the simplified method provided under the relevant authoritative guidance, the expected term is developed by averaging the contractual term of the stock option grants (7 or 10 years) with the associated vesting term (typically 4 to 5 years). Given our initial public offering in November 2005 and the resulting short history as a public company, we could not rely solely on company specific historical data for purposes of establishing expected volatility. Consequently, we performed an analysis that included company specific historical data combined with data of several peer companies with similar expected option lives to develop expected volatility assumptions.

Based upon the above assumptions, the weighted average fair value of each stock option granted for the fiscal year ended January 2, 2010 was \$4.91, excluding the new options issued in conjunction with the stock option exchange program for which no incremental compensation expense was realized.

During the fiscal year ended January 2, 2010, the Company recognized \$0.1 million and \$1.0 million of stock based compensation associated with restricted stock awards and restricted stock units, respectively. Unamortized expense associated with restricted stock awards and restricted stock units at January 2, 2010, was \$0.1 million and \$3.2 million, respectively.

We have assumed a forfeiture rate for all stock options, restricted stock awards and restricted stock-based units granted subsequent to the Company's initial filing of its Form S-1 with the SEC. In the future, we will record incremental stock-based compensation expense if the actual forfeiture rates are lower than estimated and will record a recovery of prior stock-based compensation expense if the actual forfeitures are higher than estimated.

Accounting for stock-based awards requires significant judgment and the use of estimates, particularly surrounding assumptions such as stock price volatility and expected option lives, as well as expected option forfeiture rates to value equity-based compensation.

Accounting for Income Taxes

Deferred taxes are determined based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. Valuation allowances are provided if based upon the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

We monitor the realization of our deferred tax assets based on changes in circumstances, for example, recurring periods of income for tax purposes following historical periods of cumulative losses or changes in tax laws or regulations. Our income tax provision and our assessment of the ability to realize our deferred tax assets involve significant judgments and estimates. In fiscal 2007, we completed an analysis of historical and projected future

profitability which resulted in the full release of the valuation allowance relating to federal deferred tax assets. We continue to maintain a valuation allowance against state deferred tax assets due to less certainty of their ability to realize given the shorter expiration period associated with these state deferred tax assets and the generation of state tax credits in excess of the state tax liability. At January 2, 2010, we have total deferred tax assets of \$18.6 million and a valuation allowance of \$3.8 million resulting in a net deferred tax asset of \$14.8 million.

During the quarter ending January 2, 2010, we recorded an out-of-period adjustment in the income tax provision of \$0.2 million to correct an error with respect to the earnings of our India subsidiary. We believe that this adjustment did not have a material impact to our full year 2009 results. In addition, we do not believe the adjustment is material to the amounts reported in previous periods.

Warranty

We typically provide a one-year warranty (with the exception of European consumer products which typically have a two-year warranty period and our government and industrial spares and Negotiator products which typically have a warranty period of less than one year) against defects in materials and workmanship and will either repair the goods, provide replacement products at no charge to the customer or refund amounts to the customer for defective products. We record estimated warranty costs, based on historical experience by product, at the time we recognize product revenue. As the complexity of our products increases, we could experience higher warranty claims relative to sales than we have previously experienced, and we may need to increase these estimated warranty reserves.

Inventory Valuation

We value our inventory at the lower of the actual cost of our inventory or its current estimated market value. We write down inventory for obsolescence or unmarketable inventories based upon assumptions about future demand and market conditions. Because of the seasonality of our consumer product sales and inventory levels, obsolescence of technology and product life cycles, we generally write down inventory to net realizable value based on forecasted product demand. Actual demand and market conditions may be lower than those that we project and this difference could have a material adverse effect on our gross margin if inventory write-downs beyond those initially recorded become necessary. Alternatively, if actual demand and market conditions are more favorable than those we estimated at the time of such a write-down, our gross margin could be favorably impacted in future periods.

Overview of Results of Operations

The following table sets forth our results of operations for the periods shown:

	Fiscal Year Ended		
	January 2, 2010	December 27, 2008	December 29, 2007
	(In thousands)		
Revenue			
Product revenue	\$262,199	\$281,187	\$227,457

Comparison of Years Ended January 2, 2010 and December 27, 2008

Revenue

	Fiscal Year Ended		Dollar Change	Percent Change
	January 2, 2010	December 27, 2008		
Total Revenue	\$298,617	\$307,621	\$(9,004)	(2.9)%

Our revenue decreased 2.9% to \$298.6 million in fiscal 2009 from \$307.6 million in fiscal 2008. Revenue decreased approximately \$7.7 million, or 4.5%, in our home robots division and \$1.3 million, or 0.9%, in our government and industrial division.

The \$7.7 million decrease in revenue from our home robots division was driven by a 6.3% decrease in units shipped. Total home robots shipped in fiscal 2009 were approximately 988,000 units compared to approximately 1,054,000 units in fiscal 2008. The decrease in home robot division revenue and units shipped was attributable to decreased domestic demand of our home robot products in both retail and direct channels. The decrease in domestic and direct revenue was partially offset by increased international sales of our home robot products resulting from our increased efforts to expand our global presence. In fiscal 2009, home robot revenue from domestic retailers decreased \$25.8 million and direct to consumers sales through our on-line store decreased \$5.1 million, as compared to fiscal 2008. This was partially offset by an increase of 34.2% of home robots units shipped internationally in fiscal 2009 as compared to fiscal 2008. International home robots revenue increased \$23.2 million in fiscal 2009 as compared to fiscal 2008.

The \$1.3 million decrease in revenue from our government and industrial division was driven by a \$15.0 million decrease in government and industrial robots revenue partially offset by a \$3.7 million increase in product life cycle revenue (spare parts and accessories) and a \$10.0 million increase in recurring contract development revenue generated under research and development contracts. The \$15.0 million decrease in government and industrial robots revenue was due to a 17.0% decrease in units in fiscal 2009 as compared to fiscal 2008. Total government and industrial robots shipped in fiscal 2009 were 789 units compared to 951 units in fiscal 2008. The \$10.0 million increase in recurring contract development revenue generated under research and development contracts was the result of revenue from new contract awards and increased funding on existing contracts for our PackBot, SUGV and research programs and contracts acquired through our September 2008 acquisition of Nekton Research, LLC.

Cost of Revenue

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Total cost of revenue	\$207,421	\$214,150	\$(6,729)	(3.1)%
As a percentage of total revenue	69.5%	69.6%		

Total cost of revenue decreased to \$207.4 million in fiscal 2009, compared to \$214.2 million in fiscal 2008. This decrease was due to the decrease in home robot and government and industrial product units shipped and lower costs associated with product mix in our government and industrial division, partially offset by an increase in cost of contracts resulting from new contract awards and increased funding on existing contracts for our PackBot, SUGV and research programs and contracts acquired through our September 2008 acquisition of Nekton Research, LLC.

Gross Margin

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Total gross margin.	\$91,196	\$93,471	\$(2,275)	(2.4)%
As a percentage of total revenue	30.5%	30.4%		

Gross margin decreased \$2.3 million, or 2.4%, to \$91.2 million (30.5% of revenue) in fiscal 2009, from \$93.5 million (30.4% of revenue) in fiscal 2008. The increase in gross margin as a percentage of revenue was the result of the home robots division gross margin increasing 3.5 percentage points offset by a decrease in the government and industrial division gross margin of 4.2 percentage points. The 3.5 percentage point increase in the home robots division is attributable to price increases and the introduction of higher-priced products into the international market. In addition, domestic margins increased due to an increase in volume and margins on refurbished products in fiscal 2009 as compared to fiscal 2008. Also, during fiscal 2008, we recorded costs but did not record revenue for shipments to Linens “N” Things as a result of its bankruptcy filing. The 4.2 percentage point decrease in the government and industrial division is attributable to higher overhead expense on lower revenue, partially offset by higher margins due to product mix in fiscal 2009 as compared to fiscal 2008.

Research and Development

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Total research and development.	\$14,747	\$17,566	\$(2,819)	(16.0)%
As a percentage of total revenue	4.9%	5.7%		

Research and development expenses decreased by \$2.8 million, or 16.0%, to \$14.7 million (4.9% of revenue) in fiscal 2009, from \$17.6 million (5.7% of revenue) for fiscal 2008. The decrease in research and development

expenses is due to a decrease in compensation and employee-related costs, contractor costs, occupancy expenses and material associated with internal research and development projects.

In addition to our research and development activities classified as research and development expense, we incur research and development expenses under funded development arrangements with governments and industrial third parties. For fiscal 2009, these expenses amounted to \$30.8 million compared to \$23.9 million for fiscal 2008. In accordance with generally accepted accounting principles, these expenses have been classified as cost of contract revenue rather than research and development expense. The combined investment in future technologies, classified as cost of revenue and research and development expense, was \$45.5 million for fiscal 2009, compared to \$41.5 for fiscal 2008.

Selling and Marketing

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Total selling and marketing	\$40,902	\$46,866	\$(5,964)	(12.7)%
As a percentage of total revenue	13.7%	15.2%		

Selling and marketing expenses decreased by \$6.0 million, or 12.7%, to \$40.9 million (13.7% of revenue) in fiscal 2009 from \$46.9 million (15.2% of revenue) in fiscal 2008. This was driven by a decrease in our home robots division of \$6.3 million primarily attributable to a reduction of \$4.5 million in television and other marketing expenses for fiscal 2009 as compared to fiscal 2008 as a result of our strategy to aggressively manage our expenses. The decrease of selling and marketing expenses in our home robots division was also attributable to decreases of \$1.2 million in sales commission expenses as a result of lower sales to domestic retailers and \$0.6 million in direct fulfillment expenses related to lower direct sales in fiscal 2009 as compared to fiscal 2008.

In fiscal 2010, we expect to continue to invest in sales and marketing to increase brand awareness. Accordingly, we anticipate selling and marketing expenses will increase in absolute dollars but remain at the same level or slightly above fiscal 2009 as a percentage of revenue.

General and Administrative

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
General and administrative	\$30,110	\$28,840	\$1,270	4.4%
As a percentage of total revenue	10.1%	9.4%		

General and administrative expenses increased by \$1.3 million, or 4.4%, to \$30.1 million (10.1% of revenue) in fiscal 2009 from \$28.8 million (9.4% of revenue) in fiscal 2008. The increase in general and administrative expenses was primarily driven by increases of \$2.7 million in incentive compensation and stock-based compensation partially offset by a decreases of \$1.0 million in bad debt expense and \$0.4 million in compensation and other general and administrative expenses in fiscal 2009 as compared to fiscal 2008.

Other Income (Expense), Net

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Other Income (expense), net	\$(81)	\$926	\$(1,007)	(108.7)%
As a percentage of total revenue	0.0%	0.3%		

Other income (expense), net amounted to \$(0.1) million in fiscal 2009 compared to \$0.9 million in fiscal 2008. Other income (expense), net for fiscal 2009 was directly related to foreign currency exchange losses resulting from

foreign currency exchange rate fluctuations. Other income (expense), net for fiscal 2008 was directly related to interest income resulting from investments in auction rate securities and money market accounts. All of our auction rate securities investments have been settled and our current money market investments earn significantly reduced interest rates as compared to fiscal 2008.

Income Tax Provision

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>January 2, 2010</u>	<u>December 27, 2008</u>		
		(In thousands)		
Income tax provision (benefit)	\$2,026	\$369	\$1,657	N/A
As a percentage of total revenue	0.7%	0.1%		

In fiscal 2009, we recorded a \$2.0 million tax provision based on an effective income tax rate of 37.8%. The provision for income taxes for fiscal 2009 consists of \$1.6 million of federal taxes and \$0.4 million of state taxes. Included in the 2009 provision is a \$0.2 million provision associated with an out-of-period error correction with respect to the earnings of our India subsidiary and a \$0.3 million one-time benefit from the conversion of incentive stock options to non-qualified stock options as a result of our stock option exchange program which concluded in our second fiscal quarter of 2009.

In fiscal 2008, we recorded a \$0.4 million tax provision based on an effective income tax rate of 32.8%. The provision for income taxes for fiscal 2008 consisted of \$0.1 million of federal alternative minimum taxes and \$0.3 million of state taxes.

Comparison of Years Ended December 27, 2008 and December 29, 2007

Revenue

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
Total Revenue	\$307,621	\$249,081	\$58,540	23.5%

Our revenue increased 23.5% to \$307.6 million in fiscal 2008 from \$249.1 million in fiscal 2007. Revenue increased approximately \$29.1 million, or 20.2%, in our home robots division and \$29.4 million, or 28.1%, in our government and industrial division.

The \$29.1 million increase in revenue from our home robots division was driven by a \$25.3 million increase in home robot revenue due to a 17.4% increase in units shipped and a 1.4% increase in average selling prices, along with a \$5.6 million increase in product life cycle revenue (spare parts and accessories). Total home care robots shipped in fiscal 2008 totaled approximately 1,054,000 units compared to approximately 898,000 units in fiscal 2007. The increase in home robot division revenue and units shipped was primarily attributable to increased international demand for our home robot products resulting from our increased efforts to expand our global presence. In fiscal 2008, home robots shipped internationally increased 162% as compared to fiscal 2007. International home robots revenue increased \$44.2 million in fiscal 2008 as compared to fiscal 2007. This was offset by decreases in revenue from domestic retailers of \$12.0 million and direct to consumer revenue of \$3.1 million in fiscal 2008 as compared to fiscal 2007.

The \$29.4 million increase in revenue from our government and industrial division was driven by a \$25.4 million increase in government and industrial robots revenue due to a 101.9% increase in units shipped in fiscal 2008 as compared to fiscal 2007. This was partially offset by a 30.2% decrease in associated net average selling prices related to product mix primarily attributable to a shift of our military product line into lower priced FasTac units as compared to MTRS (Man Transportable Robot System) units last year, and a \$0.7 million decrease in product life cycle revenue (spare parts and accessories).

Recurring contract development revenue generated under research and development contracts increased \$4.8 million in our government and industrial division. Contract revenue in fiscal year 2008 includes \$1.7 million of

contract revenue from recently acquired Nektan. Our increased contract revenue was the result of our acquisition of Nektan, incremental funding on existing contracts and new contract awards during fiscal 2008 offset by reduced revenue on completed prior year contracts

Cost of Revenue

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u> (In thousands)		
Total cost of revenue	\$214,150	\$166,494	\$47,656	28.6%
As a percentage of total revenue	69.6%	66.8%		

Total cost of revenue increased to \$214.2 million in fiscal 2008, compared to \$166.5 million in fiscal 2007. The increase is primarily due to higher costs associated with the 17.4% increase in the unit sales of our home care robots, and the 101.9% increase in the unit sales of our military robots in fiscal 2008 as compared to fiscal 2007.

We incur research and development expenses under funded development arrangements with both governments and industrial third parties, which in accordance with generally accepted accounting principles in the United States of America, are classified as cost of revenue rather than research and development expense. For fiscal 2008, these expenses amounted to \$23.9 million compared to \$18.8 million for the comparable period in 2007. The increase in these expenses was primarily due to increased headcount in our contract research and development function.

Gross Margin

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u> (In thousands)		
Total gross margin	\$93,471	\$82,587	\$10,884	13.2%
As a percentage of total revenue	30.4%	33.2%		

Gross margin increased \$10.9 million, or 13.2%, to \$93.5 million (30.4% of revenue) in fiscal 2008, from \$82.6 million (33.2% of revenue) in fiscal 2007. The decrease in gross margin as a percentage of revenue fiscal 2008 compared to fiscal 2007 was the result of the home robots division gross margin decreasing 3.6 percentage points, and by the government and industrial division gross margin decreasing 1.8 percentage points. The 3.6 percentage point decrease in the home robots division was driven primarily by a retail customer bankruptcy, provisions taken for excess inventory and defective product returns, promotional incentives and channel mix. The government and industrial division decrease was attributable to higher net warranty costs, provisions taken for excess inventory and product mix.

Research and Development

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u> (In thousands)		
Total research and development	\$17,566	\$17,082	\$484	2.8%
As a percentage of total revenue	5.7%	6.9%		

Research and development expenses increased by \$0.5 million, or 2.8%, to \$17.6 million (5.7% of revenue) in fiscal 2008, from \$17.1 million (6.9% of revenue) for fiscal 2007. The increase in research and development expenses is primarily due to an increase in compensation and employee related costs, increased occupancy costs associated with our move to our new facility and the write off of in-process research and development costs relating to the Nektan acquisition, offset by a decrease in consultant expense.

In addition to our internal research and development activities discussed above, we incur research and development expenses under funded development arrangements with both governments and industrial third parties.

For fiscal 2008, these expenses amounted to \$23.9 million compared to \$18.8 million for the comparable period in 2007. These expenses have been classified as cost of revenue rather than research and development expense as they are executed under funded research contracts.

Selling and Marketing

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
Total selling and marketing	\$46,866	\$44,894	\$1,972	4.4%
As a percentage of total revenue	15.2%	18.0%		

Selling and marketing expenses increased by \$2.0 million, or 4.4%, to \$46.9 million (15.2% of revenue) in fiscal 2008 from \$44.9 million (18.0% of revenue) in fiscal 2007.

The increase was primarily driven by increases in our government and industrial division of \$1.7 million in costs associated with bid and proposal activities, increased labor costs and other marketing related costs. Corporate marketing expenses increased by \$0.7 million in fiscal 2008 as compared to fiscal 2007 primarily driven by public relations spending to continue building brand awareness. These increases were partially offset by an overall decrease in selling and marketing expenses of the home robots division of \$0.4 million attributed to a decrease of \$4.0 million related to our direct response infomercial program, which ran during fiscal 2007 and was not repeated in fiscal 2008, \$0.2 decrease in other marketing related costs, offset by increases of \$1.4 million in television, on-line and print media, \$1.8 million in freight and fulfillment related expenses, \$0.7 million in labor and sales commissions.

In fiscal 2009, we expect to continue to invest in sales and marketing to increase brand awareness. Accordingly, we anticipate selling and marketing expenses will remain at the same level or slightly above fiscal 2008 in absolute dollars.

General and Administrative

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
General and administrative	\$28,840	\$20,919	\$7,921	37.9%
As a percentage of total revenue	9.4%	8.4%		

General and administrative expenses increased by \$7.9 million, or 37.9%, to \$28.8 million (9.4% of revenue) in fiscal 2008 from \$20.9 million (8.4% of revenue) in fiscal 2007. The increase in general and administrative expenses was primarily driven by increases of \$2.1 million in compensation expense due to increased headcount, \$1.2 million in stock-based compensation, \$1.0 million in incentive compensation, \$1.0 million in bad debt expense associated with collectability concerns of receivables due from three of our retail customers given their financial condition and bankruptcy filings, \$0.8 million in occupancy and depreciation expenses relating to the move to our new corporate headquarters, \$0.5 million in executive severance and \$0.2 million of goodwill amortization relating to our acquisition of Nekton.

Litigation and Related Expenses

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
Litigation and related expenses	—	\$2,341	\$(2,341)	N/A
As a percentage of total revenue	—	1.0%		

Litigation and related expenses in fiscal 2007 consisted of costs for trade secret misappropriation, breach of contract and patent infringement litigation relating to lawsuits filed against Robotic FX, Inc. and Jameel Ahd as well as settlement costs related to ending the litigation.

Other Income, Net

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
Other Income, net	\$926	\$3,151	\$(2,225)	(70.6)%
As a percentage of total revenue	0.3%	1.3%		

For fiscal 2008, other income, net amounted to \$0.9 million compared to \$3.2 million in fiscal 2007. The decrease in other income, net in fiscal 2008 was primarily related to a \$2.1 million decrease in interest income as a result of lower investment account balances and reduced interest rates earned on the portfolio, and a \$0.1 million increase in other expense, relating to foreign currency losses, as compared to fiscal 2007. Other income, net for fiscal 2008 consisted of \$1.1 million in interest income resulting from our cash and investments, offset by \$0.1 million in interest expense and \$0.1 million in foreign currency losses.

Income Tax Provision

	<u>Fiscal Year Ended</u>		<u>Dollar Change</u>	<u>Percent Change</u>
	<u>December 27, 2008</u>	<u>December 29, 2007</u>		
		(In thousands)		
Income tax provision (benefit)	\$369	\$(8,558)	\$8,927	N/A
As a percentage of total revenue	0.1%	(3.4)%		

In fiscal 2008, we recorded a \$0.4 million tax provision based on an effective income tax rate of 32.8%. The provision for income taxes for fiscal 2008 consists of \$0.1 million of federal alternative minimum taxes and \$0.3 million of state taxes.

In fiscal 2007, we recorded an \$8.6 million tax benefit, which was primarily attributable to the full release of the valuation allowance relating to federal deferred tax assets.

Liquidity and Capital Resources

At January 2, 2010, our principal sources of liquidity were cash and cash equivalents totaling \$71.9 million, short-term investments of \$5.0 million and accounts receivable of \$35.2 million. Prior to our initial public offering in November 2005, we funded our growth primarily with proceeds from the issuance of convertible preferred stock for aggregate net cash proceeds of \$37.5 million, occasional borrowings under a working capital line of credit and cash generated from operations. In our initial public offering, we raised \$70.4 million net of underwriting and professional fees associated with the offering.

We manufacture and distribute our products through contract manufacturers and third-party logistics providers. We believe that this approach gives us the advantages of relatively low capital investment and significant flexibility in scheduling production and managing inventory levels. By leasing our office facilities, we also minimize the cash needed for expansion. Accordingly, our capital spending is generally limited to leasehold improvements, computers, office furniture and product-specific production tooling, internal use software and test equipment. In the fiscal years ended January 2, 2010 and December 27, 2008, we spent \$5.0 million and \$14.8 million, respectively, on capital equipment.

Our strategy for delivering products to our retail customers gives us the flexibility to provide container shipments directly to the retailer from China and, alternatively allows our retail partners to take possession of product on a domestic basis. Accordingly, our home robots product inventory consists of goods shipped to our third-party logistic providers for the fulfillment of retail orders and direct-to-consumer sales. Our inventory of government and industrial products is relatively low as they are generally built to order. Our contract manufacturers

are responsible for purchasing and stocking the majority of components required for the production of our products, and they invoice us when the finished goods are shipped.

Our consumer product sales are, and are expected to continue to be, highly seasonal. This seasonality has historically resulted in a net use of cash in support of operating needs during the second and third quarters of the year, with the low point generally occurring in the third quarter, and a favorable cash flow during the first and fourth quarters. The cash balance of \$71.9 million at January 2, 2010 is primarily the result of our significant focus over the past year on managing working capital, with specific emphasis placed on reducing inventory levels. We have relied on our working capital line of credit to cover short-term cash needs resulting from the seasonality of our consumer business in prior years. We currently do not have any borrowings outstanding under our existing working capital line of credit.

Discussion of Cash Flows

Net cash provided by operating activities for the fiscal year ended January 2, 2010 was \$40.6 million, an increase of \$21.5 million compared to the \$19.1 million of net cash provided by operating activities for the fiscal year ended December 27, 2008. The increase in net cash provided by operating activities was primarily driven by the following factors:

- An increase in cash resulting from an increase in accounts payable, accrued expenses and accrued compensation of \$21.5 million in 2009 compared to a decrease of \$20.7 million in 2008, primarily due to the timing of cash payments under normal operating cycles;
- An increase in cash resulting from a decrease in inventory of \$2.2 million in 2009 compared to a decrease of \$10.7 million in 2008, primarily driven by the implementation of operational initiatives to improve our inventory management and reduce overall inventory levels beginning in 2008, with less of an impact in 2009; and
- An increase in cash resulting from a decrease in accounts receivable of \$0.8 million in 2009 compared to a decrease of \$12.2 million in 2008, primarily driven by improvements in payment terms and accounts receivable management focused on improved accounts receivable turns beginning in 2008, with less of an impact in 2009.

Net cash used in investing activities for the fiscal year ended January 2, 2010 was \$12.5 million, an increase of \$4.5 million compared to the \$8.0 million of net cash used in investing activities for the fiscal year ended December 27, 2008. This increase in net cash used in investing activities was primarily driven by the following:

- Purchase of investments of \$5.0 million in 2009 compared to proceeds from the net sale of investments of \$16.6 million in 2008;
- Purchases of property and equipment associated with the move to our new headquarters in 2008; and
- The purchase of Nekton Research, LLC in 2008, with the initial investment of \$9.7 million compared to an additional investment of \$2.5 million in 2009.

Net cash provided from financing activities for fiscal year ended January 2, 2010 was \$2.9 million, a decrease of \$0.1 million compared to the \$3.0 million of net cash provided by financing activities for the fiscal year ended December 27, 2008.

Working Capital Facility

We have an unsecured revolving credit facility with Bank of America, N.A., which is available to fund working capital and other corporate purposes. The amount available for borrowing under our credit facility is the lesser of: (a) \$45.0 million or (b) amounts available pursuant to a borrowing base calculation determined pursuant to the terms and conditions of the credit facility. As of January 2, 2010, \$43.0 million was available for borrowing. The interest on loans under our credit facility will accrue, at our election, at either (i) Bank of America's prime rate minus 1% or (ii) the Eurodollar rate plus 1.25%. The credit facility will terminate and all amounts outstanding thereunder will be due and payable in full on June 5, 2010.

As of January 2, 2010, we had letters of credit outstanding of \$2.0 million under our working capital line of credit. This credit facility contains customary terms and conditions for credit facilities of this type, including restrictions on our ability to incur or guaranty additional indebtedness, create liens, enter into transactions with affiliates, make loans or investments, sell assets, pay dividends or make distributions on, or repurchase, our stock, and consolidate or merge with other entities.

In addition, we are required to meet certain financial covenants customary with this type of agreement, including maintaining a minimum specified tangible net worth and a minimum specified annual net income.

This credit facility contains customary events of default, including for payment defaults, breaches of representations, breaches of affirmative or negative covenants, cross defaults to other material indebtedness, bankruptcy and failure to discharge certain judgments. If a default occurs and is not cured within any applicable cure period or is not waived, our obligations under the credit facility may be accelerated.

As of January 2, 2010, we were in compliance with all covenants under the credit facility.

On February 12, 2010, we entered into an agreement to amend our credit facility, including the following changes:

- The amount available for borrowing was reduced to \$40 million.
- Under the amended agreement, the interest on loans under our credit facility will accrue, at our election, at either (i) the greater of the BBA LIBOR Daily Floating Rate or the Prime Rate of Lender plus fifty (50) basis points, or (ii) the LIBOR rate plus 2.00%.
- The credit facility termination date was extended to June 5, 2012.
- The borrowing base calculation was deleted from the agreement.
- A minimum specified interest coverage ratio covenant was added to the financial covenants.
- The minimum specified annual net income covenant was replaced with a minimum adjusted EBITDA covenant.

Equipment Financing Facility

We have a \$5.0 million secured equipment facility with Banc of America Leasing & Capital, LLC under which we can finance the acquisition of equipment, furniture and leasehold improvements. We may borrow amounts or enter into lease agreements under the equipment facility until May 1, 2010, with terms from 36 to 60 months depending upon the nature of the collateral. Our obligations under the equipment facility will be secured by any financed equipment.

As of January 2, 2010, we have entered into operating leases for equipment valued at approximately \$0.2 million which has reduced the funds available under this equipment facility to \$4.8 million.

The equipment facility contains customary terms and conditions for equipment facilities of this type, including, without limitation, restrictions on our ability to transfer, encumber or dispose of the financed equipment. In addition, we are required to meet certain financial covenants customary to this type of agreement, including maintaining a minimum specified tangible net worth and a minimum specified annual net income.

The equipment facility contains customary events of default, including for payment defaults, breaches of representations, breaches of affirmative or negative covenants, cross defaults to other material indebtedness, bankruptcy and failure to discharge certain judgments. If a default occurs and is not cured within any applicable cure period or is not waived, or if we repay all of our indebtedness under our credit facility with Bank of America, N.A., our obligations under this equipment facility may be accelerated.

As of January 2, 2010, we were in compliance with all covenants under the equipment facility.

Working Capital and Capital Expenditure Needs

We currently have no material cash commitments, except for normal recurring trade payables, expense accruals and operating leases, all of which we anticipate funding through working capital, funds provided by operating activities and our existing working capital line of credit. We do not currently anticipate significant investment in property, plant and equipment, and we believe that our outsourced approach to manufacturing provides us with flexibility in both managing inventory levels and financing our inventory. We believe our existing cash and cash equivalents, short-term investments, cash provided by operating activities, and funds available through our working capital line of credit will be sufficient to meet our working capital and capital expenditure needs over at least the next twelve months. In the event that our revenue plan does not meet our expectations, we may eliminate or curtail expenditures to mitigate the impact on our working capital. Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our marketing and sales activities, the timing and extent of spending to support product development efforts, the timing of introductions of new products and enhancements to existing products, the acquisition of new capabilities or technologies, and the continuing market acceptance of our products and services. Moreover, to the extent that existing cash and cash equivalents, short-term investments, cash from operations, and cash from short-term borrowing are insufficient to fund our future activities, we may need to raise additional funds through public or private equity or debt financing. As part of our business strategy, we intend to consider additional acquisitions of companies, technologies and products, which could also require us to seek additional equity or debt financing. Additional funds may not be available on terms favorable to us or at all.

Contractual Obligations

We generally do not enter into binding purchase commitments. Our principal commitments consist of obligations under our working capital line of credit, leases for office space and minimum contractual obligations for services. The following table describes our commitments to settle contractual obligations in cash as of January 2, 2010:

	Payments Due by Period				Total
	Less Than 1 Year	1 to 3 Years	3 to 5 Years	More Than 5 Years	
			(In thousands)		
Operating leases	\$2,641	\$ 4,693	\$4,175	\$11,133	\$22,642
Minimum contractual payments	5,000	7,000	—	—	12,000
Other obligations	464	627	—	—	1,091
Total	<u>\$8,105</u>	<u>\$12,320</u>	<u>\$4,175</u>	<u>\$11,133</u>	<u>\$35,733</u>

Our minimum contractual payments consist entirely of payments to our provider of direct fulfillment services for direct to consumer sales of our home robots, which payments are incurred in the ordinary course of business. Based on historical and current operations, we believe that we will exceed these minimum contractual obligations in our ordinary course of business. Other obligations consist of software license and services agreement for our home robots division web support.

Off-Balance Sheet Arrangements

As of January 2, 2010, we had no off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K.

Recently Issued Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board, or FASB issued amendments to the accounting and disclosure requirements for business combinations and noncontrolling interests in consolidated financial statements. The amendment to the accounting and disclosure requirements for business combinations will change how business acquisitions are accounted for and will impact financial statements both on the acquisition date and in subsequent periods. The amendment to the accounting and disclosure requirements for noncontrolling interests in consolidated financial statements will change the accounting and reporting for minority interests, which will be

recharacterized as noncontrolling interests and classified as a component of equity. These amendments are effective for fiscal years beginning on or after December 15, 2008. We adopted these amendments at the beginning of fiscal 2009 and will change our accounting treatment for business combinations and noncontrolling interests, if any, on a prospective basis.

On April 1, 2009, FASB issued an amendment to the accounting and disclosure requirements for assets acquired and liabilities assumed in a business combination that arise from contingencies. This amendment addresses application issues regarding the initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. We adopted this amendment on April 1, 2009 and will change our accounting treatment for business combinations, if any, on a prospective basis.

In May 2009, FASB issued an amendment to the accounting and disclosure requirements for subsequent events. This amendment establishes general standards of accounting for disclosing events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for selecting that date, that is, whether that date represents the date the financial statements were issued or were available to be issued. This amendment is effective for interim or annual financial periods ending after June 15, 2009. The implementation of this amendment did not impact our consolidated financial statements.

In June 2009, FASB issued an amendment to the accounting and disclosure requirements for the consolidation of variable interest entities, or VIEs. The elimination of the concept of a Qualifying Special Purpose Entity removes the exception from applying the consolidation guidance within this amendment. This amendment requires an enterprise to perform a qualitative analysis when determining whether or not it must consolidate a VIE. This amendment also requires an enterprise to continuously reassess whether it must consolidate a VIE. Additionally, this amendment requires enhanced disclosures about an enterprise's involvement with VIEs and any significant change in risk exposure due to that involvement, as well as how its involvement with VIEs impacts the enterprise's financial statements. Finally, an enterprise will be required to disclose significant judgments and assumptions used to determine whether or not to consolidate a VIE. This amendment is effective for financial statements issued for fiscal years beginning after November 15, 2009. We do not expect this amendment to have an impact on our financial position or results of operations.

In June 2009, FASB issued FASB Accounting Standards Codification, or the Codification. The Codification will become the single source for all authoritative Generally Accepted Accounting Principles, or GAAP recognized by FASB to be applied for financial statements issued for periods ending after September 15, 2009. The Codification does not change GAAP and will not have an effect on our financial position or results of operations. We adopted this accounting standard during the three month period ending September 26, 2009.

In September 2009, FASB issued an amendment to the accounting and disclosure requirements for multiple-deliverable revenue arrangements. This guidance addresses how to separate deliverables and how to measure and allocate consideration to one or more units of accounting. Specifically, the guidance requires that consideration be allocated among multiple deliverables based on relative selling prices. The guidance establishes a selling price hierarchy of (1) vendor-specific objective evidence, (2) third-party evidence and (3) estimated selling price. This guidance is effective for annual periods beginning after December 15, 2009 but may be early adopted as of the beginning of an annual period. We are currently evaluating the effect that this guidance will have on our financial position and results of operations.

From time to time, new accounting pronouncements are issued by FASB and are adopted by us as of the specified effective date. Unless otherwise discussed, We believe that the impact of recently issued standards, which are not yet effective, will not have a material impact on our consolidated financial statements upon adoption.

ITEM 7A. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

Foreign Currency Exchange Risk

We maintain sales and business operations in foreign countries. As such, we have exposure to adverse changes in exchange rates associated with operating expenses of our foreign operations, but we believe this exposure to be

immaterial. We currently accept orders for home robot products in currencies other than the U.S. dollar and we expect this practice to continue in the future. We regularly monitor the level of non-U.S. dollar accounts receivable balances to determine if any actions, including possibly entering into foreign currency forward contracts, should be taken to minimize the impact of fluctuating exchange rates on our results of operations.

Interest Rate Sensitivity

At January 2, 2010, we had unrestricted cash and cash equivalents of \$71.9 million and short term investments of \$5.0 million. The unrestricted cash and cash equivalents are held for working capital purposes. We do not enter into investments for trading or speculative purposes. Some of the securities in which we invest, however, may be subject to market risk. This means that a change in prevailing interest rates may cause the principal amount of the investment to fluctuate. To minimize this risk in the future, we intend to maintain our portfolio of cash equivalents in a variety of securities, commercial paper, money market funds, debt securities and certificates of deposit. Due to the short-term nature of these investments, we believe that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in interest rates. As of January 2, 2010, all of our cash equivalents were held in money market accounts.

Our exposure to market risk also relates to the increase or decrease in the amount of interest expense we must pay on our outstanding debt instruments, primarily certain borrowings under our working capital line of credit and our equipment financing facility. The advances under the working capital line of credit bear a variable rate of interest determined as a function of the prime rate or the Eurodollar rate at the time of the borrowing. The advances under the equipment financing facility bear either a variable or fixed rate of interest, at our election, determined as a function of the LIBOR rate at the time of borrowing. At January 2, 2010, we had letters of credit outstanding of \$2.0 million under our working capital line of credit and \$0.2 million outstanding under our equipment financing facility.

Report of Independent Registered Public Accounting Firm

To Board of Directors and Stockholders of
iRobot Corporation:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15 (a) (1) present fairly, in all material respects, the financial position of iRobot Corporation and its subsidiaries at January 2, 2010 and December 27, 2008, and the results of their operations and their cash flows for each of the three years in the period ended January 2, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 2, 2010, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

During 2009, 2008 and 2007, the Company transferred \$2,318, \$893 and \$1,509 respectively, of inventory to property and equipment.

See accompanying Notes to Consolidated Financial Statements

iROBOT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of the Business

iRobot Corporation (“iRobot” or the “Company”) develops robotics and artificial intelligence technologies and applies these technologies in producing and marketing robots. The majority of the Company’s revenue is generated from product sales and government and industrial research and development contracts.

The Company is subject to risks common to companies in high-tech industries including, but not limited to, uncertainty of progress in developing technologies, new technological innovations, dependence on key personnel, protection of proprietary technology, compliance with government regulations, uncertainty of market acceptance of products, the need to obtain financing, if necessary, global economic conditions and associated impact on consumer spending, and changes in policies and spending priorities of the U.S. federal government and other government agencies.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include those of iRobot and its subsidiaries, after elimination of all intercompany accounts and transactions. iRobot has prepared the accompanying consolidated financial statements in conformity with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates these estimates and judgments, including those related to revenue recognition, sales returns, bad debts, warranty claims, inventory reserves, valuation of investments, assumptions used in valuing stock-based compensation instruments and income taxes. The Company bases these estimates on historical and anticipated results, and trends and on various other assumptions that the Company believes are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results may differ from the Company’s estimates.

Fiscal Year-End

The Company operates and reports using a 52-53 week fiscal year ending on the Saturday closest to December 31. Accordingly, the Company’s fiscal quarters will end on the Saturday that falls closest to the last day of the third month of each quarter.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original or remaining maturity of three months or less at the time of purchase to be cash equivalents. The Company invests its excess cash primarily in money market funds or savings accounts of major financial institutions. Accordingly, its cash equivalents are subject to minimal credit and market risk. At January 2, 2010 and December 27, 2008, cash equivalents were comprised of money market and savings account funds totaling \$63.1 million and \$39.5 million, respectively. These cash equivalents are carried at cost, which approximates fair value.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Short Term Investments

The Company's investments are classified as available-for-sale and are recorded at fair value with any unrealized gain or loss recorded as an element of stockholders' equity. The fair value of investments is determined based on quoted market prices at the reporting date for those instruments. As of January 2, 2010, and December 27, 2008, investments consisted of:

	January 2, 2010		December 27, 2008	
	Cost	Fair Market Value	Cost	Fair Market Value
	(In thousands)			
U.S. Government bond	\$5,000	\$4,959	\$—	\$—

As of January 2, 2010, the Company's investment has a maturity date of March 2012.

Revenue Recognition

The Company derives its revenue from product sales, government research and development contracts, and commercial research and development contracts. The Company sells products directly to customers and indirectly through resellers and distributors. The Company recognizes revenue from sales of home robots under the terms of the customer agreement upon transfer of title and risk of loss to the customer, net of estimated returns, provided that collection is determined to be probable and no significant obligations remain. Sales to resellers are subject to agreements allowing for limited rights of return for defective products only, rebates and price protection. The Company has typically not taken product returns except for defective products. Accordingly, the Company reduces revenue for its estimates of liabilities for these rights at the time the related sale is recorded. The Company makes an estimate of sales returns for products sold by resellers directly based on historical returns experience and other relevant data. The Company's international distributor agreements do not currently allow for product returns and, as a result, no reserve for returns is established for this group of customers. The Company has aggregated and analyzed historical returns from resellers and end users which form the basis of its estimate of future sales returns by resellers or end users. When a right of return exists, the provision for these estimated returns is recorded as a reduction of revenue at the time that the related revenue is recorded. If actual returns differ significantly from its estimates, such differences could have a material impact on the Company's results of operations for the period in which the returns become known. The estimates for returns are adjusted periodically based upon historical rates of returns. The estimates and reserve for rebates and price protection are based on specific programs, expected usage and historical experience. Actual results could differ from these estimates.

Under cost-plus-fixed-fee type contracts, the Company recognizes revenue based on costs incurred plus a pro rata portion of the total fixed fee. Revenue on firm fixed price (FFP) contracts is recognized using the percentage-of-completion method. For government product FFP contracts revenue is recognized as the product is shipped or in accordance with the contract terms. Costs and estimated gross margins on contracts are recorded as revenue as work is performed based on the percentage that incurred costs compare to estimated total costs utilizing the most recent estimates of costs and funding. Changes in job performance, job conditions, and estimated profitability, including those arising from final contract settlements and government audit, may result in revisions to costs and income and are recognized in the period in which the revisions are determined. Since many contracts extend over a long period of time, revisions in cost and funding estimates during the progress of work have the effect of adjusting earnings applicable to past performance in the current period. When the current contract estimate indicates a loss, a provision is made for the total anticipated loss in the current period. Revenue earned in excess of billings, if any, is recorded as unbilled revenue. Billings in excess of revenue earned, if any, are recorded as deferred revenue.

iROBOT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Allowance for Doubtful Accounts

The Company maintains an allowance for doubtful accounts to provide for the estimated amount of accounts receivable that may not be collected. The allowance is based upon an assessment of customer creditworthiness, historical payment experience and the age of outstanding receivables.

Activity related to the allowance for doubtful accounts was as follows:

	Fiscal Year Ended		
	January 2, 2010	December 27, 2008	December 29, 2007
	(In thousands)		
Balance at beginning of period	\$65	\$ 65	\$163
Provision	32	1,005	—
Deduction(*)	<u>(7)</u>	<u>(1,005)</u>	<u>(98)</u>
Balance at end of period	<u>\$90</u>	<u>\$ 65</u>	<u>\$ 65</u>

(*) Deductions related to allowance for doubtful accounts represent amounts written off against the allowance, less recoveries.

Inventory

Inventory is stated at the lower of cost or net realizable value with cost being determined using the first-in, first-out (FIFO) method. The Company maintains a reserve for inventory items to provide for an estimated amount of excess or obsolete inventory.

Activity related to the inventory reserve was as follows:

	Fiscal Year Ended		
	January 2, 2010	December 27, 2008	December 29, 2007
	(In thousands)		
Balance at beginning of period	\$ 2,770	\$ 441	\$ 554
Provision	2,117	2,622	106
Deduction(*)	<u>(1,174)</u>	<u>(293)</u>	<u>(219)</u>
Balance at end of period	<u>\$ 3,713</u>	<u>\$2,770</u>	<u>\$ 441</u>

(*) Deductions related to inventory reserve accounts represent amounts written off against the reserve.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Property and Equipment

Property and equipment are recorded at cost and consist primarily of computer equipment, business applications software and machinery. Depreciation is computed using the straight-line method over the estimated useful lives as follows:

	<u>Estimated Useful Life</u>
Computer and research equipment	3 years
Furniture	5
Machinery	2-5
Tooling	2
Business applications software	5
Capital leases and leasehold improvements	Term of lease

Expenditures for additions, renewals and betterments of plant and equipment are capitalized. Expenditures for repairs and maintenance are charged to expense as incurred. As assets are retired or sold, the related cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is credited or charged to operations.

Long-Lived Assets, including Purchased Intangible Assets

The Company periodically evaluates the recoverability of long-lived assets, including other purchased intangible assets whenever events and changes in circumstances, such as reductions in demand or significant economic slowdowns in the industry, indicate that the carrying amount of an asset may not be fully recoverable. When indicators of impairment are present, the carrying values of the asset group are evaluated in relation to the future undiscounted cash flows of the underlying business. The net book value of the underlying asset is adjusted to fair value if the sum of the expected discounted cash flows is less than book value. Fair values are based on estimates of market prices and assumptions concerning the amount and timing of estimated future cash flows and assumed discount rates, reflecting varying degrees of perceived risk. There were no impairment charges recorded during any of the periods presented.

Goodwill

Goodwill is recorded as the difference, if any, between the aggregate consideration paid for an acquisition and the fair value of the net tangible and intangible assets acquired. The Company tests goodwill for impairment at the reporting unit level (operating segment or one level below an operating segment) annually or more frequently if the Company believes indicators of impairment exist. The performance of the test involves a two-step process. The first step of the impairment test involves comparing the fair values of the applicable reporting units with their aggregate carrying values, including goodwill. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the Company performs the second step of the goodwill impairment test to determine the amount of impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the affected reporting unit's goodwill with the carrying value of that goodwill.

Research and Development

Costs incurred in the research and development of the Company's products, classified as cost of contract and research and development, are expensed as incurred.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Internal Use Software

The Company capitalizes costs associated with the development and implementation of software obtained for internal use. At January 2, 2010 and December 27, 2008, the Company had \$4.9 million and \$5.1 million respectively, of costs related to enterprise-wide software included in fixed assets. Capitalized costs are being amortized over the assets' estimated useful lives. The Company has recorded \$0.9 million, \$0.8 million and \$0.7 million of amortization expense for the years ended January 2, 2010, December 27, 2008 and December 29, 2007, respectively.

Concentration of Credit Risk and Significant Customers

The Company maintains its cash in bank deposit accounts at high quality financial institutions. The individual balances, at times, may exceed federally insured limits. At January 2, 2010 and December 27, 2008 the Company exceeded the insured limit by \$79.4 million and \$40.4 million, respectively.

Financial instruments which potentially expose the Company to concentrations of credit risk consist of accounts receivable. Management believes its credit policies are prudent and reflect normal industry terms and business risk. At January 2, 2010 and December 27, 2008, 35% and 26%, respectively, of the Company's accounts receivable were due from the federal government. For the years ended January 2, 2010, December 27, 2008, and December 29, 2007 revenue from one customer, the federal government, represented 36.9%, 40% and 35% of total revenue, respectively.

Foreign Currency Forward Contracts

The Company periodically enters into foreign currency forward contracts to sell Canadian dollars for United States dollars. The Company's objective in entering into these contracts was to reduce foreign currency exposure to appreciation or depreciation in the value of its Canadian dollar based accounts receivable balances by partially offsetting a portion of such exposure with gains or losses on the forward contracts.

These foreign currency contracts did not qualify for hedge accounting. Accordingly, the foreign currency forward contracts were marked-to-market and recorded at fair value with unrealized gains and losses reported along with foreign currency gains or losses in the caption "other income (expense), net" on the Company's consolidated statements of operations. As of January 2, 2010 the Company did not have any foreign currency forward contracts.

Stock-Based Compensation

Effective January 1, 2006, the Company adopted the relevant authoritative guidance which establishes accounting for equity instruments exchanged for employee services. Under the provisions of this guidance, share-based compensation cost is measured at the grant date, based on the calculated fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grants). The Company adopted the prospective transition method as provided by this guidance and, accordingly financial statement amounts for the prior periods presented in this Annual Report on Form 10-K have not been restated to reflect the fair value method of expensing share-based compensation. Prior to January 1, 2006, the Company accounted for share-based compensation to employees in accordance with the authoritative guidance in effect at that time.

In a review of its stock-based compensation accounting methodology performed during the second quarter of fiscal 2007, the Company determined that a cumulative adjustment of \$0.5 million of incremental stock-based compensation expense, and a balance sheet reclassification of \$0.8 million from deferred compensation to additional paid-in capital, were required due to a correction in the application of the relevant authoritative guidance. Upon adoption of this guidance on January 1, 2006, the Company incorrectly valued 259,700 stock options that were granted between the date that it filed its initial Form S-1 registration statement with the Securities and Exchange Commission on July 27, 2005 and the date it became a public company (November 8, 2005). The

iROBOT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Company believes that this adjustment did not have a material impact to its full year results for 2007. In addition, management does not believe the adjustment is material to the amounts reported by the Company in previous periods. This cumulative adjustment is included in the gross margin and operating expenses for the fiscal year ended December 29, 2007.

Entities that become public companies after June 15, 2005 and used the minimum value method of measuring equity share options and similar instruments as a non-public company for either recognition or pro forma disclosure purposes under previous authoritative guidance must apply the provisions of the current authoritative guidance prospectively to new and/or modified awards after the adoption of this current guidance. Companies should continue to account for any portion of awards outstanding at the date of initial application of the current authoritative guidance using the accounting principles originally applied to those awards. Accordingly, the Company did not record any cumulative effect of a change in accounting principle associated with the adoption of the current authoritative guidance on January 1, 2006.

The Company has historically granted stock options at exercise prices that equaled the fair value of its common stock as estimated by its board of directors, with input from management, as of the date of grant. Because there was no public market for the Company's common stock prior to its initial public offering on November 9, 2005, its board of directors determined the fair value of its common stock by considering a number of objective and subjective factors, including the Company's operating and financial performance and corporate milestones, the prices at which it sold shares of convertible preferred stock, the superior rights and preferences of securities senior to its common stock at the time of each grant, and the risk and non-liquid nature of its common stock. The Company has not historically obtained contemporaneous valuations by an unrelated valuation specialist because, at the time of the issuances of stock options, the Company believed its estimates of the fair value of its common stock to be reasonable based on the foregoing factors.

In connection with the initial public offering, the Company retrospectively reassessed the fair value of its common stock for options granted during the period from July 1, 2004 to November 8, 2005. As a result of this reassessment, the Company determined that the estimated fair market value used in granting options for the period from July 1, 2004 to December 31, 2004 was reasonable and appropriate. Accordingly, no deferred compensation was recorded for these grants. For the period from January 1, 2005 through November 8, 2005, the Company determined that the estimated fair value of its common stock increased from \$4.60 to \$21.60 due to a number of factors such as, among other things, the likelihood of an initial public offering, its improving operating results and the achievement of other corporate milestones in 2005. Based upon this determination, the Company recorded deferred compensation of approximately \$3.4 million in the twelve months ended December 31, 2005 relating to stock options with exercise prices below the retrospectively reassessed fair market value on the date of grant. The Company recognized associated stock-based compensation expense of \$0.2 million, \$0.3 million and \$0.2 million for the fiscal years ended January 2, 2010, December 27, 2008 and December 29, 2007, respectively. As of January 2, 2010, the deferred stock-based compensation balance associated with these grants was \$0.1 million, which the Company expects to recognize as stock-based compensation expense in 2010.

Under the provisions of the relevant authoritative guidance, the Company recognized \$6.3 million of stock-based compensation expense during the fiscal year ended January 2, 2010 for stock options granted subsequent to the Company's initial filing of its Form S-1 with the SEC. The unamortized fair value as of January 2, 2010 associated with these grants was \$10.3 million with a weighted average remaining recognition period of 2.31 years.

On May 29, 2009, the Company completed a one-time stock option exchange program as approved by its stockholders on May 28, 2009. In accordance with the terms and conditions of the stock option exchange program, the Company issued new options to purchase an aggregate of 310,607 shares of the Company's common stock in exchange for the cancellation of options to purchase an aggregate of 678,850 of the Company's common stock. The exchange ratios were designed to result in the fair value, for accounting purposes, of the new options being approximately equal to the fair value of the exchanged eligible options to ensure the Company minimized any

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

additional compensation expense in connection with the stock option exchange program. The Company incurred no additional compensation expense in connection with the program.

The fair value of each option grant for the fiscal years ended January 2, 2010 (excluding the new options issued in conjunction with the stock option exchange program described in the preceding paragraph for which no incremental compensation expense was realized), December 27, 2008 and December 29, 2007 was computed on the grant date using the Black-Scholes option-pricing model with the following assumptions:

	<u>Fiscal Year Ended January 2, 2010</u>	<u>Fiscal Year Ended December 27, 2008</u>	<u>Fiscal Year Ended December 29, 2007</u>
Risk-free interest rate	1.45% — 2.50%	2.24% — 3.45%	3.23% — 4.90%
Expected dividend yield	—	—	—
Expected life	3.50 — 4.75 years	3.50 — 4.75 years	3.50 — 4.75 years
Expected volatility	55.0% — 56.5%	55.0%	50.0% — 55.0%

The risk-free interest rate is derived from the average U.S. Treasury constant maturity rate, which approximates the rate in effect at the time of grant, commensurate with the expected life of the instrument. The dividend yield is zero based upon the fact the Company has never paid and has no present intention to pay cash dividends. The expected term calculation is based upon the simplified method provided under the relevant authoritative guidance, the expected term is developed by averaging the contractual term of the stock option grants (7 or 10 years) with the associated vesting term (typically 4 to 5 years). Given the Company's initial public offering in November 2005 and the resulting short history as a public company, the Company could not rely solely on company specific historical data for purposes of establishing expected volatility. Consequently, the Company performed an analysis that included company specific historical data combined with data of several peer companies with similar expected option lives to develop expected volatility assumptions.

Based upon the above assumptions, the weighted average fair value of each stock option granted for the fiscal year ended January 2, 2010 was \$4.91, excluding the new options issued in conjunction with the stock option exchange program for which no incremental compensation expense was realized.

The Company has assumed a forfeiture rate for all stock options granted subsequent to the Company's initial filing of its Form S-1 with the SEC. In the future, the Company will record incremental stock-based compensation expense if the actual forfeiture rates are lower than estimated and will record a recovery of prior stock-based compensation expense if the actual forfeitures are higher than estimated.

iROBOT CORPORATION

Forfeited	<u>(4,469)</u>	<u>16.23</u>
Outstanding at January 2, 2010	<u>301,224</u>	<u>\$12.23</u>

During the fiscal year ended January 2, 2010, the Company recognized \$1.0 million of stock based compensation expense associated with restricted stock units. As of January 2, 2010, the unamortized fair value of all restricted stock units was \$3.2 million. The Company expects to recognize associated stock-based compensation expense of \$1.1 million, \$1.0 million, \$0.8 million and \$0.3 million in 2010, 2011, 2012 and 2013, respectively.

Advertising Expense

The Company expenses advertising costs as they are incurred. During the years ended January 2, 2010, December 27, 2008 and December 29, 2007 advertising expense totaled \$7.0 million, \$11.6 million and \$15.9 million, respectively.

Net Income Per Share

The following table presents the calculation of both basic and diluted net income per share:

	<u>Fiscal Year Ended</u>		
	<u>January 2, 2010</u>	<u>December 27, 2008</u>	<u>December 29, 2007</u>
Net income	<u>\$ 3,330</u>	<u>\$ 756</u>	<u>\$ 9,060</u>
Weighted average shares outstanding	24,998	24,654	24,229
Dilutive effect of employee stock options and restricted shares	<u>642</u>	<u>879</u>	<u>1,272</u>
Diluted weighted average shares outstanding	<u>25,640</u>	<u>25,533</u>	<u>25,501</u>
Basic income per share	\$ 0.13	\$ 0.03	\$ 0.37
Diluted income per share	\$ 0.13	\$ 0.03	\$ 0.36

Potentially diluted securities representing approximately 2.3 million, 2.1 million and 1.5 million shares of common stock for the fiscal years ended January 2, 2010, December 27, 2008 and December 29, 2007, respectively,

iROBOT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

were excluded from the computation of diluted earnings per share for these periods because their effect would have been antidilutive.

Income Taxes

Effective December 31, 2006, the Company adopted the relevant authoritative guidance which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The impact of adoption on the Company's opening balance of retained earnings was zero. As of the beginning of fiscal year 2009, the Company had no material unrecognized tax benefits and no material unrecognized tax benefits were recorded in the fiscal year ended January 2, 2010. The Company recognizes interest and penalties related to unrecognized tax benefits in its tax provision and there were no accrued interest or penalties as of January 2, 2010, December 27, 2008 or December 29, 2007.

The Company is subject to taxation in the United States and various states and foreign jurisdictions. The statute of limitations for assessment by the IRS and state tax authorities is closed for fiscal years prior to December 31, 2006, although carryforward attributes that were generated prior to fiscal year 2006 may still be adjusted upon examination by the IRS or state tax authorities if they either have been or will be used in a future period. There are currently no federal or state audits in progress.

Deferred taxes are determined based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. Valuation allowances are provided if based upon the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

The Company monitors the realization of its deferred tax assets based on changes in circumstances, for example recurring periods of income for tax purposes following historical periods of cumulative losses or changes in tax laws or regulations. The Company's income tax provisions and its assessment of the ability to realize its deferred tax assets involve significant judgments and estimates.

In fiscal 2007, the Company completed an analysis of historical and projected future profitability which resulted in the full release of the valuation allowance relating to federal deferred tax assets. The Company continues to maintain a valuation allowance against state deferred tax assets due to less certainty of their ability to realize given the shorter expiration period associated with these state deferred tax assets and the generation of state tax credits in excess of the state tax liability. At January 2, 2010, the Company has total deferred tax assets of \$18.6 million and a valuation allowance of \$3.8 million resulting in a net deferred tax asset of \$14.8 million.

Comprehensive Income

Comprehensive income includes unrealized losses on certain investments. The differences between net income and comprehensive income were as follows:

	Fiscal Year Ended	
	January 2, 2010	December 27, 2008
Net income, as reported	\$3,330	\$756
Unrealized losses on investments	(41)	—
Total comprehensive income	\$3,289	\$756

Fair Value Measurements

The Company has adopted the authoritative guidance for fair value measurement as of December 30, 2007, for financial instruments. Although the adoption of this guidance did not materially impact its financial condition,

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

results of operations, or cash flow, the Company is now required to provide additional disclosures as part of its financial statements.

The Company has adopted the authoritative guidance for fair value measurement as of December 28, 2008 for nonfinancial assets and nonfinancial liabilities. This adoption did not impact the Company's consolidated financial statements.

The authoritative guidance for fair value establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The Company's assets measured at fair value on a recurring basis at January 2, 2010, were as follows:

<u>Description</u>	Fair Value Measurements as of January 2, 2010		
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
	(In thousands)		
Assets:			
Money Market Accounts	\$20,077	\$ —	\$—
Investment in U.S. Government bonds.	<u>—</u>	<u>4,959</u>	<u>—</u>
Total assets measured at fair value	<u>\$20,077</u>	<u>\$4,959</u>	<u>\$—</u>

The bond investment is valued based on observable market values as of the Company's reporting date and is included in level 2 inputs. The bond investment is recorded at fair value and marked-to-market at the end of each reporting period and realized and unrealized gains and losses are included in comprehensive income for that period. The fair value of the Company's bond investment is included in short term investments in its consolidated balance sheet.

The Company's assets measured at fair value on a recurring basis at December 27, 2008, were as follows:

<u>Description</u>	Fair Value Measurements as of December 27, 2008		
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
	(In thousands)		
Assets:			
Money Market Accounts	\$39,512	\$ —	\$—
Foreign Currency forward contracts	<u>—</u>	<u>(55)</u>	<u>—</u>
Total assets measured at fair value	<u>\$39,512</u>	<u>(55)</u>	<u>\$—</u>

Foreign currency forward contracts are valued based on observable market spot and forward rates as of our reporting date and are included in level 2 inputs. The Company uses these derivative instruments to mitigate foreign currency receivable transactions exposure. All contracts are recorded at fair value and marked to market at the end of each reporting period and realized and unrealized gains and losses are included in net income for that period. The fair value of the Company's foreign currency forward contracts was included in receivables in its consolidated balance sheet.

Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board ("FASB") issued amendments to the accounting and disclosure requirements for business combinations and noncontrolling interests in consolidated financial statements. The amendment to the accounting and disclosure requirements for business combinations will change how business acquisitions are accounted for and will impact financial statements both on the acquisition date and in

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

subsequent periods. The amendment to the accounting and disclosure requirements for noncontrolling interests in consolidated financial statements will change the accounting and reporting for minority interests, which will be recharacterized as noncontrolling interests and classified as a component of equity. These amendments are effective for fiscal years beginning on or after December 15, 2008. The Company adopted these amendments at the beginning of fiscal 2009 and will change its accounting treatment for business combinations and noncontrolling interests, if any, on a prospective basis.

On April 1, 2009, FASB issued an amendment to the accounting and disclosure requirements for assets acquired and liabilities assumed in a business combination that arise from contingencies. This amendment addresses application issues regarding the initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. The Company adopted this amendment on April 1, 2009 and will change its accounting treatment for business combinations, if any, on a prospective basis.

In May 2009, FASB issued an amendment to the accounting and disclosure requirements for subsequent events. This amendment establishes general standards of accounting for disclosing events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for selecting that date, that is, whether that date represents the date the financial statements were issued or were available to be issued. This amendment is effective for interim or annual financial periods ending after June 15, 2009. The implementation of this amendment did not impact the Company's consolidated financial statements.

In June 2009, FASB issued an amendment to the accounting and disclosure requirements for the consolidation of variable interest entities (VIEs). The elimination of the concept of a Qualifying Special Purpose Entity ("QSPE"), removes the exception from applying the consolidation guidance within this amendment. This amendment requires an enterprise to perform a qualitative analysis when determining whether or not it must consolidate a VIE. This amendment also requires an enterprise to continuously reassess whether it must consolidate a VIE. Additionally, this amendment requires enhanced disclosures about an enterprise's involvement with VIEs and any significant change in risk exposure due to that involvement, as well as how its involvement with VIEs impacts the enterprise's financial statements. Finally, an enterprise will be required to disclose significant judgments and assumptions used to determine whether or not to consolidate a VIE. This amendment is effective for financial statements issued for fiscal years beginning after November 15, 2009. The Company does not expect this amendment to have an impact on its financial position or results of operations.

In June 2009, FASB issued FASB Accounting Standards Codification ("Codification"). The Codification will become the single source for all authoritative Generally Accepted Accounting Principles ("GAAP") recognized by FASB to be applied for financial statements issued for periods ending after September 15, 2009. The Codification does not change GAAP and will not have an effect on the Company's financial position or results of operations. The Company adopted this accounting standard during the three month period ending September 26, 2009.

In September 2009, FASB issued an amendment to the accounting and disclosure requirements for multiple-deliverable revenue arrangements. This guidance addresses how to separate deliverables and how to measure and allocate consideration to one or more units of accounting. Specifically, the guidance requires that consideration be allocated among multiple deliverables based on relative selling prices. The guidance establishes a selling price hierarchy of (1) vendor-specific objective evidence, (2) third-party evidence and (3) estimated selling price. This guidance is effective for annual periods beginning after December 15, 2009 but may be early adopted as of the beginning of an annual period. The Company is currently evaluating the effect that this guidance will have on its financial position and results of operations.

From time to time, new accounting pronouncements are issued by FASB that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the impact of recently issued

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

standards, which are not yet effective, will not have a material impact on the Company's consolidated financial statements upon adoption.

3. Inventory

Inventory consists of the following at:

	January 2, 2010	December 27, 2008
(In thousands)		
Raw materials	\$ 3,735	\$ 3,443
Work in process	687	746
Finished goods	27,984	30,371
	\$32,406	\$34,560

4. Property and Equipment

Property and equipment consists of the following at:

	January 2, 2010	December 27, 2008
(In thousands)		
Computer and equipment	\$12,789	\$11,307
Furniture	1,656	1,669
Machinery	1,517	1,502
Tooling	3,723	6,454
Leasehold improvements	12,579	12,359
Software purchased for internal use	4,858	5,082
	37,122	38,373
Less: accumulated depreciation	16,892	15,444
	\$20,230	\$22,929

Depreciation expense for the years ended December 27, 2008, December 29, 2007 and December 30, 2006 was \$7.5 million, \$6.9 million, and \$5.3 million, respectively.

5. Other Assets

Other assets consists of the following at:

	January 2, 2010	December 27, 2008
(In thousands)		
Goodwill and intangible assets, net	\$11,754	\$ 9,746
Investment in Advanced Scientific Concepts, Inc.	2,500	2,500
	\$14,254	\$12,246

Goodwill and Intangible assets are the result of the acquisition of Nekton Research, LLC ("Nekton"), See Notes 13 and 14 to the Consolidated Financial Statements for a more detailed discussion of the Goodwill and intangible assets, net.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

In November 2007, the Company recorded an investment of \$2.5 million in a series of preferred stock of Advanced Scientific Concepts, Inc. This investment is accounted for at cost utilizing the cost method. The Company regularly monitors this investment to determine if facts and circumstances have changed in a manner that would require a change in accounting methodology. Additionally, the Company regularly evaluates whether or not this investment has been impaired by considering such factors as economic environment, market conditions, operational performance and other specific factors relating to the business underlying the investment. If any such impairment is identified, a reduction in the carrying value of the investment would be recorded at that time.

6. Accrued Expenses

Accrued expenses consist of the following at:

	January 2, 2010	December 27, 2008
	(In thousands)	
Accrued warranty	\$ 6,105	\$ 5,380
Accrued direct fulfillment costs	1,836	1,236
Accrued rent	532	470
Accrued sales commissions	472	801
Accrued accounting fees	401	376
Accrued income taxes	2,177	248
Accrued other	<u>2,861</u>	<u>2,478</u>
	<u>\$14,384</u>	<u>\$10,989</u>

7. Revolving Line of Credit

The Company has an unsecured revolving credit facility with Bank of America, N.A., which is available to fund working capital and other corporate purposes. The amount available for borrowing under its credit facility is the lesser of: (a) \$45.0 million or (b) amounts available pursuant to a borrowing base calculation determined pursuant to the terms and conditions of the credit facility. As of January 2, 2010, \$43.0 million was available for borrowing. The interest on loans under the credit facility will accrue, at the Company's election, at either (i) Bank of America's prime rate minus 1% or (ii) the Eurodollar rate plus 1.25%. The credit facility will terminate and all amounts outstanding thereunder will be due and payable in full on June 5, 2010.

As of January 2, 2010, the Company had letters of credit outstanding of \$2.0 million under its working capital line of credit. This credit facility contains customary terms and conditions for credit facilities of this type, including restrictions on the Company's ability to incur or guaranty additional indebtedness, create liens, enter into transactions with affiliates, make loans or investments, sell assets, pay dividends or make distributions on, or repurchase, the Company's stock, and consolidate or merge with other entities.

In addition, the Company is required to meet certain financial covenants customary with this type of agreement, including maintaining a minimum specified tangible net worth and a minimum specified annual net income.

This credit facility contains customary events of default, including for payment defaults, breaches of representations, breaches of affirmative or negative covenants, cross defaults to other material indebtedness, bankruptcy and failure to discharge certain judgments. If a default occurs and is not cured within any applicable cure period or is not waived, the Company's obligations under the credit facility may be accelerated.

As of January 2, 2010, the Company was in compliance with all covenants under its credit facility.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

On February 12, 2010, the Company entered into an agreement to amend its credit facility, including the following changes:

- The amount available for borrowing was reduced to \$40 million.
- Under the amended agreement, the interest on loans under the Company's credit facility will accrue, at its election, at either (i) the greater of the BBA LIBOR Daily Floating Rate or the Prime Rate of Lender plus fifty (50) basis points, or (ii) the LIBOR rate plus 2.00%.
- The credit facility termination date was extended to June 5, 2012.
- The borrowing base calculation was deleted from the agreement.
- A minimum specified interest coverage ratio covenant was added to the financial covenants.
- The minimum specified annual net income covenant was replaced with a minimum adjusted EBITDA covenant.

8. Common Stock

Common stockholders are entitled to one vote for each share held and to receive dividends if and when declared by the Board of Directors and subject to and qualified by the rights of holders of the preferred stock. Upon dissolution or liquidation of the Company, holders of common stock will be entitled to receive all available assets subject to any preferential rights of any then outstanding preferred stock.

9. Stock Option Plans

The Company has options outstanding under three stock incentive plans: the 1994 Stock Option Plan (the "1994 Plan"), the 2004 Stock Option and Incentive Plan (the "2004 Plan") and the 2005 Stock Option and Incentive Plan (the "2005 Plan" and together with the 1994 Plan and the 2004 Plan, the "Plans"). The 2005 Plan is the only one of the three plans under which new awards may currently be granted. Under the 2005 Plan, which became effective October 10, 2005, 1,583,682 shares were initially reserved for issuance in the form of incentive stock options, non-qualified stock options, stock appreciation rights, deferred stock awards and restricted stock awards. Additionally, the 2005 Plan provides that the number of shares reserved and available for issuance under the plan will automatically increase each January 1, beginning in 2007, by 4.5% of the outstanding number of shares of common stock on the immediately preceding December 31. Stock options returned to the Plans as a result of their expiration, cancellation or termination are automatically made available for issuance under the 2005 Plan. Eligibility for incentive stock options is limited to those individuals whose employment status would qualify them for the tax treatment associated with incentive stock options in accordance with the Internal Revenue Code of 1986, as amended. As of January 2, 2010, there were 3,124,979 shares available for future grant under the 2005 Plan.

Options granted under the Plans are subject to terms and conditions as determined by the compensation committee of the board of directors, including vesting periods. Options granted under the Plans are exercisable in full at any time subsequent to vesting, generally vest over periods from zero to five years, and expire seven or ten years from the date of grant or, if earlier, 60 or 90 days from employee termination. The exercise price of incentive stock options is equal to the closing price on the NASDAQ Global Market on the date of grant. The exercise price of nonstatutory options may be set at a price other than the fair market value of the common stock.

On September 25, 2009, in connection with his employment, the Company granted the president of its newly-created healthcare business unit a stock option exercisable for 100,000 shares of the Company's common stock at the closing price of \$12.82 and 25,000 restricted stock units. The stock option will vest 25% on the first anniversary of the grant date and quarterly over the following three years, and the restricted stock units will vest 25% on each anniversary of the grant date.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

On June 26, 2009, each of the Company's eight non-employee board members was issued an annual grant of 10,000 stock options with an exercise price pre share of \$13.46. These stock options will vest 100% on the first anniversary of the grant date.

On April 24, 2009, in connection with his employment, the Company granted the president of its home robots division a stock option exercisable for 150,000 shares of the Company's common stock at the closing price of \$9.80 and 35,000 restricted stock units. The stock option will vest 25% on the first anniversary of the grant date and quarterly over the following three years, and the restricted stock units will vest 25% on each anniversary of the grant date.

10. Income Taxes

The components of income tax expense were as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(In thousands)		
Current			
Federal	\$ 5,019	\$ 2,137	\$ 1,450
State	369	231	187
Foreign	42	10	3
Total current tax provision	5,430	2,378	1,640
Deferred			
Federal	(3,404)	(2,009)	(10,198)
Total income tax provision (benefit)	\$ 2,026	\$ 369	\$ (8,558)

No provision has been made for deferred taxes on undistributed earnings of non-U.S. subsidiaries as these earnings have been indefinitely reinvested. Determination of the amount of unrecognized deferred tax liability on these undistributed earnings is not practicable.

During the quarter ending January 2, 2010, the Company recorded an out-of-period adjustment in the income tax provision of \$0.2 million to correct an error with respect to the earnings of the Company's India subsidiary. The Company believes that this adjustment did not have a material impact to its full year 2009 results. In addition, management does not believe the adjustment is material to the amounts reported by the Company in previous periods.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The components of net deferred tax assets are as follows at January 2, 2010 and December 27, 2008:

	2009	2008
	(In thousands)	
Net deferred tax assets		
Current net deferred tax assets		
Reserves and accruals	\$ 9,922	\$ 8,372
Valuation allowance	<u>(1,253)</u>	<u>(1,073)</u>
Total current net deferred tax assets	<u>8,669</u>	<u>7,299</u>
Non-current net deferred tax assets		
Capital loss carryforwards	99	99
Tax credits	1,450	2,119
Fixed assets	1,398	1,256
Stock based compensation	5,757	3,413
Valuation allowance	<u>(2,615)</u>	<u>(2,379)</u>
Total non-current net deferred tax assets	<u>6,089</u>	<u>4,508</u>
Total net deferred tax assets	<u>\$14,758</u>	<u>\$11,807</u>

The gross deferred tax assets as of January 2, 2010 and December 27, 2008 were \$18.6 million and \$15.3 million, respectively.

In 2007, the Company made the determination that the realization of certain deferred tax assets was more likely than not based on future projections of taxable income. The Company released the valuation allowance associated with these assets and recorded a income statement benefit of \$10.2 million in fiscal 2007. The valuation allowance as of January 2, 2010 relates to all state deferred tax assets, including state credits, and state net operating losses.

As of December 27, 2008, the Company has utilized all of its available net operating loss carryforwards for federal and state purposes. As of January 2, 2010, the Company does possess research and development credits carryforwards to offset future federal and state taxes of \$0.7 million and \$2.2 million respectively, and investment tax credit carryforwards to offset future state taxes of \$0.6 million, which expire at various dates from 2012 to 2024. As of December 27, 2008, the Company possessed research and development credits carryforwards to offset future federal and state taxes of \$2.9 million and \$2.2 million, respectively, and investment tax credit carryforwards to offset future state taxes of \$0.7 million. Under the Internal Revenue Service Code, certain substantial changes in the Company's ownership could result in an annual limitation on the amount of these tax carryforwards which can be utilized in future years.

iROBOT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The reconciliation of the expected tax (benefit) expense (computed by applying the federal statutory rate to income before income taxes) to actual tax expense was as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(In thousands)		
Expected federal income tax	\$1,991	\$ 382	\$ 171
Permanent items	125	127	91
State taxes	94	(690)	301
Credits	(367)	(494)	(1,148)
Non deductible stock compensation	259	189	276
Conversion of incentive stock options(1)	(346)	—	—
Other	111	16	(115)
Increase (decrease) in valuation allowance	159	839	(8,134)
	<u>\$2,026</u>	<u>\$ 369</u>	<u>\$(8,558)</u>

(1) The Company recorded a discrete benefit from the conversion of incentive stock options to non-qualified stock options as a result of its stock option exchange program which concluded in the second fiscal quarter of 2009.

At January 2, 2010, the Company had no material unrecognized tax benefits. Additionally, there were no accrued interest or penalties as of January 2, 2010, December 27, 2008 or December 29, 2007.

11. Commitments and Contingencies

Legal

On August 17, 2007, the Company filed a lawsuit in Massachusetts Superior Court against Robotic FX, Inc. and Jameel Ahd alleging, among other things, misappropriation of trade secrets and breach of contract, and seeking both injunctive and monetary relief. The case was subsequently removed to the United States District Court for the District of Massachusetts. On November 2, 2007, the court issued a preliminary injunction, and on December 21, 2007 issued a permanent injunction, against Robotic FX, Inc. and Mr. Ahd preventing the sale of products using certain of the Company's trade secrets, including the Robotic FX Negotiator product.

In addition, on August 17, 2007, the Company filed a lawsuit in the United States District Court for the Northern District of Alabama against Robotic FX, Inc. alleging willful infringement of two patents owned by the Company, and seeking both injunctive and monetary relief. On December 21, 2007, the court entered a judgment that Robotic FX, Inc. knowingly infringed on both asserted patents.

In a related settlement, Robotic FX, Inc. was dissolved and certain residual assets were retained by the Company at its election. Mr. Ahd is prohibited from participating in competitive activities in the robotics industry for five years.

The cumulative litigation and settlement-related expenditures associated with this dispute are expected to total approximately \$3.0 million, including an obligation to make cash payments up to \$0.4 million through 2012, contingent upon Mr. Ahd and Robotic FX, Inc. continuing to meet obligations pursuant to various agreements, including but not limited to certain non-competition provisions. The Company paid \$0.1 million to Mr. Ahd during the fiscal year ended January 2, 2010. These contingent payments will continue to be expensed, when and if earned.

Lease Obligations

The Company leases its facilities. Rental expense under operating leases for fiscal 2009, 2008 and 2007 amounted to \$3.9 million, \$3.8 million, and \$2.1 million, respectively. The Company recorded \$0.7 million of expense in the fiscal year ended December 27, 2008 for remaining lease commitments, net of estimated sublease

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

income, at its former corporate headquarters in Burlington, MA. Future minimum rental payments under operating leases were as follows as of January 2, 2010:

	<u>Operating Leases</u>
2010	\$ 2,642
2011	2,439
2012	2,254
2013	2,087
2014	2,087
Thereafter	<u>11,133</u>
Total minimum lease payments	<u><u>\$22,642</u></u>

Guarantees and Indemnification Obligations

The Company enters into standard indemnification agreements in the ordinary course of business. Pursuant to these agreements, the Company indemnifies and agrees to reimburse the indemnified party for losses incurred by the indemnified party, generally the Company’s customers, in connection with any patent, copyright, trade secret or other proprietary right infringement claim by any third party with respect to the Company’s software. The term of these indemnification agreements is generally perpetual any time after execution of the agreement. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. The Company has never incurred costs to defend lawsuits or settle claims related to these indemnification agreements. As a result, the Company believes the estimated fair value of these agreements is minimal. Accordingly, the Company has no liabilities recorded for these agreements as of January 2, 2010 and December 27, 2008, respectively.

Warranty

The Company provides warranties on most products and has established a reserve for warranty based on identified warranty costs. The reserve is included as part of accrued expenses (Note 6) in the accompanying balance sheets.

Activity related to the warranty accrual was as follows:

	<u>Fiscal Year Ended</u>		
	<u>January 2, 2010</u>	<u>December 27, 2008</u>	<u>December 29, 2007</u>
	<u>(In thousands)</u>		
Balance at beginning of period	\$ 5,380	\$ 2,491	\$ 2,462
Provision	4,870	7,728	6,649
Warranty usage(*)	<u>(4,145)</u>	<u>(4,839)</u>	<u>(6,620)</u>
Balance at end of period	<u><u>\$ 6,105</u></u>	<u><u>\$ 5,380</u></u>	<u><u>\$ 2,491</u></u>

(*) Warranty usage includes the pro rata expiration of product warranties not utilized.

Sales Taxes

The Company collects and remits sales tax in jurisdictions in which it has a physical presence or it believes nexus exists, which therefore obligates the Company to collect and remit sales tax. The Company is not currently aware of any asserted claims for sales tax liabilities for prior taxable periods.

The Company continually evaluates whether it has established a nexus in new jurisdictions with respect to sales tax. The Company has recorded a liability for potential exposure in several states where there is uncertainty about the point in time at which the Company established a sufficient business connection to establish a nexus. The Company continues to analyze possible sales tax exposure, but does not currently believe that any individual claim

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

or aggregate claims that might arise will ultimately have a material effect on its consolidated results of operations, financial position or cash flows.

12. Employee Benefits

The Company sponsors a retirement plan under Section 401(k) of the Internal Revenue Code (the “Retirement Plan”). All Company employees, with the exception of temporary, contract and international employees are eligible to participate in the Retirement Plan after satisfying age and length of service requirements prescribed by the plan. Under the Retirement Plan, employees may make tax-deferred contributions, and the Company, at its sole discretion, and subject to the limits prescribed by the IRS, may make either a nonelective contribution on behalf of all eligible employees or a matching contribution on behalf of all plan participants.

The Company elected to make a matching contribution of approximately \$1.2 million, \$0.9 million and \$0.8 million for the plan years ended January 2, 2010, December 27, 2008 and December 29, 2007 (“Plan-Year 2008,” “Plan-Year 2007” and “Plan-Year 2006”), respectively. The employer contribution represents a matching contribution at a rate of 50% of each employee’s first six percent contribution. Accordingly, each employee participating during Plan-Year 2009, Plan-Year 2008 and Plan-Year 2007 is entitled up to a maximum of three percent of his or her eligible annual payroll. The employer matching contribution for Plan-Year 2009 is included in accrued compensation.

13. Acquisition of Nekton Research, LLC

In September 2008 the Company acquired Nekton, an unmanned underwater robot technology company based in Raleigh, North Carolina. The Company acquired Nekton for a purchase price of \$10 million, consisting primarily of cash and direct acquisition costs, with the potential for additional consideration up to \$5 million based on the achievement of certain business and financial milestones. In connection with the acquisition, the Company assumed \$0.1 million in net liabilities, and initially recorded \$4.5 million of intangible assets and \$5.4 million of goodwill. Approximately \$0.2 million of the purchase price was allocated to in-process research and development and was expensed upon completion of the acquisition. In December 2009, \$2.5 million of additional consideration was paid and recorded as goodwill, under the earn-out provisions of the original agreement, bringing the total goodwill recorded for this acquisition to \$7.9 million. There will be no additional consideration paid in connection with this acquisition.

The consolidated financial statements for the year ended December 27, 2008 include the results of operations of Nekton commencing as of September 8, 2008, the acquisition date. No supplemental pro forma information is presented for the acquisition due to the immaterial effect of the acquisition on the Company’s results of operations.

14. Goodwill and other intangible assets

The carrying amount of the goodwill at January 2, 2010 of \$7.9 million is from the acquisition of Nekton completed in September 2008. In October 2009, the Company completed its annual goodwill impairment test and did not identify any goodwill impairment.

Other intangible assets include the value assigned to completed technology, research contracts, and a trade name. The estimated useful lives for all of these intangible assets are two to ten years. The intangible assets are being amortized on a straight-line basis, which is consistent with the pattern that the economic benefits of the intangible assets are expected to be utilized.

Intangible assets at January 2, 2010 and December 27, 2008 consisted of the following:

	January 2, 2010			December 27, 2008		
	Cost	Accumulated Amortization (In thousands)	Net	Cost	Accumulated Amortization (In thousands)	Net
Completed technology	\$3,700	\$496	\$3,204	\$3,700	\$124	\$3,576
Research contracts	100	64	36	100	16	84
Tradename	700	96	604	700	24	676
Total	\$4,500	\$656	\$3,844	\$4,500	\$164	\$4,336

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

There were no goodwill or intangible assets at December 29, 2007.

Amortization expense related to acquired intangible assets was \$492,000 and \$164,000 for the fiscal years ended January 2, 2010 and December 27, 2008. The estimated future amortization expense related to current intangible assets in each of the five succeeding fiscal years is expected to be as follows:

	(In thousands)
2010	480
2011	444
2012	444
2013	444
2014	444
Total	<u><u>\$2,256</u></u>

15. Industry Segment, Geographic Information and Significant Customers

The Company operates in two reportable segments, the home robots division and the government and industrial division. The nature of products and types of customers for the two segments vary significantly. As such, the segments are managed separately.

Home Robots

The Company's home robots division offers products to consumers through a network of retail businesses throughout the United States, to certain countries through international distributors and retailers, and through the Company's on-line store. The Company's home robots division includes mobile robots used in the maintenance of domestic households.

Government and Industrial

The Company's government and industrial division offers products through a small U.S. government-focused sales force, while products are sold to a limited number of countries, other than the United States, through international distribution. The Company's government and industrial robots are used by various U.S. and foreign governments, primarily for reconnaissance and bomb disposal missions.

iROBOT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The table below presents segment information about revenue, cost of revenue, gross margin and income before income taxes:

	Fiscal Year Ended		
	January 2, 2010	December 27, 2008	December 29, 2007
	(In thousands)		
Revenue:			
Home Robots	\$165,860	\$173,602	\$144,483
Government & Industrial	<u>132,757</u>	<u>134,019</u>	<u>104,598</u>
Total revenue	<u><u>298,617</u></u>	<u><u>307,621</u></u>	<u><u>249,081</u></u>
Cost of revenue:			
Home Robots	112,429	123,833	97,878
Government & Industrial	<u>94,992</u>	<u>90,317</u>	<u>68,616</u>
Total cost of revenue	<u><u>207,421</u></u>	<u><u>214,150</u></u>	<u><u>166,494</u></u>
Gross margin:			
Home Robots	53,431	49,769	46,605
Government & Industrial	<u>37,765</u>	<u>43,702</u>	<u>35,982</u>
Total gross margin	<u><u>91,196</u></u>	<u><u>93,471</u></u>	<u><u>82,587</u></u>
Research and development	14,747	17,566	17,082
Selling and marketing	40,902	46,866	44,894
General and administrative	30,110	28,840	20,919
Litigation and related expenses	—	—	2,341
Other income (expense), net	(81)	926	3,151
Income before income taxes	<u><u>\$ 5,356</u></u>	<u><u>\$ 1,125</u></u>	<u><u>\$ 502</u></u>

As of January 2, 2010, goodwill of \$7.9 million and purchased intangible assets, net of \$3.8 million recorded in conjunction with the acquisition of Nekton in September 2008, as well as the \$2.5 million investment in Advanced Scientific Concepts, Inc., are directly associated with the government and industrial division. Other long lived assets are not directly attributable to individual business segments.

Geographic Information

For the fiscal years ended January 2, 2010 and December 27, 2008, sales to non-U.S. customers accounted for 33.3% and 23.4% of total revenue, respectively. For the year ended January 2, 2010, sales to non-U.S. customers in any single country did not account for more than 10% of total revenue.

Significant Customers

For the fiscal years ended January 2, 2010 and December 27, 2008, U.S. federal government orders, contracts and subcontracts accounted for 36.9% and 40.3% of total revenue, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

17. Subsequent Events

The Company has evaluated subsequent events through February 19, 2010, which represents the filing date of this Form 10-K with the SEC. As of February 19, 2010, there were no subsequent events which required recognition or disclosure.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not Applicable.

ITEM 9A. CONTROLS AND PROCEDURES**Evaluation of disclosure controls and procedures.**

As required by Rule 13a-15(b) under the Exchange Act, we have carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer (“CEO”) and our Chief Financial Officer (“CFO”), of the effectiveness, as of the end of the period covered by this report, of the design and operation of our “disclosure controls and procedures” as defined in Rule 13a-15(e) promulgated by the SEC under the Exchange Act. Based upon that evaluation, our CEO and our CFO concluded that our disclosure controls and procedures, as of the end of such period, were adequate and effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information was accumulated and communicated to management, as appropriate, to allow timely decisions regarding required disclosure.

Management’s Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the Company’s principal executive and principal financial officers and effected by the Company’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including our principal executive and financial officers, we assessed the Company’s internal control over financial reporting as of January 2, 2010, based on criteria for effective internal control over financial reporting established in *Internal Control — Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of January 2, 2010 based on the specified criteria.

The effectiveness of the Company’s internal control over financial reporting as of January 2, 2010 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Changes in Internal Control Over Financial Reporting

During the quarter ended January 2, 2010, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

On February 12, 2010, we entered into a Third Amendment to Credit Agreement, or the Amendment, to our unsecured revolving credit facility with Bank of America, N.A. dated June 5, 2007. The Amendment provides for, among other things:

- The reduction of the amount available for borrowing under the credit facility to \$40 million;
- The revision of the interest rate on loans under our credit facility to, at our election, either (i) the greater of the BBA LIBOR Daily Floating Rate or the Prime Rate of Lender plus fifty (50) basis points, or (ii) the LIBOR rate plus 2.00%;
- The extension of the credit facility termination date to June 5, 2012;
- The deletion of the borrowing base calculation from the credit agreement;
- The addition of a minimum specified interest coverage ratio covenant; and
- The replacement of the minimum specified annual net income covenant with a minimum adjusted EBITDA covenant.

The foregoing description of the Amendment is not complete and is qualified in its entirety by reference to the Amendment, which is filed as Exhibit 10.30 hereto, and is incorporated herein by reference. In connection with the Amendment, we entered into a Second Amendment to Note to that certain Note dated June 5, 2007 executed by us in favor of Bank of America, N.A., which is filed as Exhibit 10.31 hereto.

Our policy governing transactions in our securities by our directors, officers, and employees permits our officers, directors, funds affiliated with our directors, and certain other persons to enter into trading plans complying with Rule 10b5-1 under the Exchange Act. We have been advised that certain of our officers and directors (including Colin Angle, Chief Executive Officer, Joseph Dyer, President — Government and Industrial Robots Division, Glen Weinstein, Senior Vice President, General Counsel and Secretary, and Helen Greiner, Director) of the Company have entered into a trading plan (each a “Plan” and collectively, the “Plans”) covering periods after the date of this Annual Report on Form 10-K in accordance with Rule 10b5-1 and our policy governing transactions in our securities. Generally, under these trading plans, the individual relinquishes control over the transactions once the trading plan is put into place. Accordingly, sales under these plans may occur at any time, including possibly before, simultaneously with, or immediately after significant events involving our company.

We anticipate that, as permitted by Rule 10b5-1 and our policy governing transactions in our securities, some or all of our officers, directors and employees may establish trading plans in the future. We intend to disclose the names of our executive officers and directors who establish a trading plan in compliance with Rule 10b5-1 and the requirements of our policy governing transactions in our securities in our future Quarterly and Annual Reports on Form 10-Q and 10-K filed with the SEC. We, however, undertake no obligation to update or revise the information provided herein, including for revision or termination of an established trading plan, other than in such quarterly and annual reports.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required under this item is incorporated herein by reference to the Company’s definitive proxy statement pursuant to Regulation 14A, which proxy statement will be filed with the Securities and Exchange Commission not later than 120 days after the close of the Company’s fiscal year ended January 2, 2010.

ITEM 11. EXECUTIVE COMPENSATION

The information required under this item is incorporated herein by reference to the Company’s definitive proxy statement pursuant to Regulation 14A, which proxy statement will be filed with the Securities and Exchange Commission not later than 120 days after the close of the Company’s fiscal year ended January 2, 2010.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required under this item is incorporated herein by reference to the Company’s definitive proxy statement pursuant to Regulation 14A, which proxy statement will be filed with the Securities and Exchange Commission not later than 120 days after the close of the Company’s fiscal year ended January 2, 2010.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required under this item is incorporated herein by reference to the Company’s definitive proxy statement pursuant to Regulation 14A, which proxy statement will be filed with the Securities and Exchange Commission not later than 120 days after the close of the Company’s fiscal year ended January 2, 2010.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required under this item is incorporated herein by reference to the Company’s definitive proxy statement pursuant to Regulation 14A, which proxy statement will be filed with the Securities and Exchange Commission not later than 120 days after the close of the Company’s fiscal year ended January 2, 2010.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following are filed as part of this Annual Report on Form 10-K:

1. Financial Statements

The following consolidated financial statements are included in Item 8:

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets at January 2, 2010 and December 27, 2008

Consolidated Statements of Operations for the Years ended January 2, 2010, December 27, 2008, and December 29, 2007

Consolidated Statements of Stockholders’ Equity (Deficit) for the Years ended January 2, 2010, December 27, 2008, and December 29, 2007

Consolidated Statements of Cash Flows for the Years ended January 2, 2010, December 27, 2008, and December 29, 2007

Notes to Consolidated Financial Statements

2. Financial Statement Schedules

All other schedules have been omitted since the required information is not present, or not present in amounts sufficient to require submission of the schedule, or because the information required is included in the consolidated financial statements or the Notes thereto.

3. Exhibits — See item 15(b) of this report below

(b) Exhibits

The following exhibits are filed as part of and incorporated by reference into this Annual Report:

<u>Exhibit Number</u>	<u>Description</u>

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused this Annual Report on Form 10-K to be signed on its behalf by the undersigned, thereunto duly authorized.

iROBOT CORPORATION

By: /s/ Colin M. Angle

Colin M. Angle
Chairman of the Board,
Chief Executive Officer and Director

Date: February 19, 2010

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS, that each person whose signature appears below constitutes and appoints Colin M. Angle and John Leahy, jointly and severally, his or her attorney-in-fact, with the power of substitution, for him or her in any and all capacities, to sign any amendments to this Annual Report on Form 10-K and to file the same, with exhibits thereto and other documents in connection therewith, with the Securities and Exchange Commission, hereby ratifying and confirming all that each of said attorneys-in-fact, or his or her substitute or substitutes, may do or cause to be done by virtue hereof.

Pursuant to the requirements of the Securities Exchange Act of 1934, as amended, this Annual Report on Form 10-K has been signed by the following persons in the capacities indicated on February 19, 2010.
